

Comparison of the 32 determinants by stage

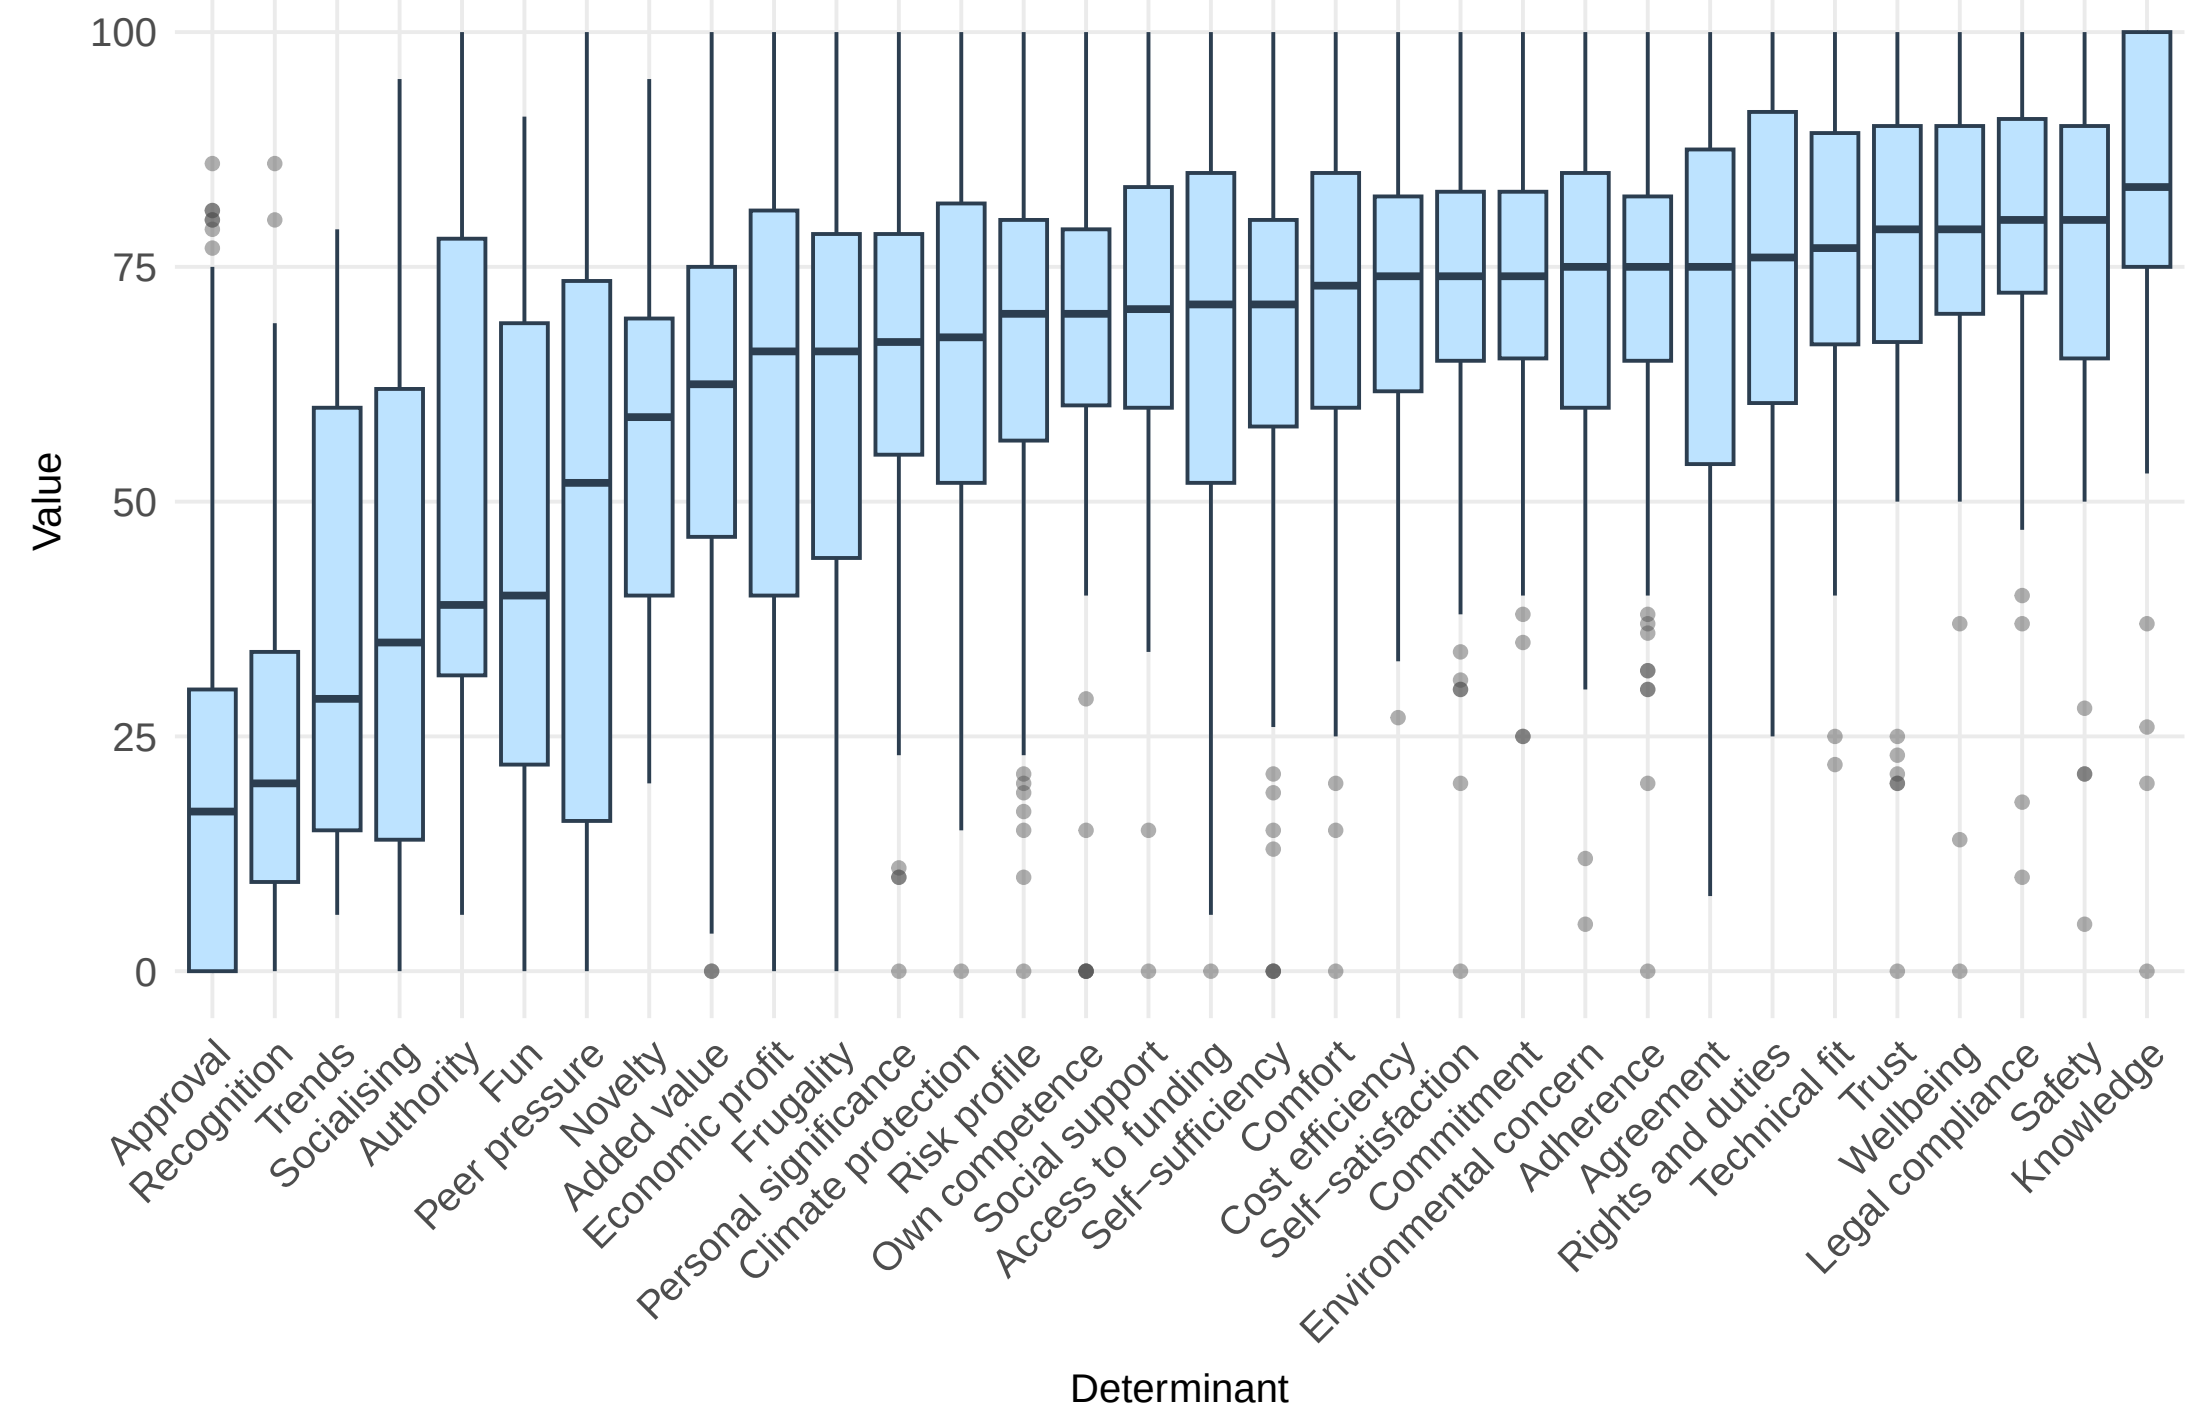

Distribution of the 32 determinants – General

n participants = 402; valid participant–determinant observations = 7871

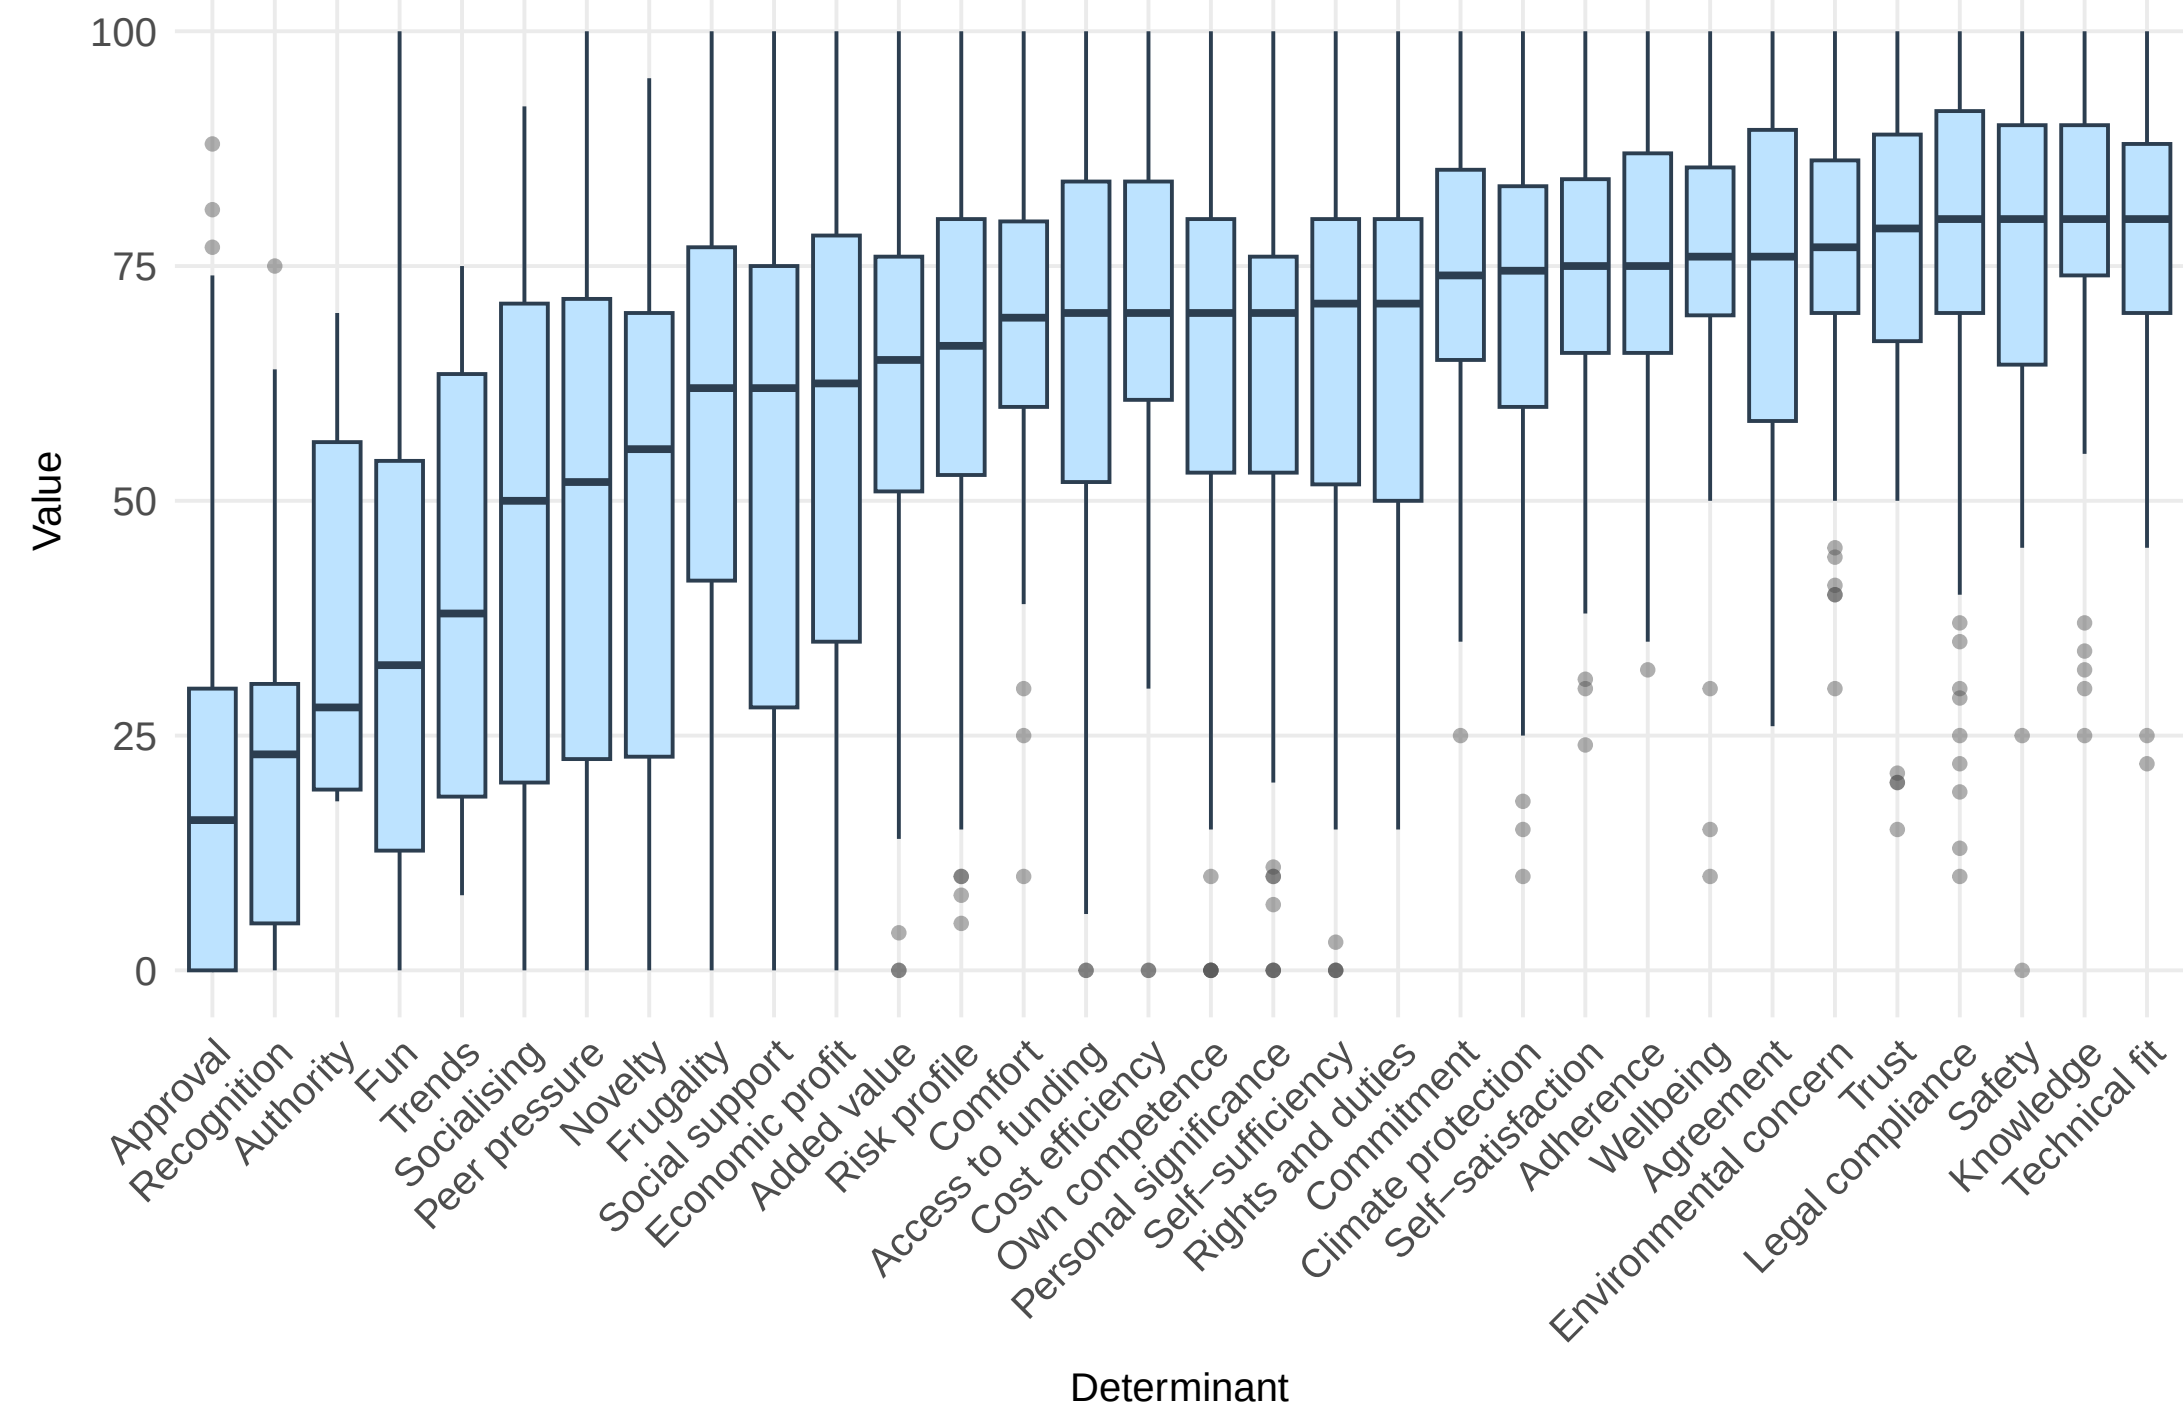

Distribution of the 32 determinants – Implemented

n participants = 336; valid participant–determinant observations = 2718

Distribution of the 32 determinants – Aware / would consider

n participants = 335; valid participant–determinant observations = 2902

Distribution of the 32 determinants – Unaware but curious

n participants = 257; valid participant–determinant observations = 2251
