

Sample distribution by generation

valid n = 387; missing n = 16; total n = 403

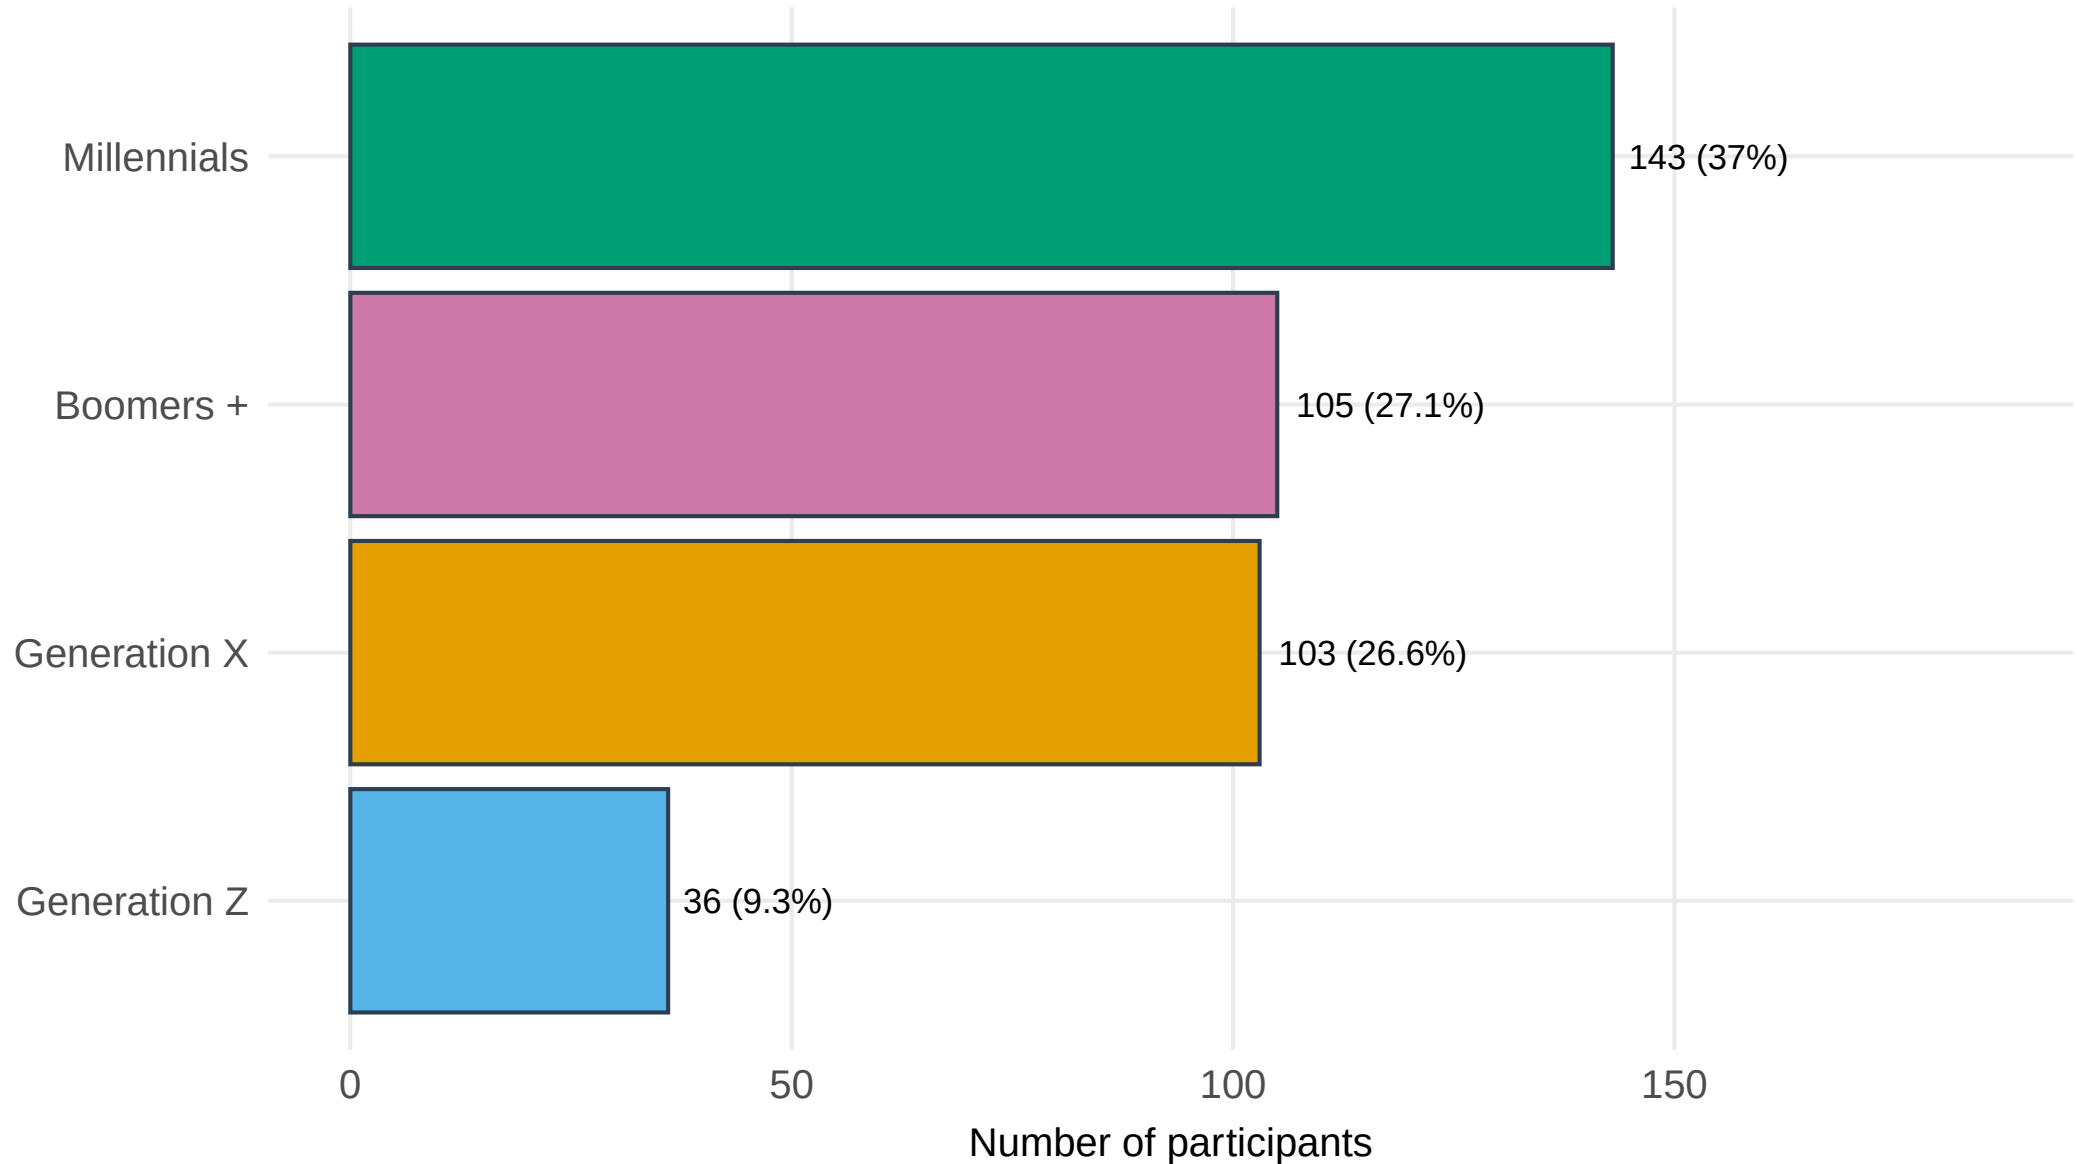

Percentage distribution of the sample by generation

valid n = 387; missing n = 16; total n = 403

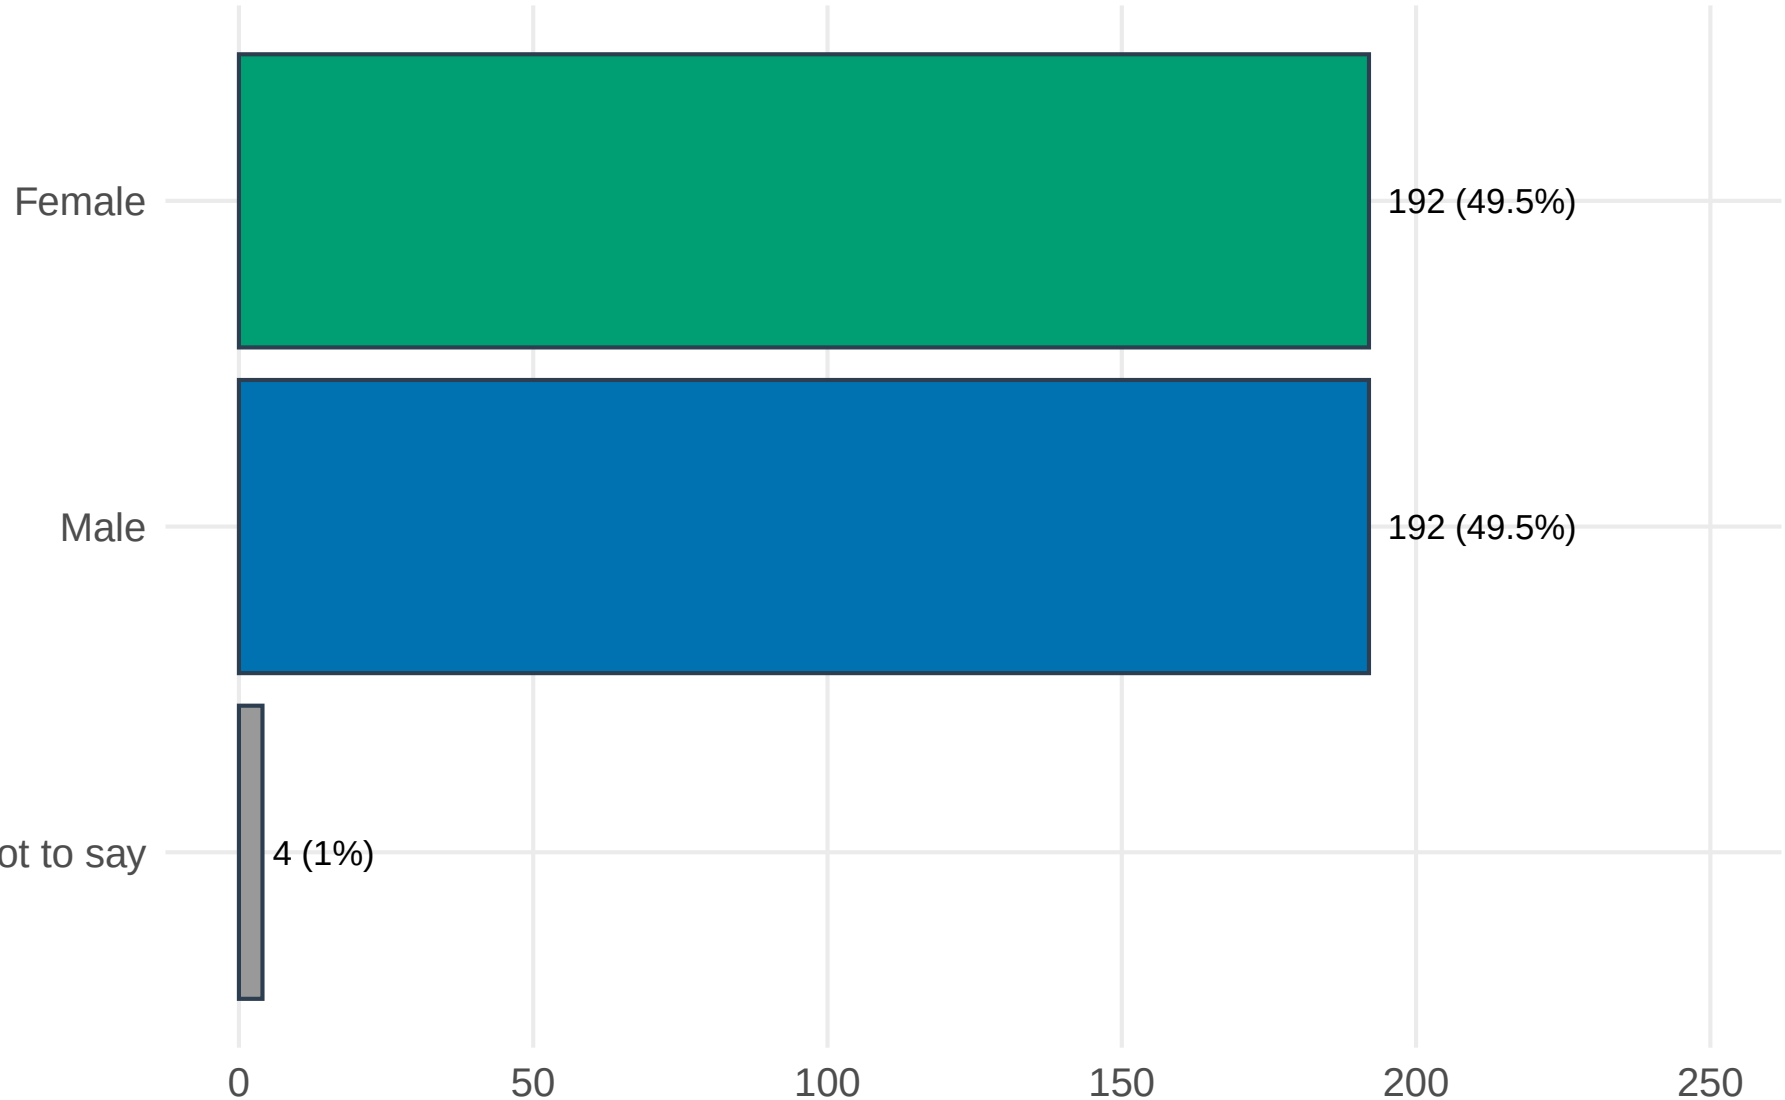

Sample distribution by generation – ordered

valid n = 387; missing n = 16; total n = 403

Sample distribution by gender

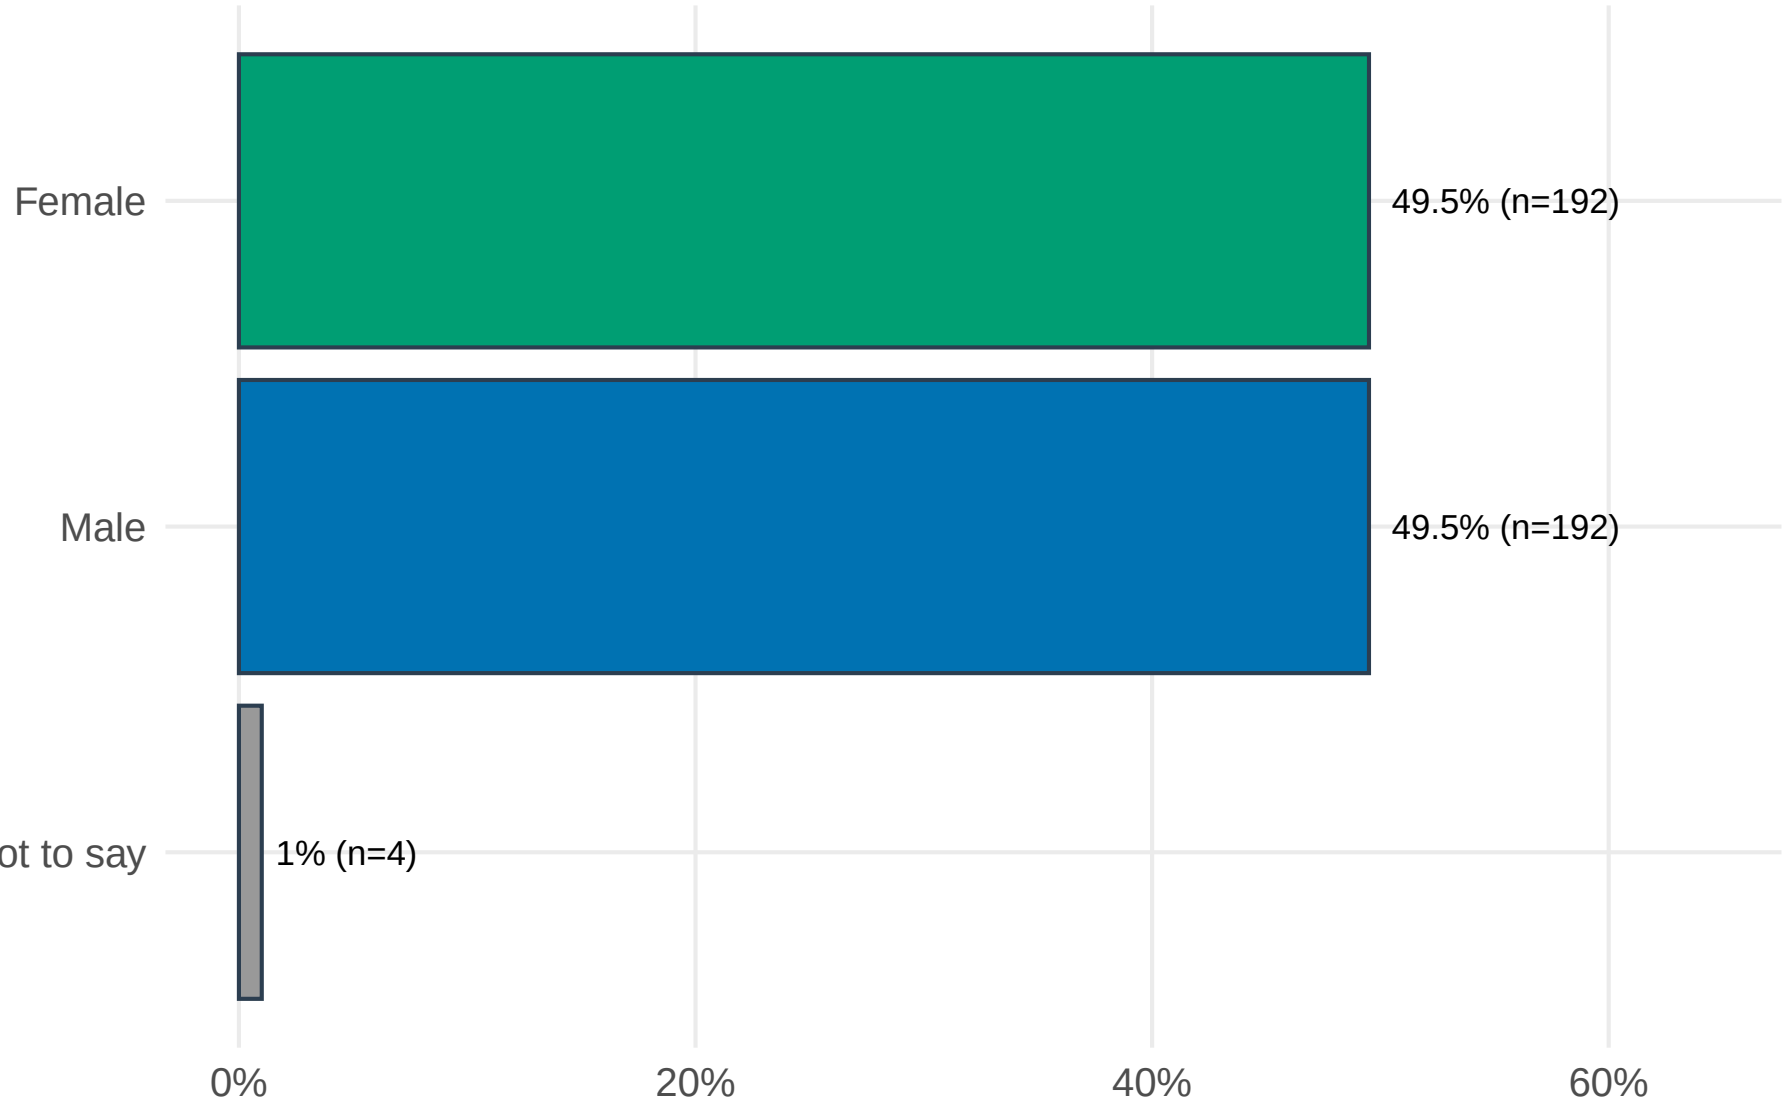

valid n = 388; missing n = 15; total n = 403

Number of participants

Percentage distribution of the sample by gender

valid n = 388; missing n = 15; total n = 403

Percentage of participants

Sample distribution by gender – ordered

valid n = 388; missing n = 15; total n = 403

Sample distribution by country

valid n = 396; missing n = 7; total n = 403

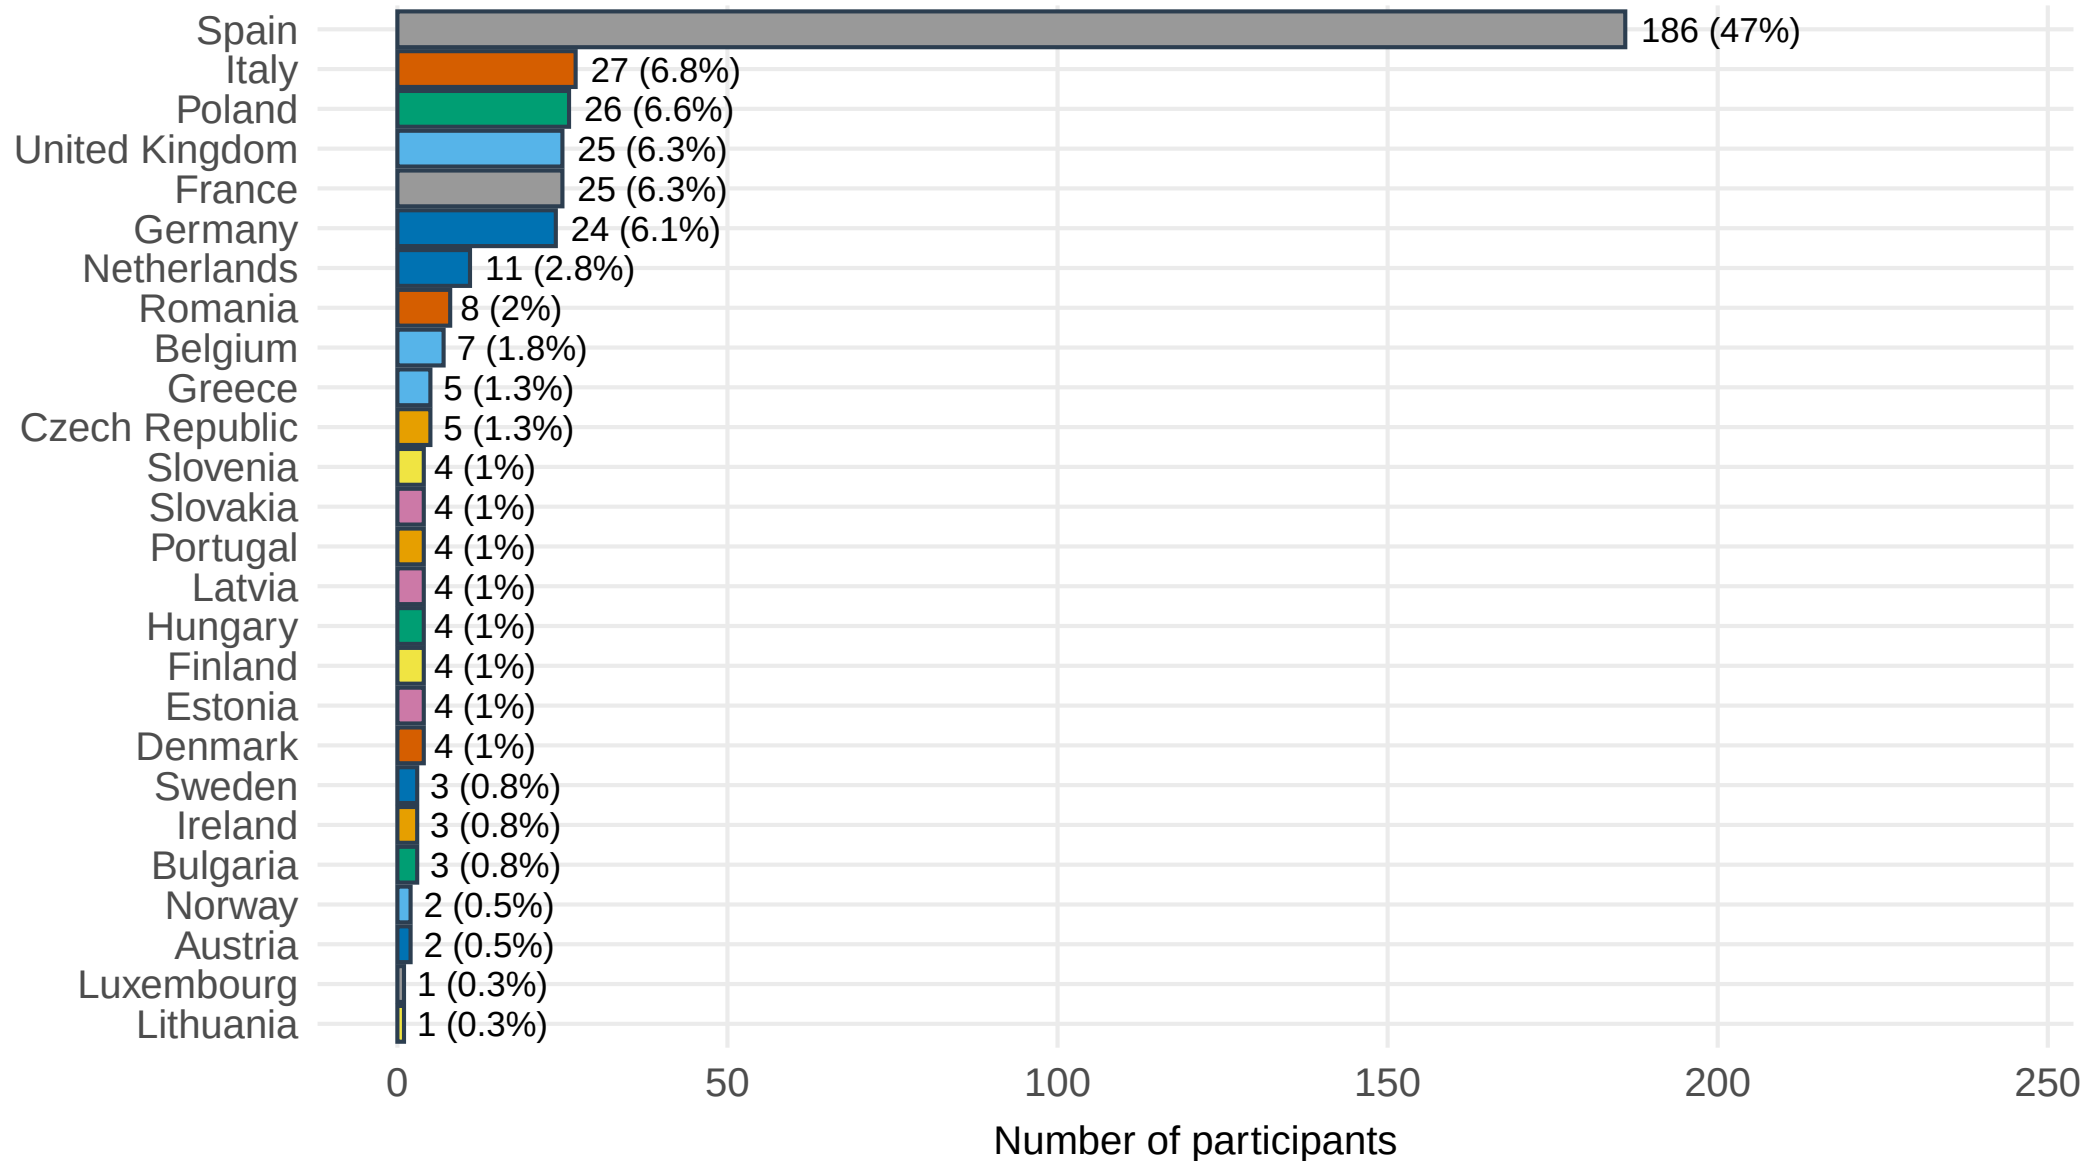

Percentage distribution of the sample by country

valid n = 396; missing n = 7; total n = 403

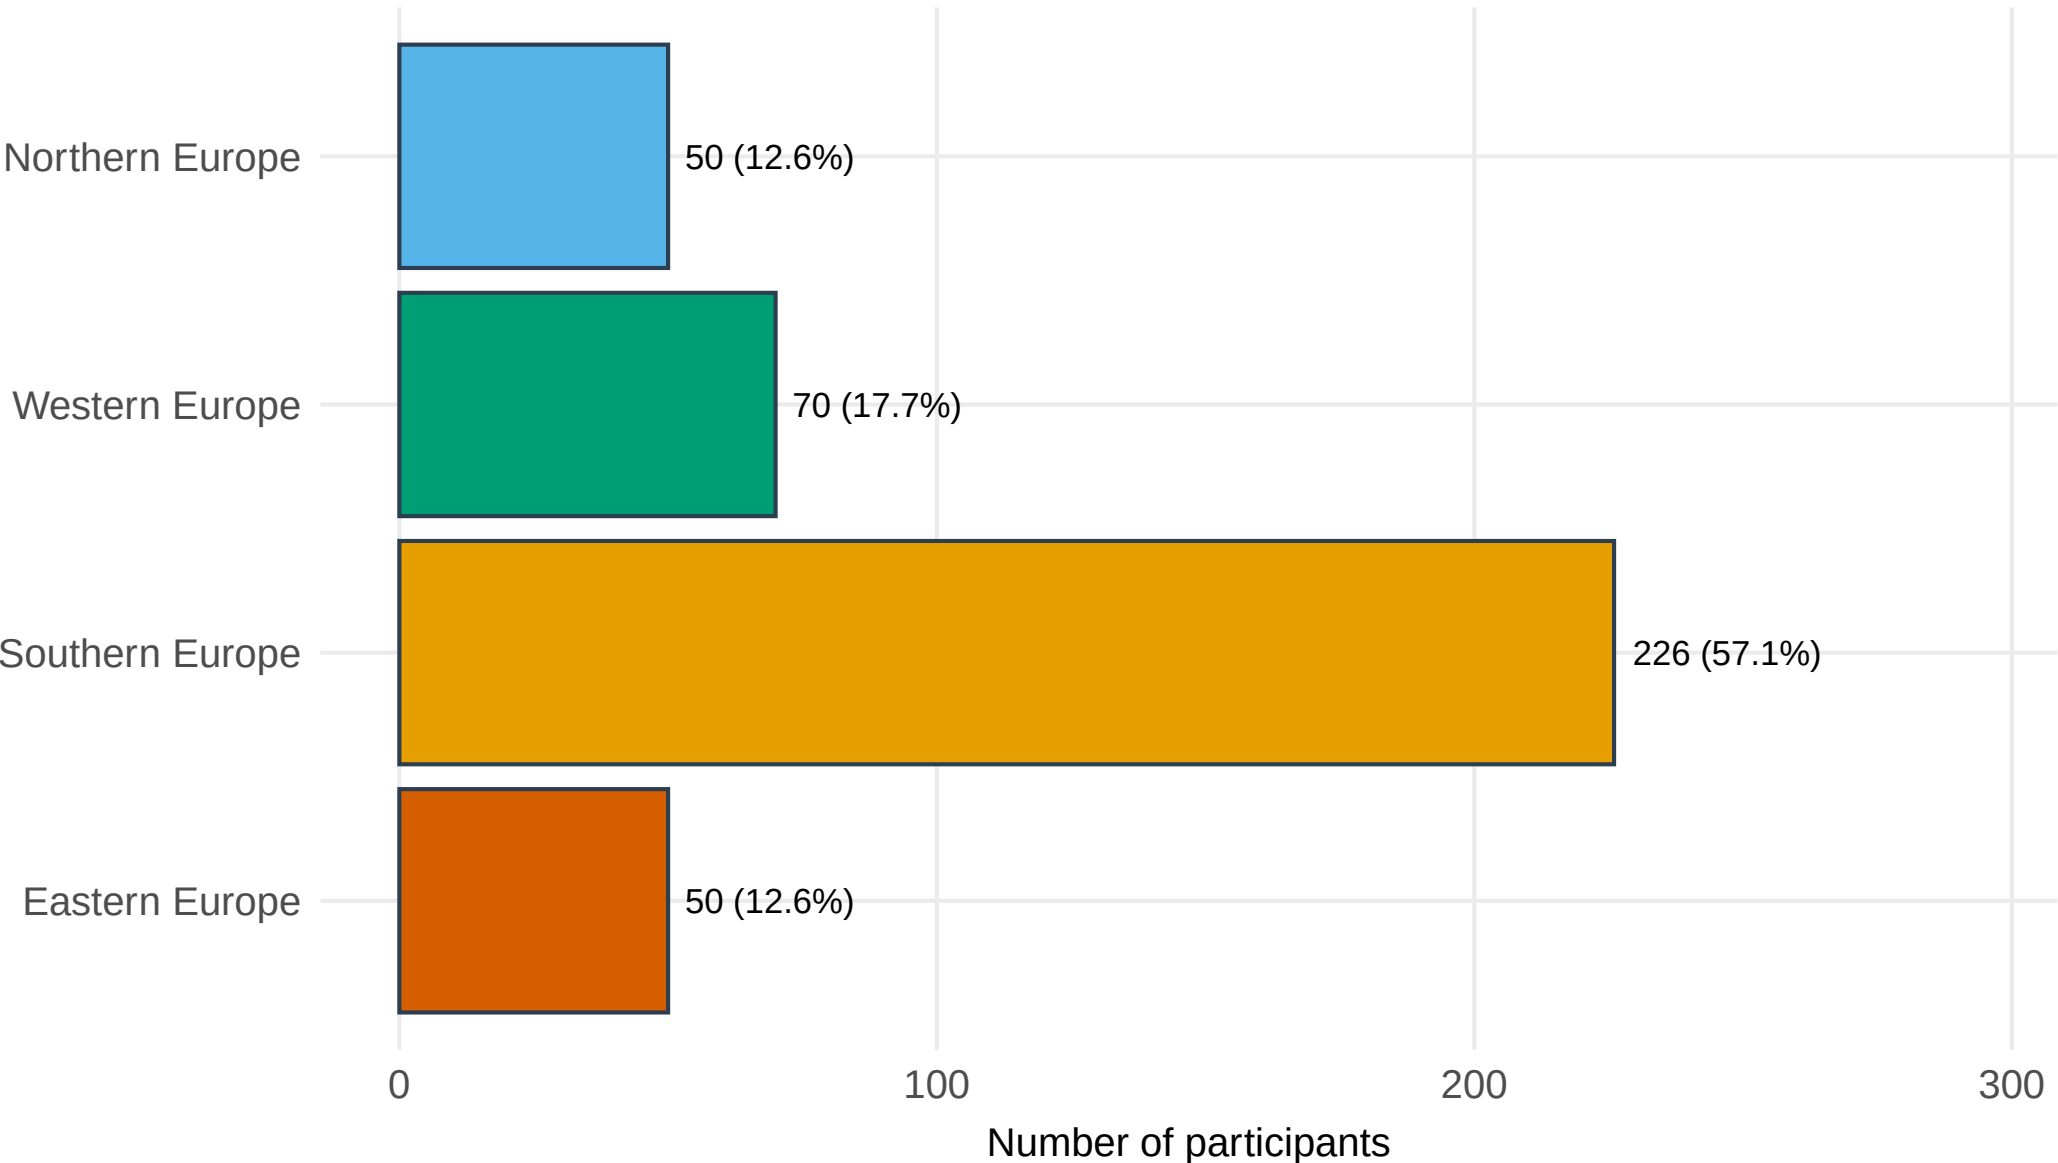

Sample distribution by country – ordered

valid n = 396; missing n = 7; total n = 403

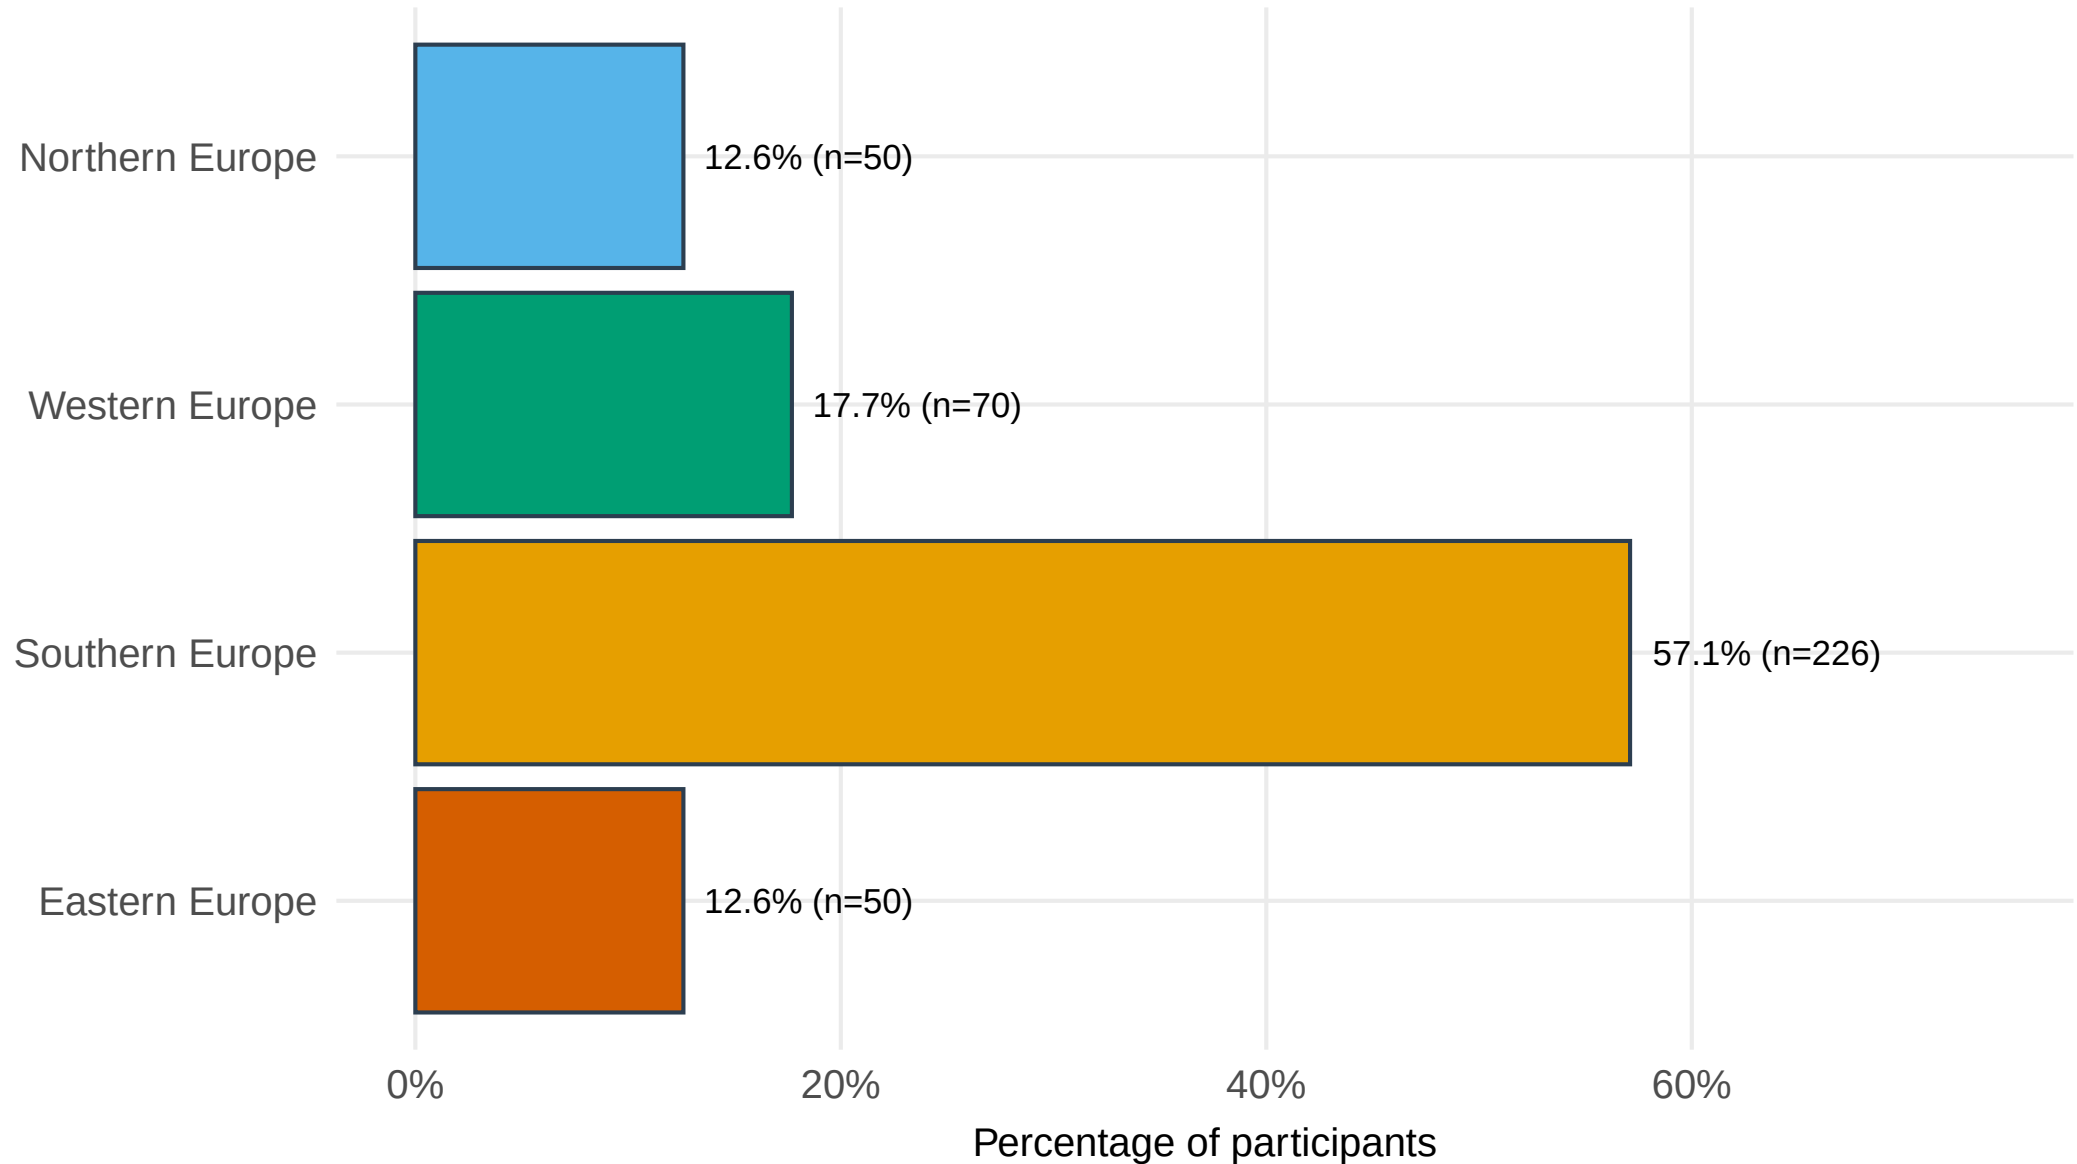

Sample distribution by european region

valid n = 396; missing n = 7; total n = 403

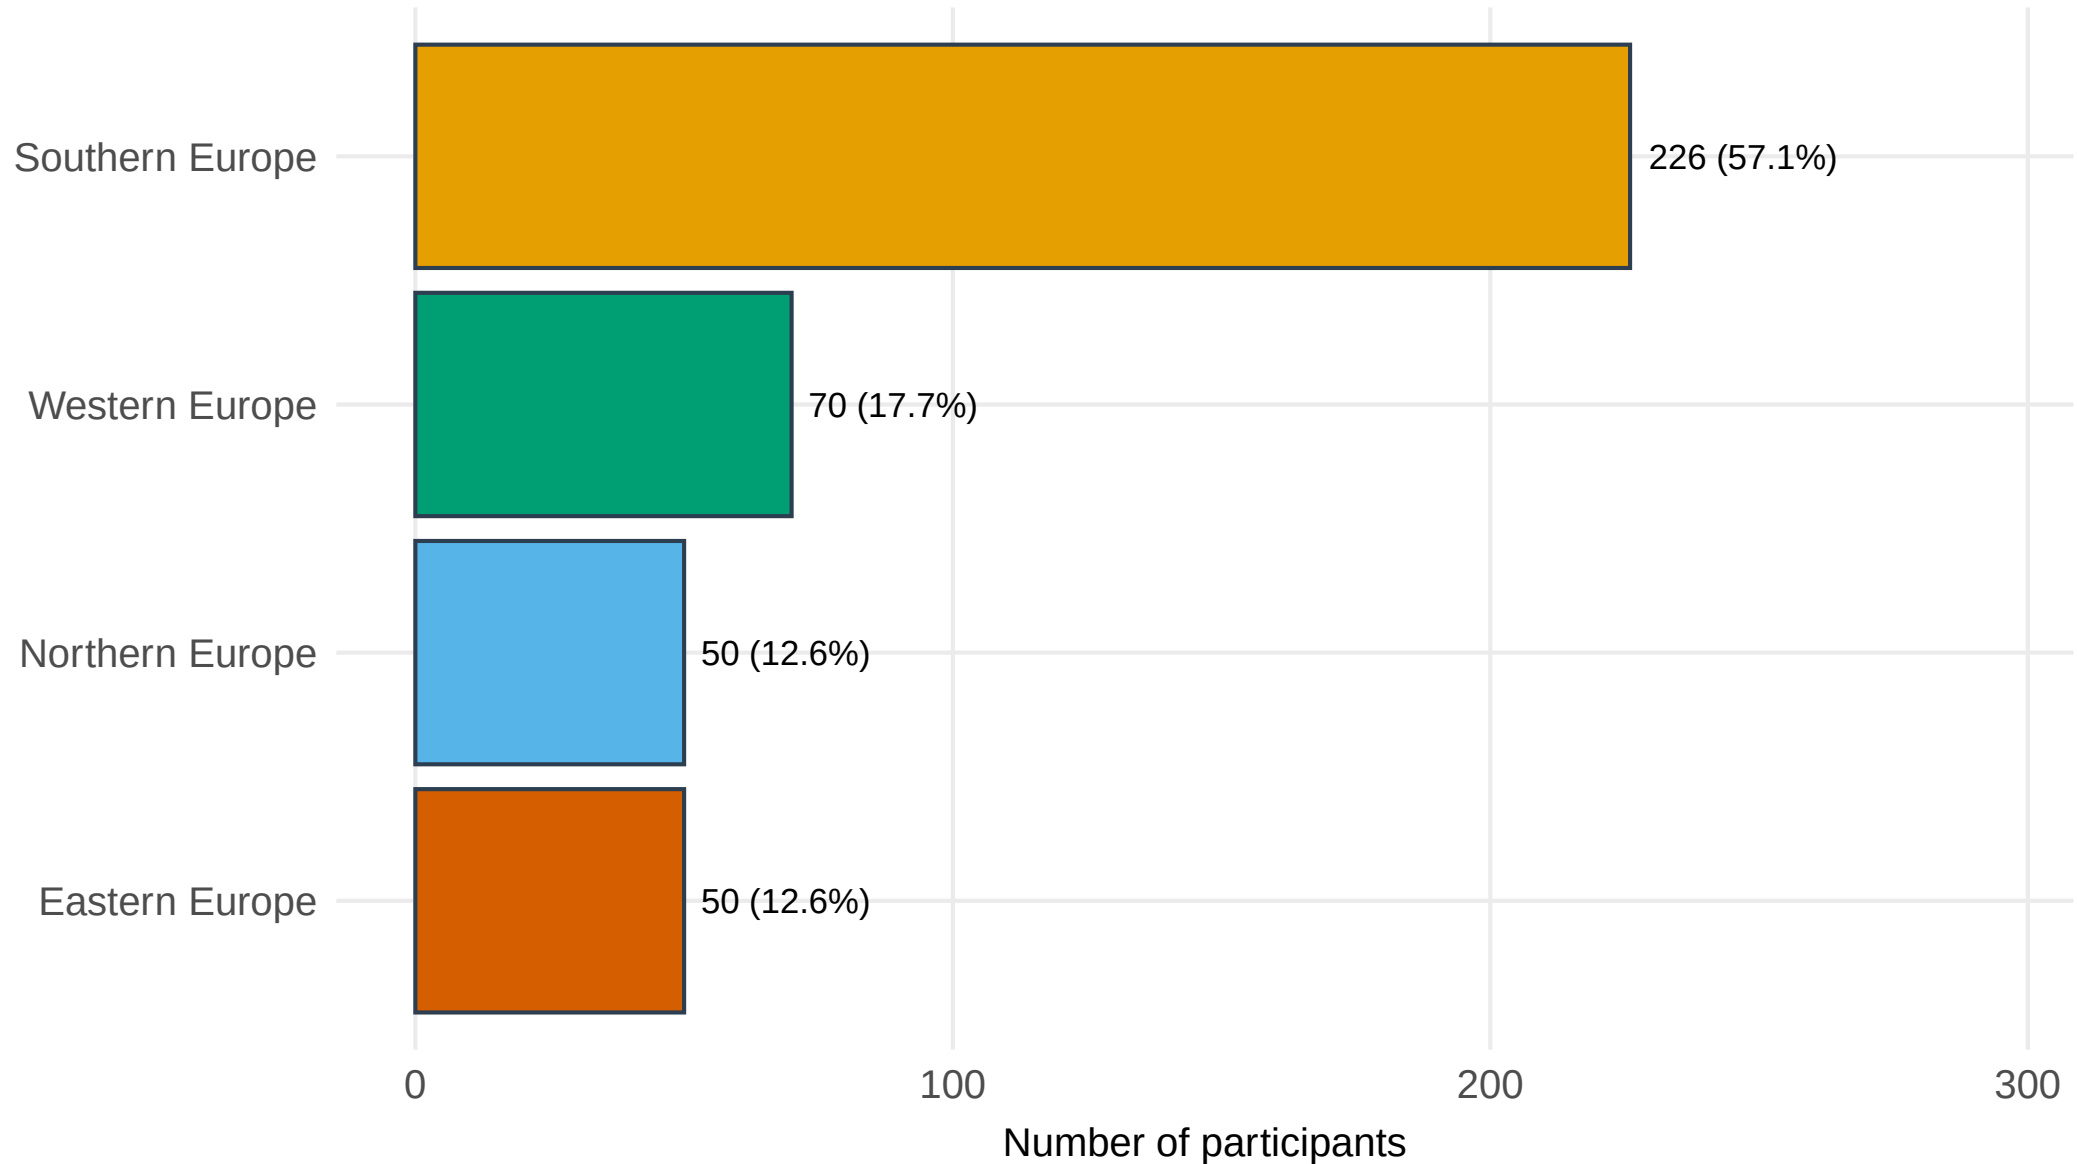

Percentage distribution of the sample by european region

valid n = 396; missing n = 7; total n = 403

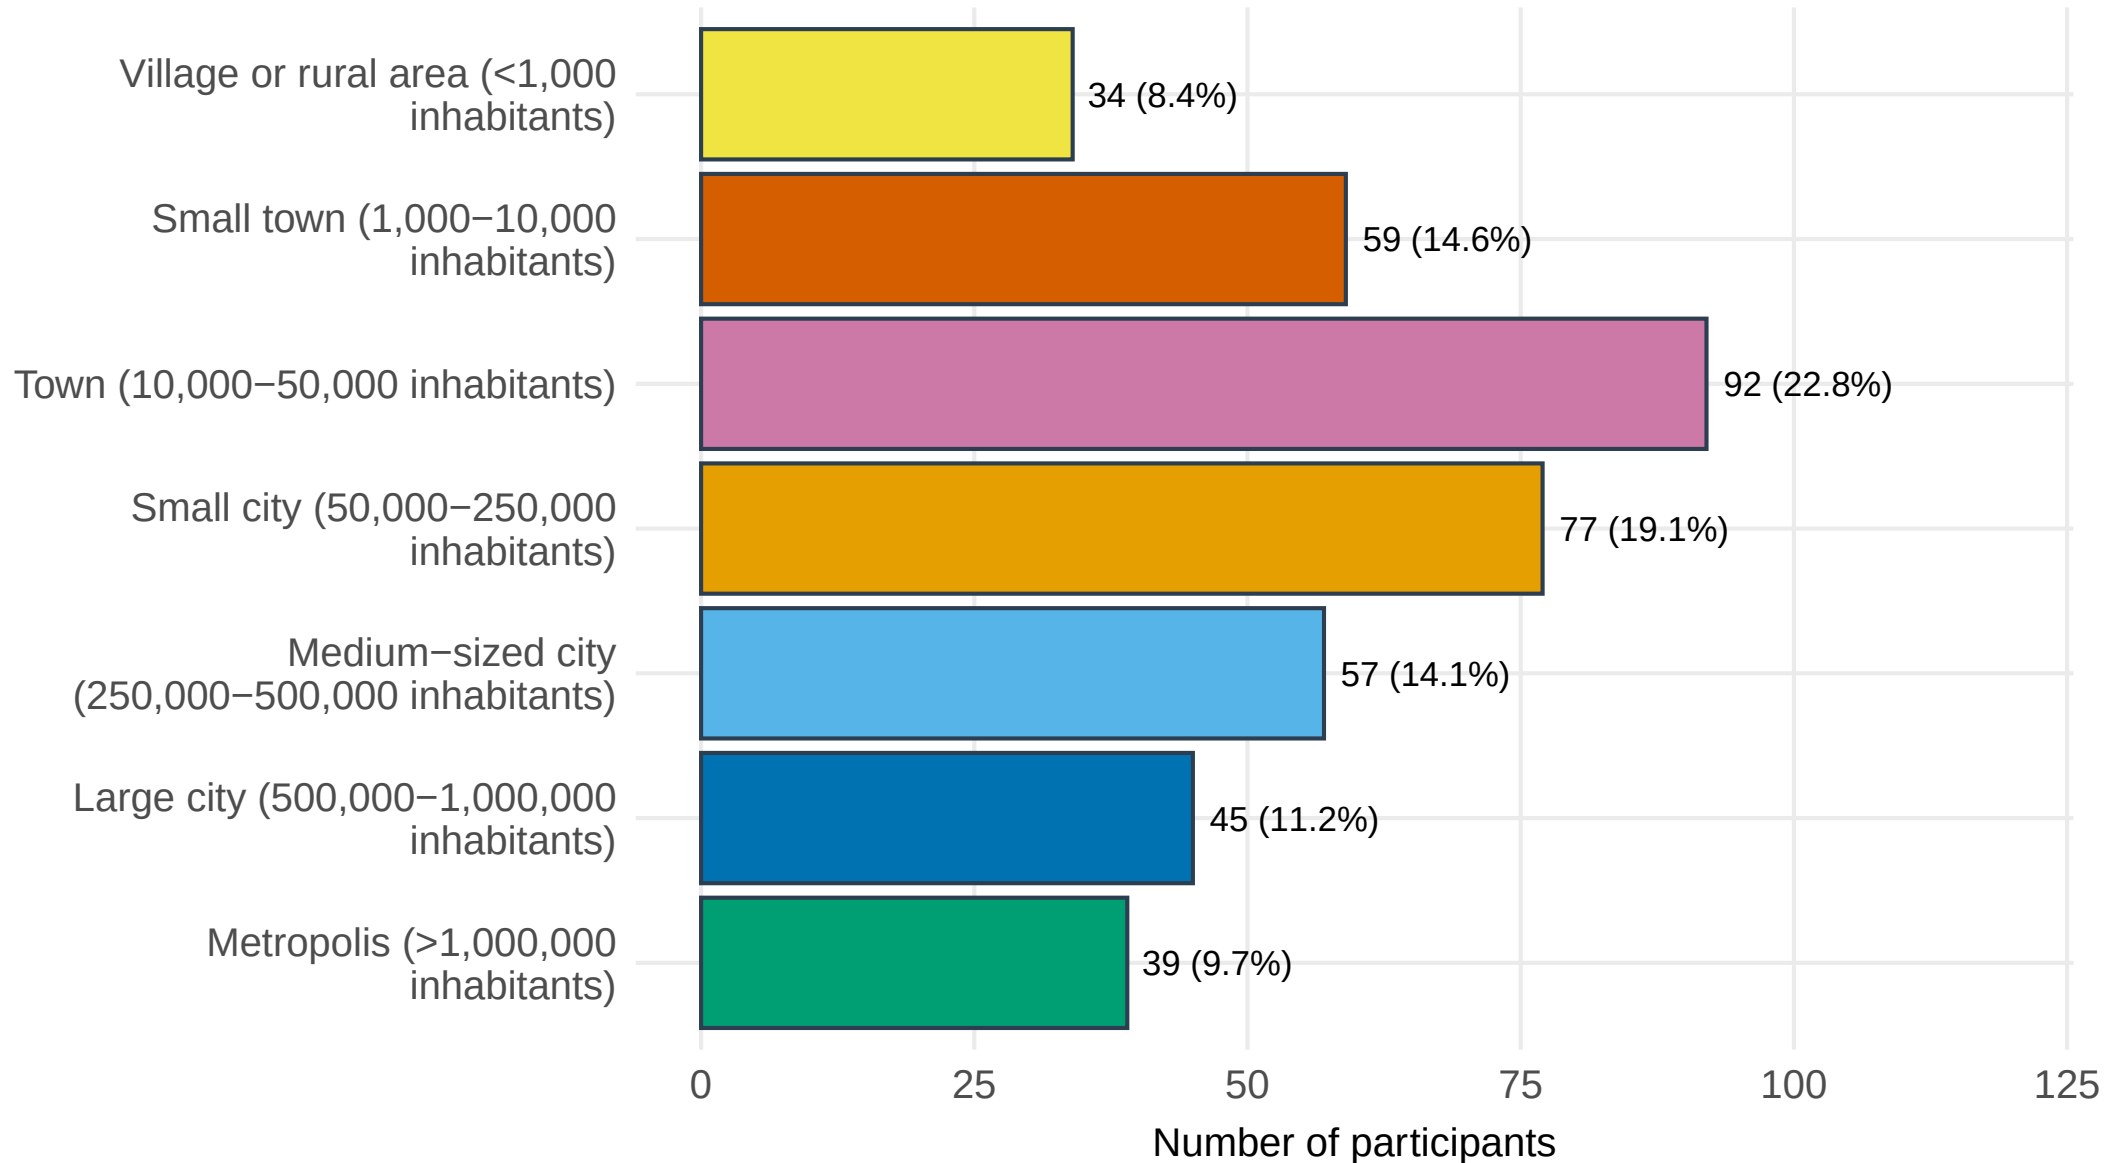

Sample distribution by european region – ordered

valid n = 396; missing n = 7; total n = 403

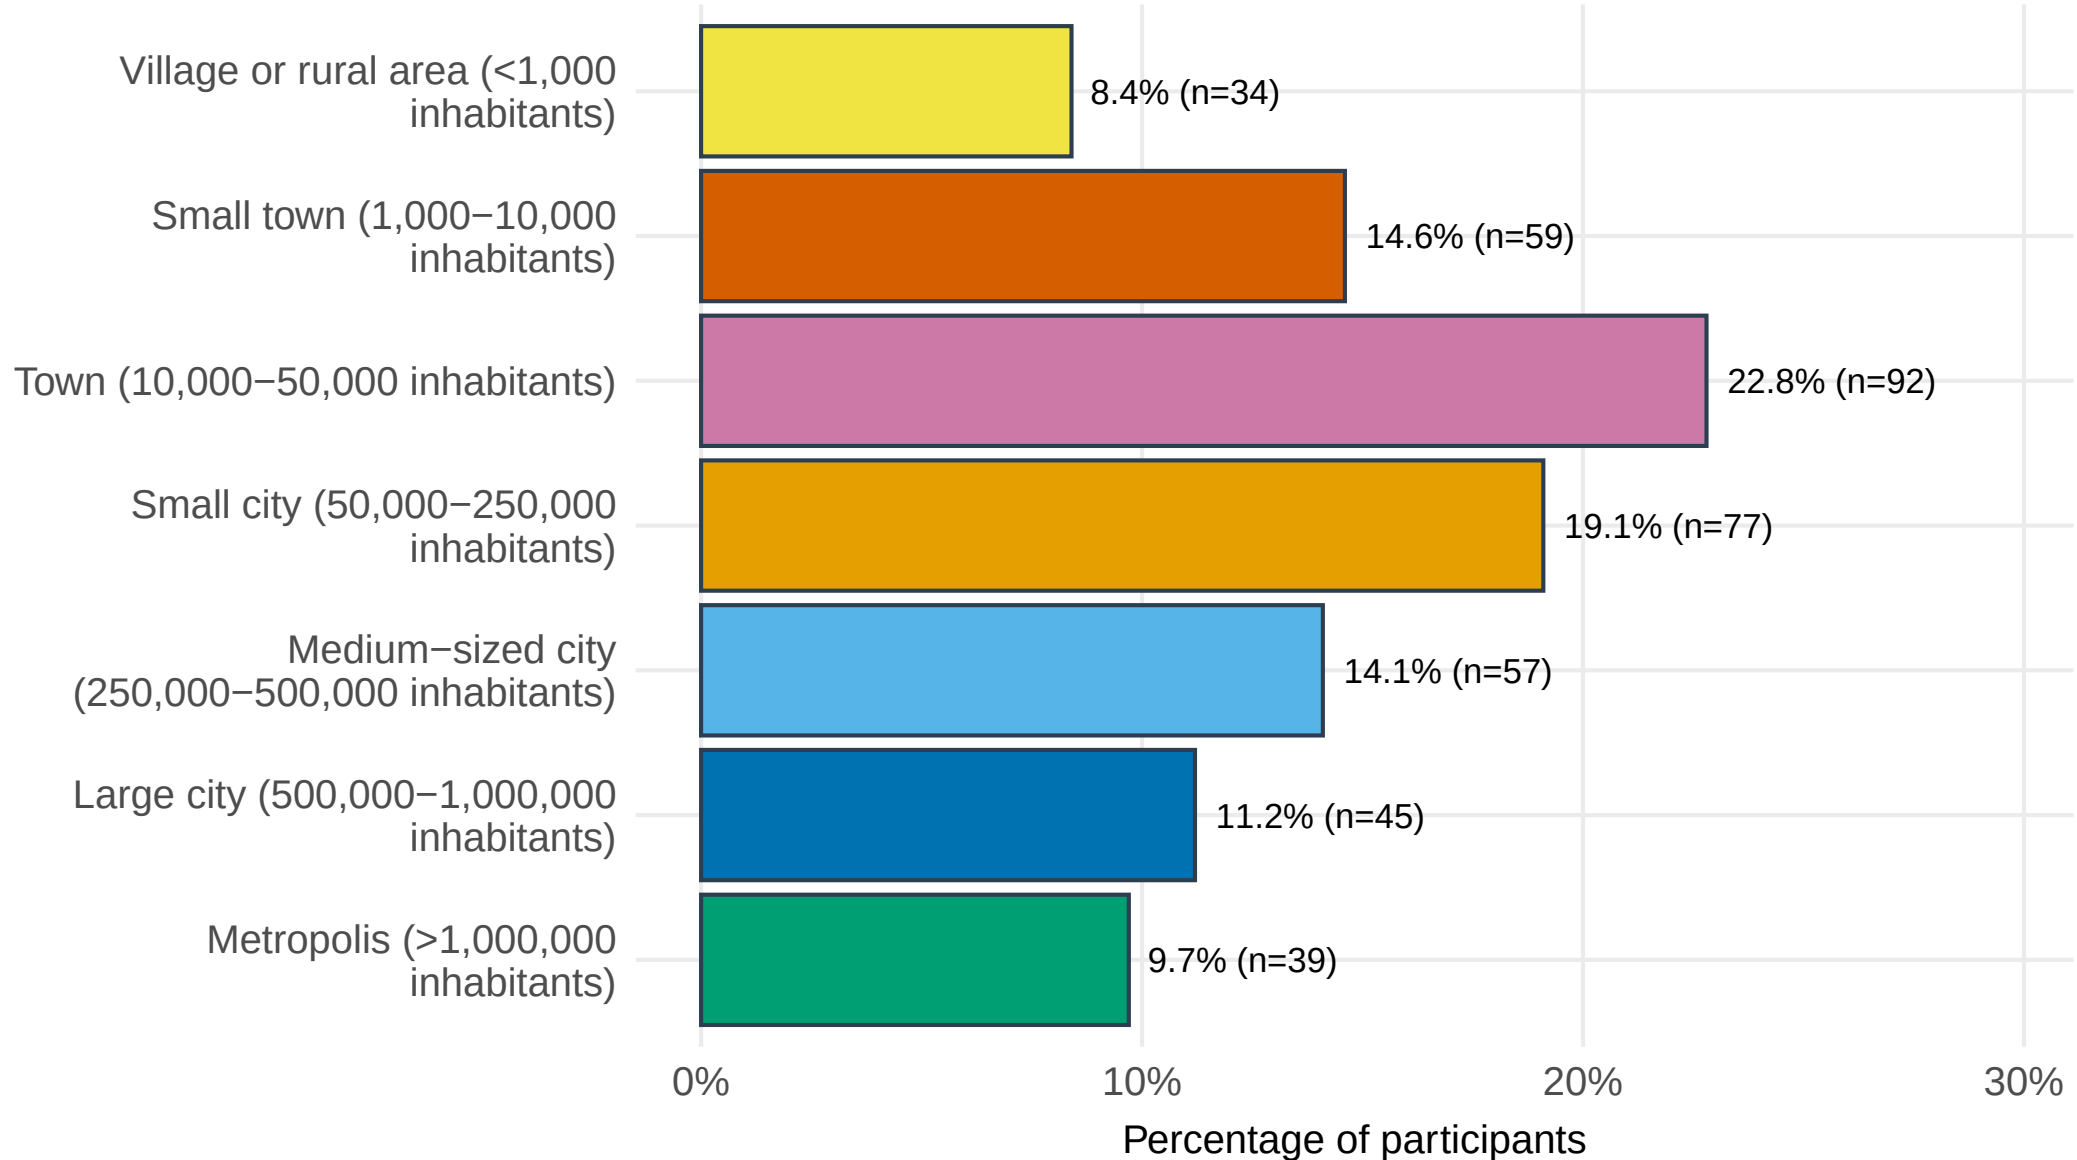

Sample distribution by city size

valid n = 403; missing n = 0; total n = 403

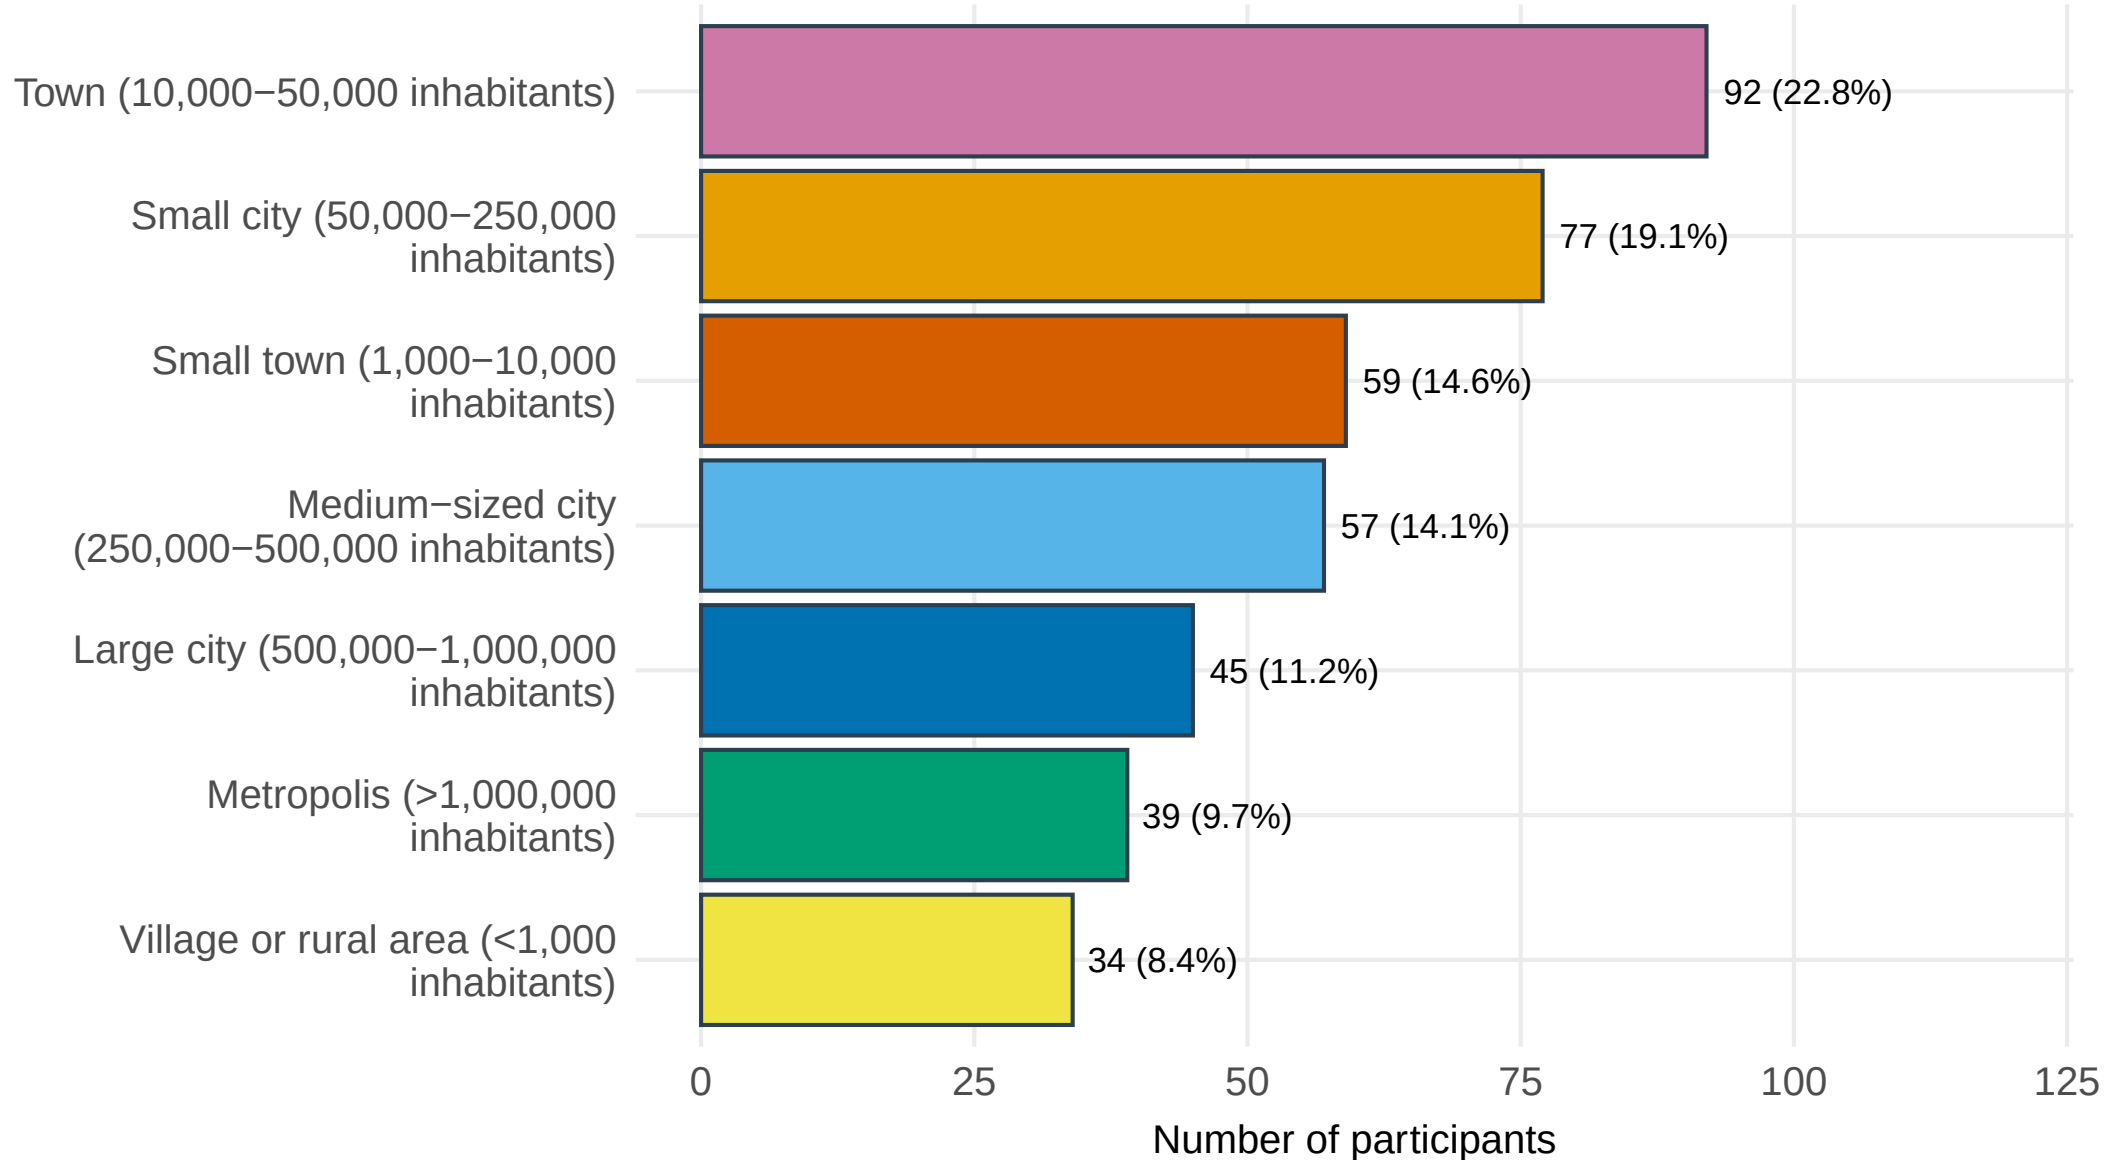

Percentage distribution of the sample by city size

valid n = 403; missing n = 0; total n = 403

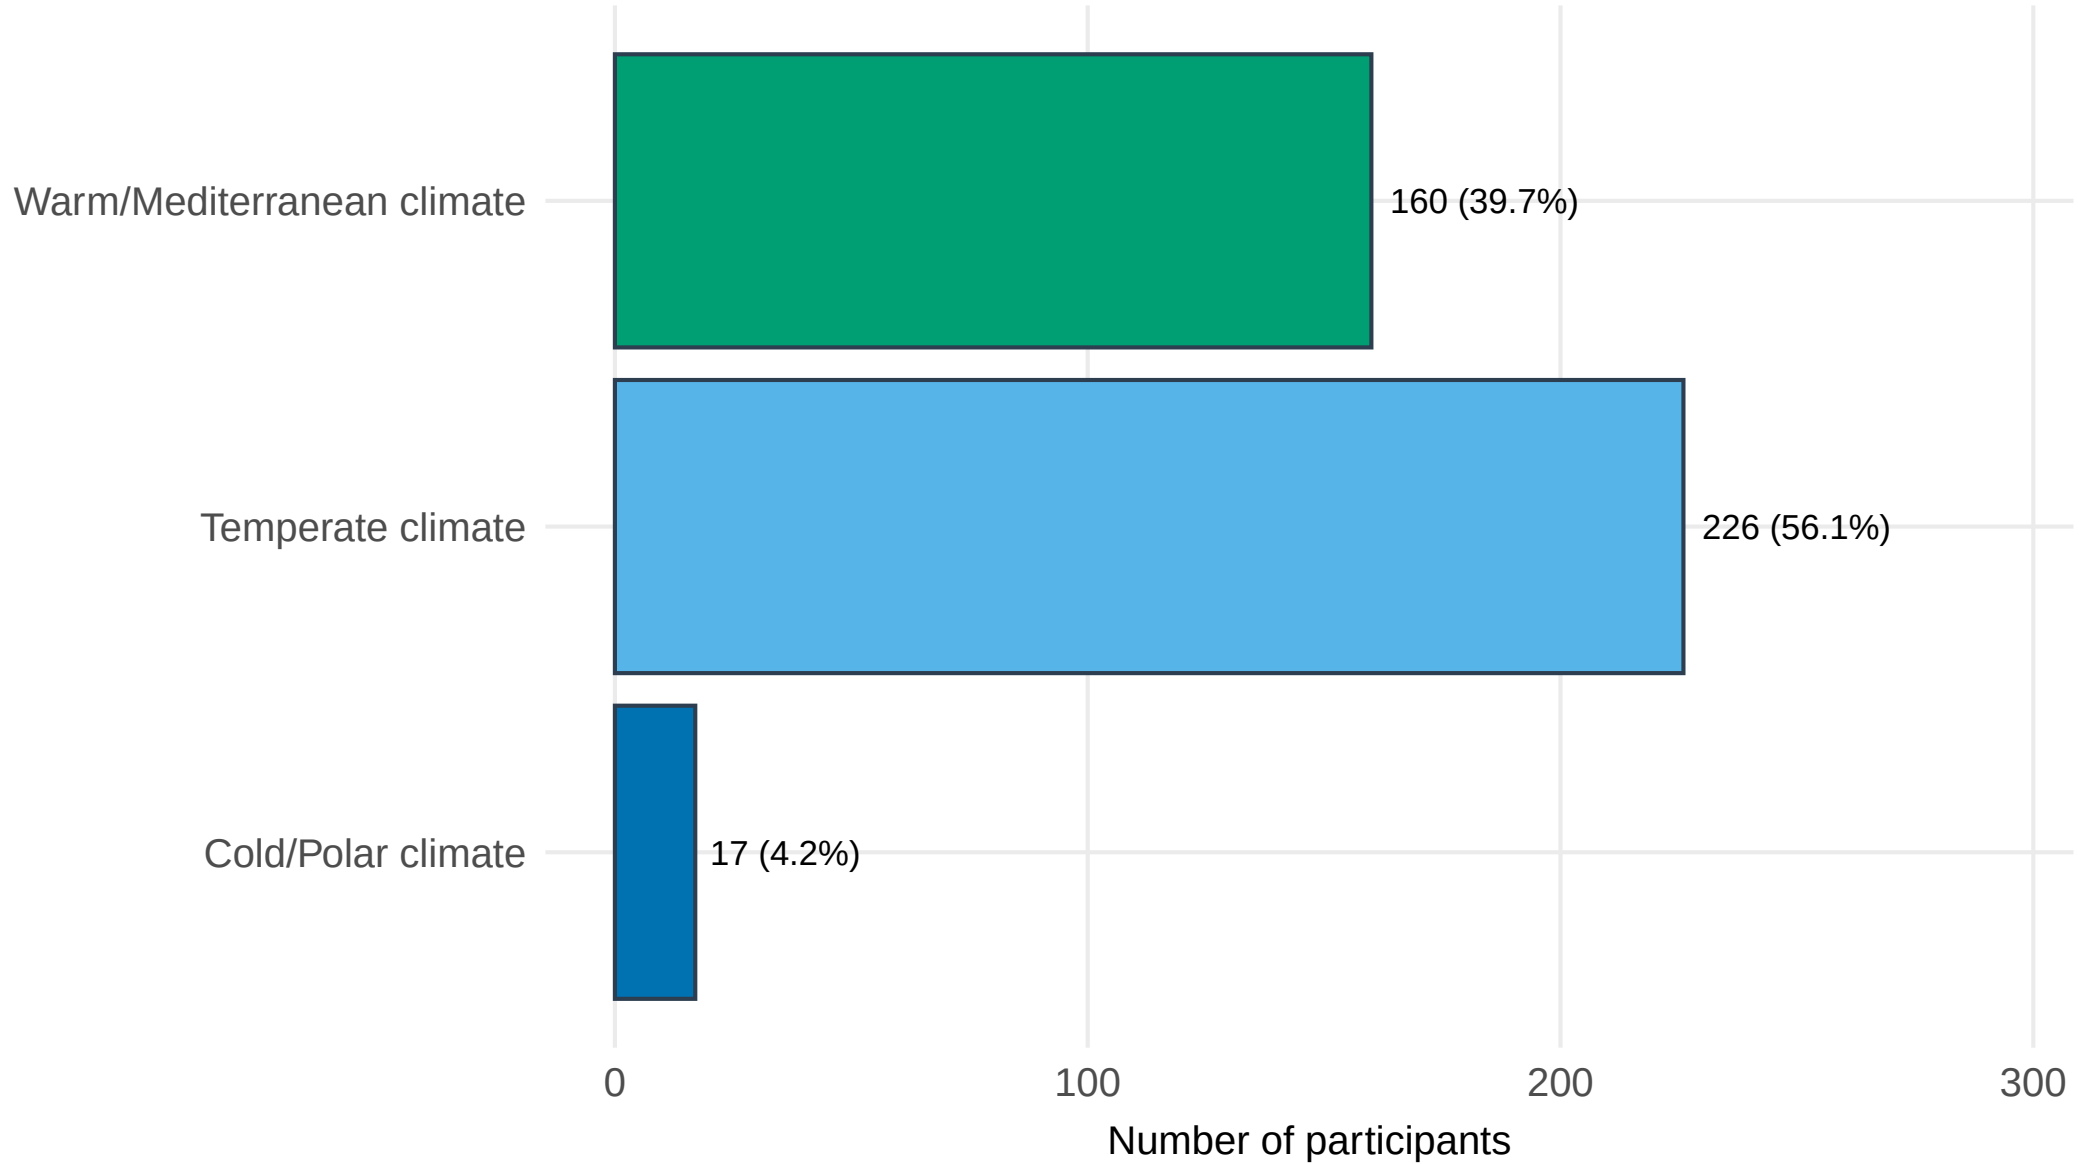

Sample distribution by city size – ordered

valid n = 403; missing n = 0; total n = 403

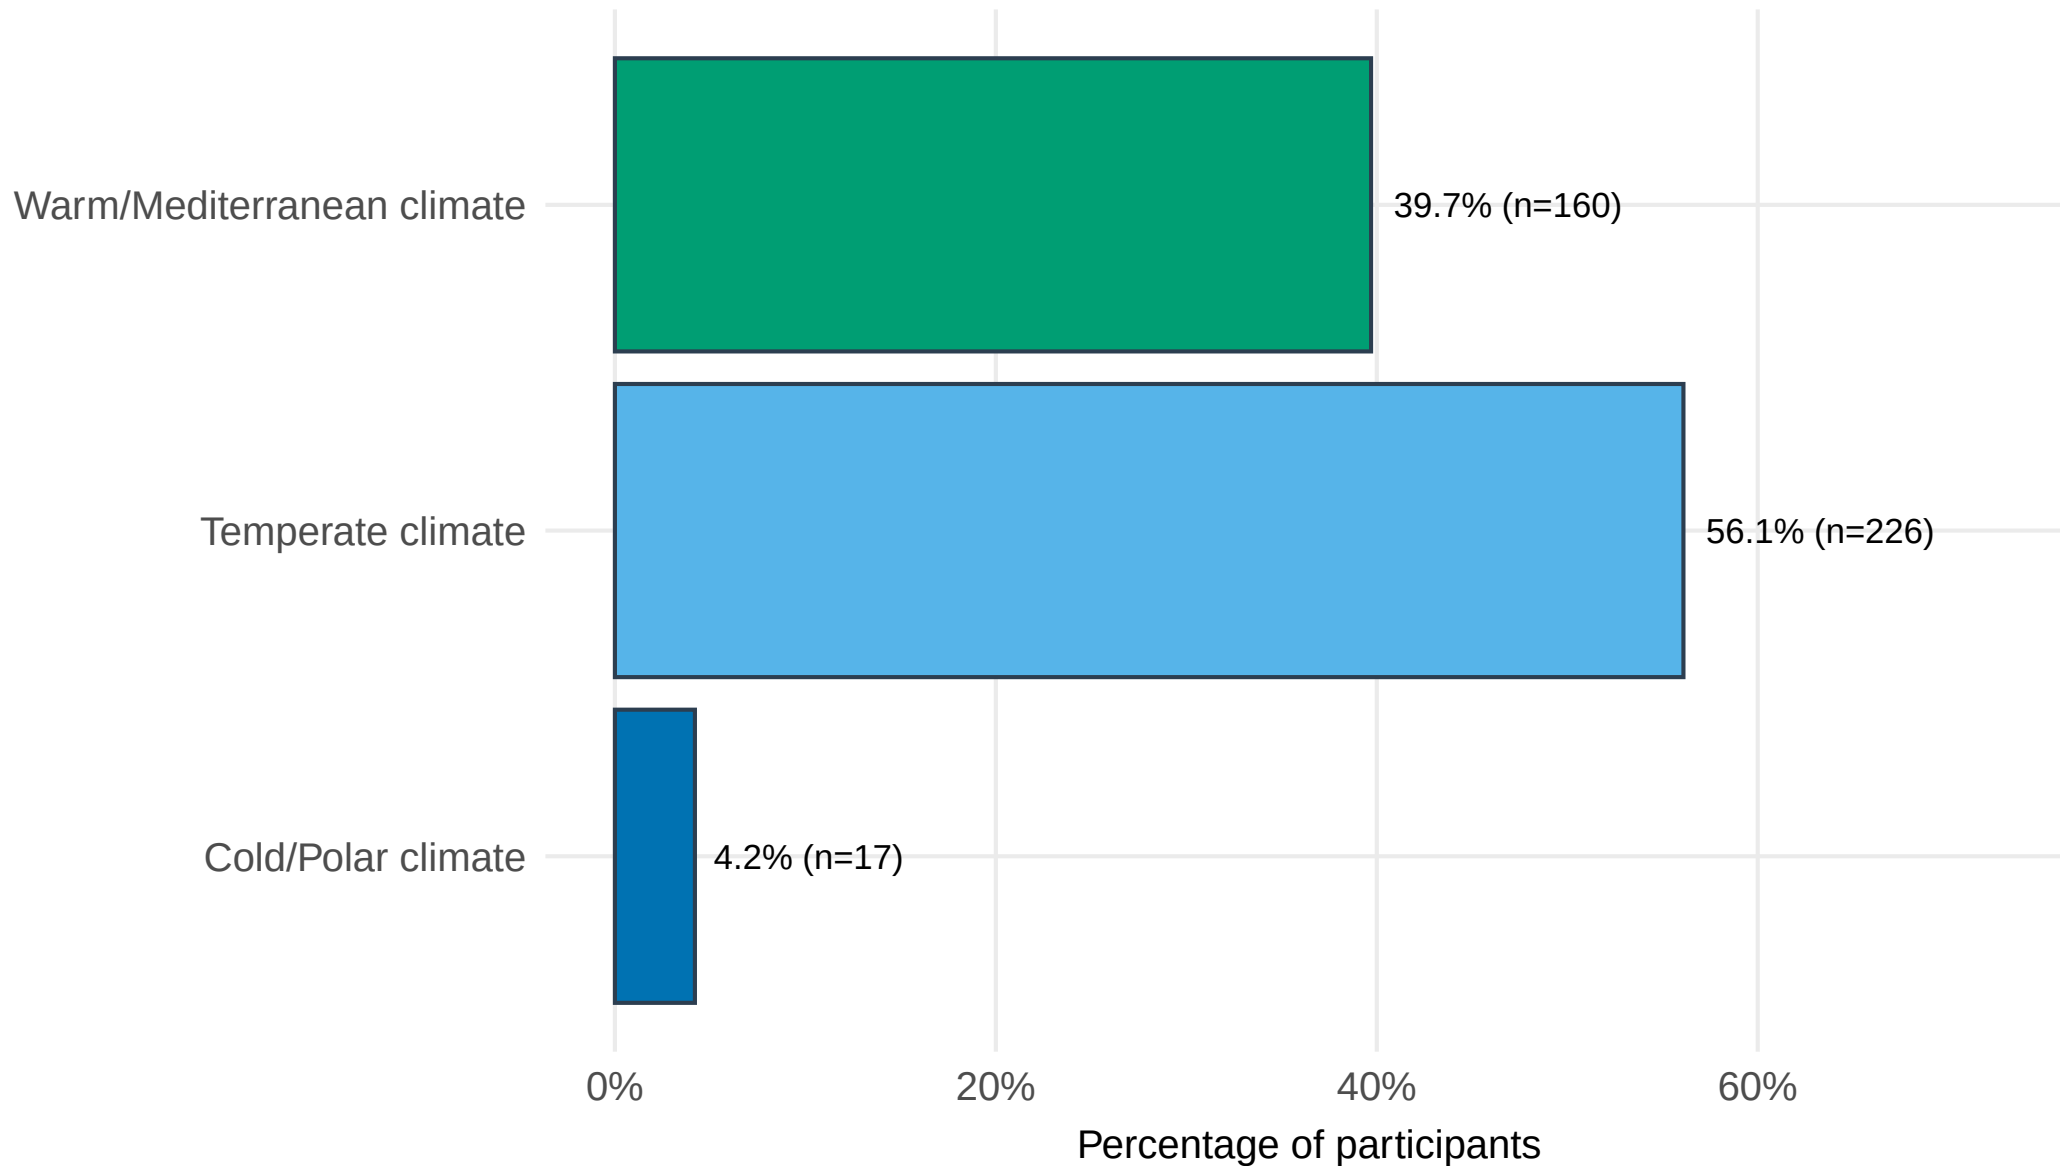

Sample distribution by climate zone

valid n = 403; missing n = 0; total n = 403

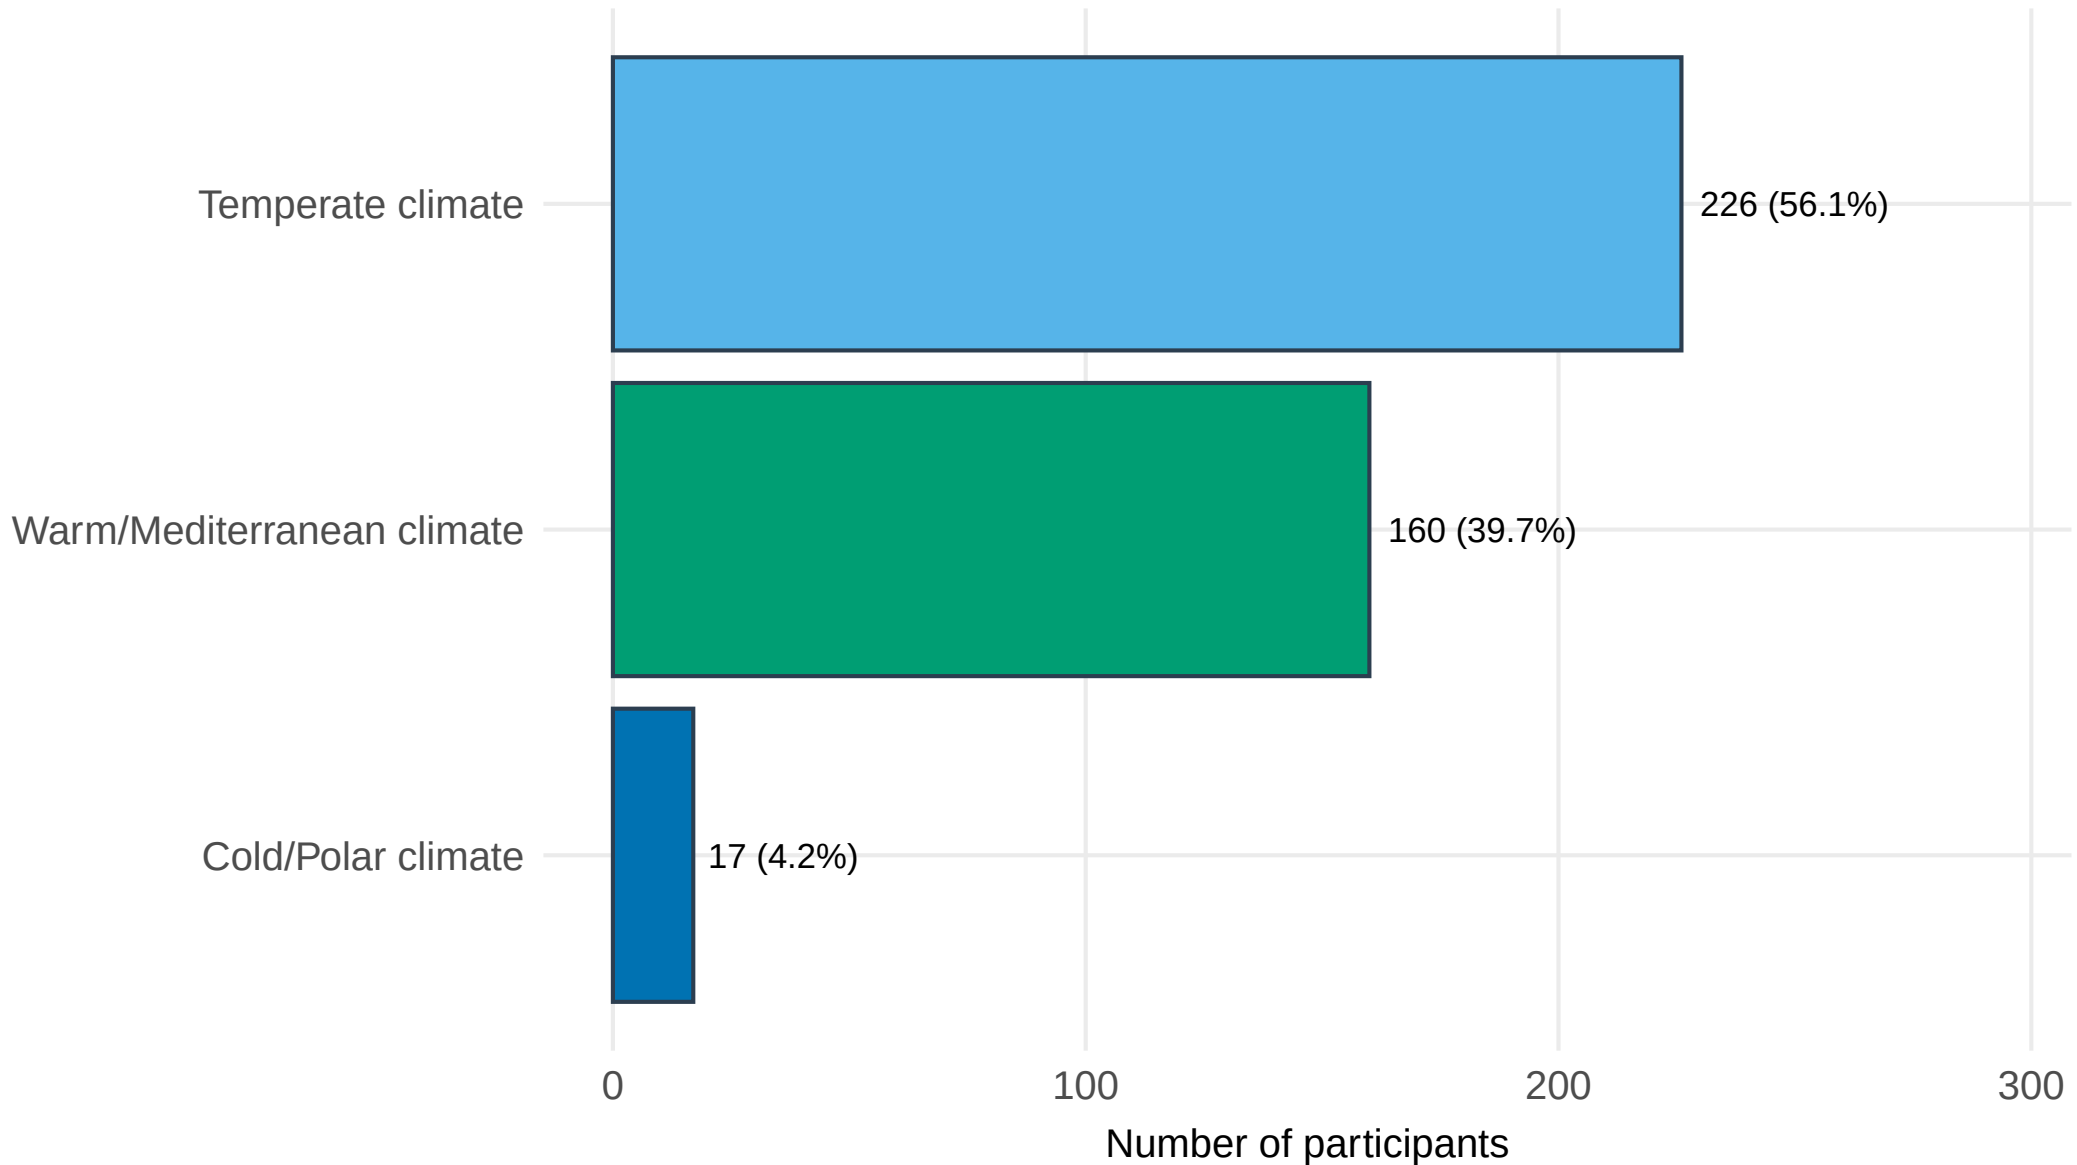

Percentage distribution of the sample by climate zone

valid n = 403; missing n = 0; total n = 403

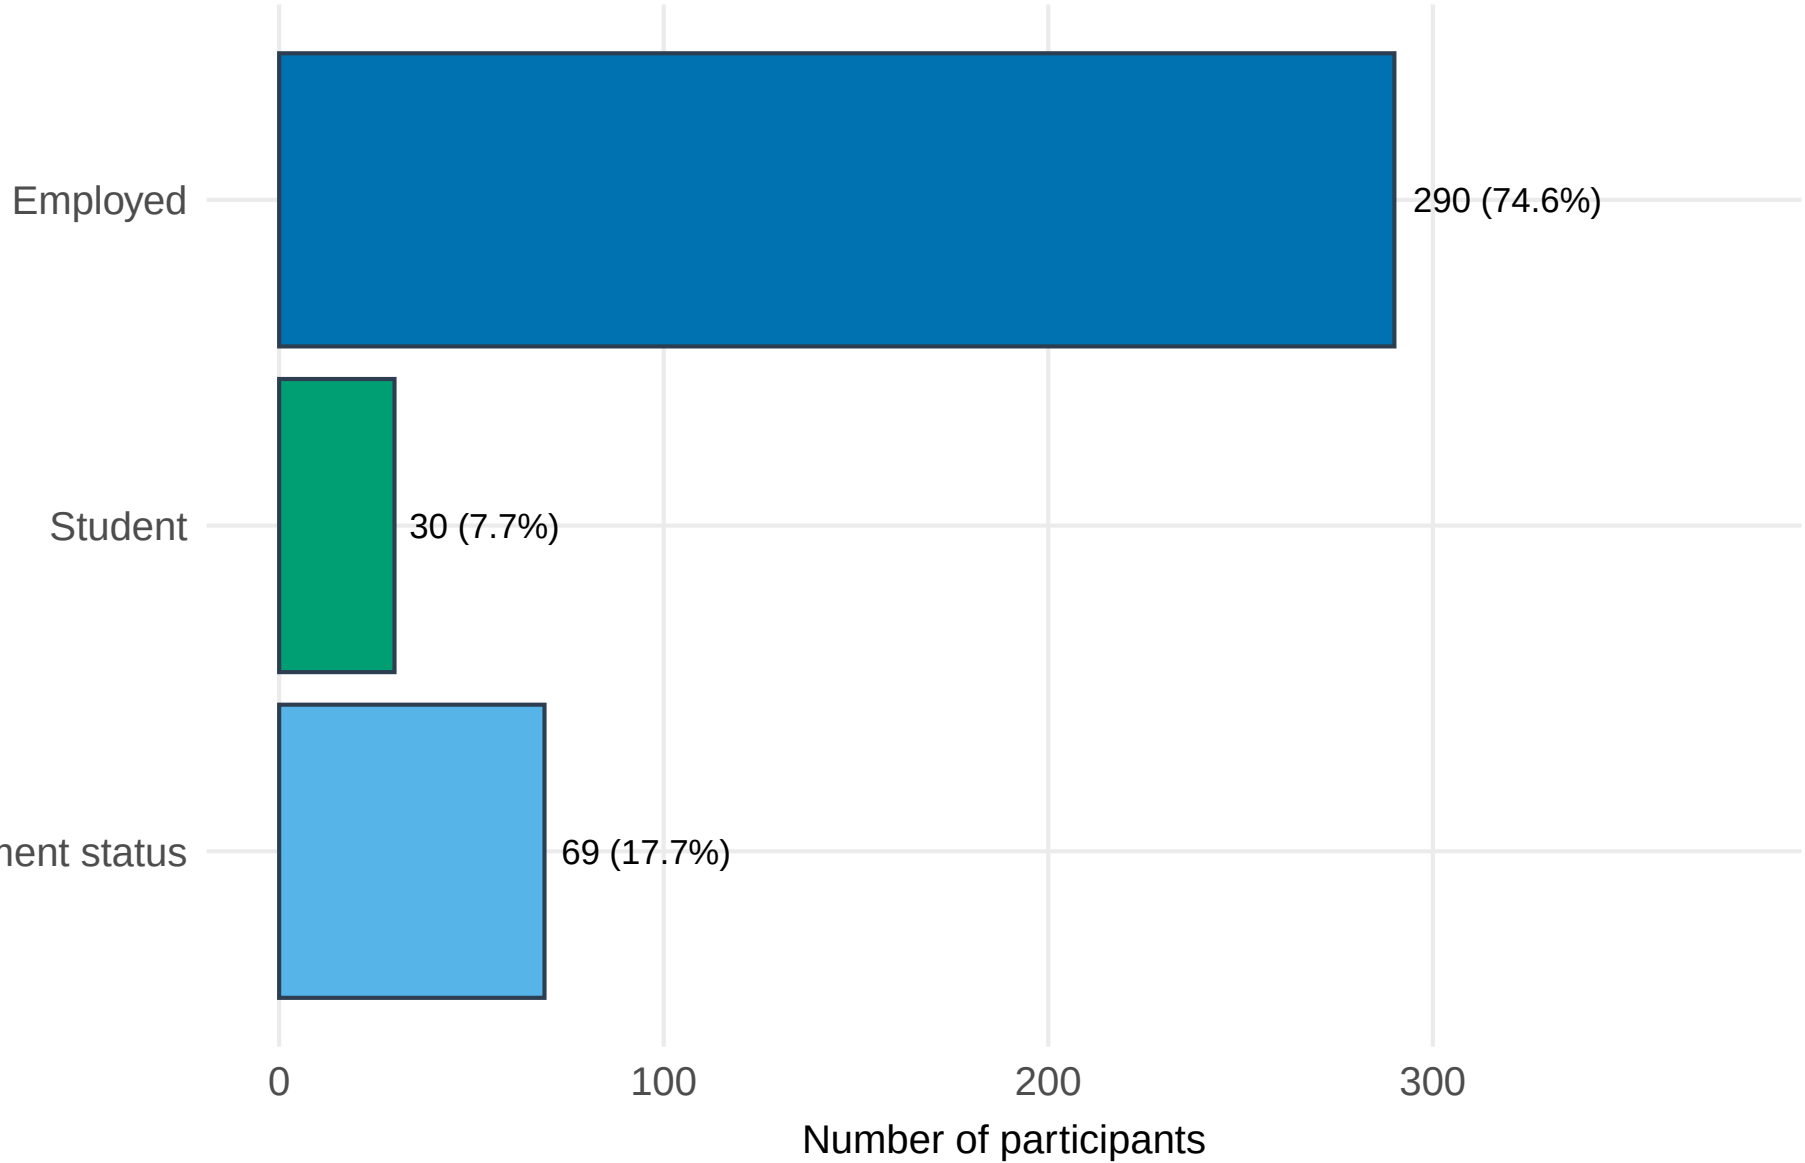

Sample distribution by climate zone – ordered

valid n = 403; missing n = 0; total n = 403

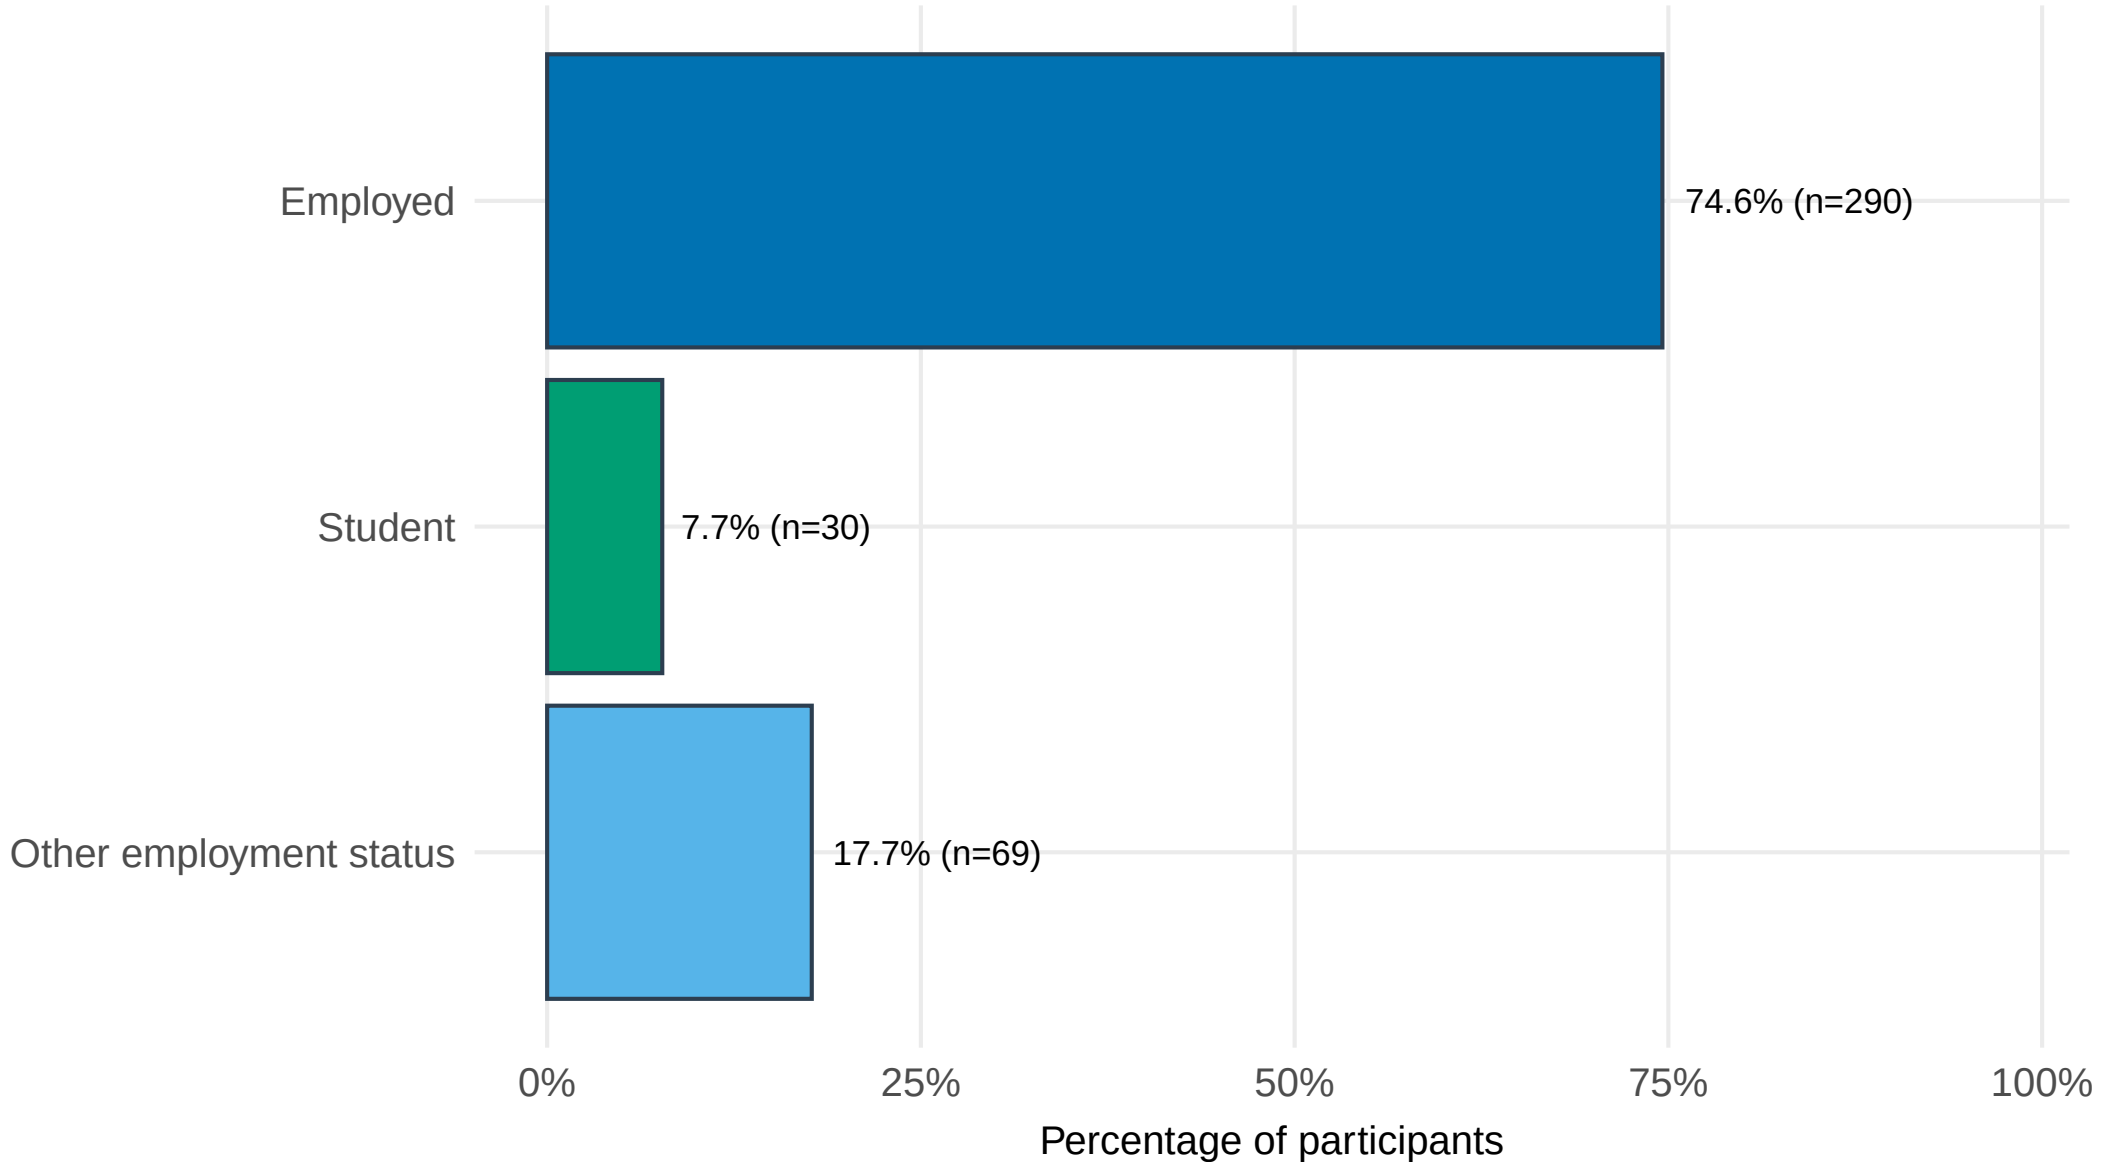

Sample distribution by employment status

valid n = 389; missing n = 14; total n = 403

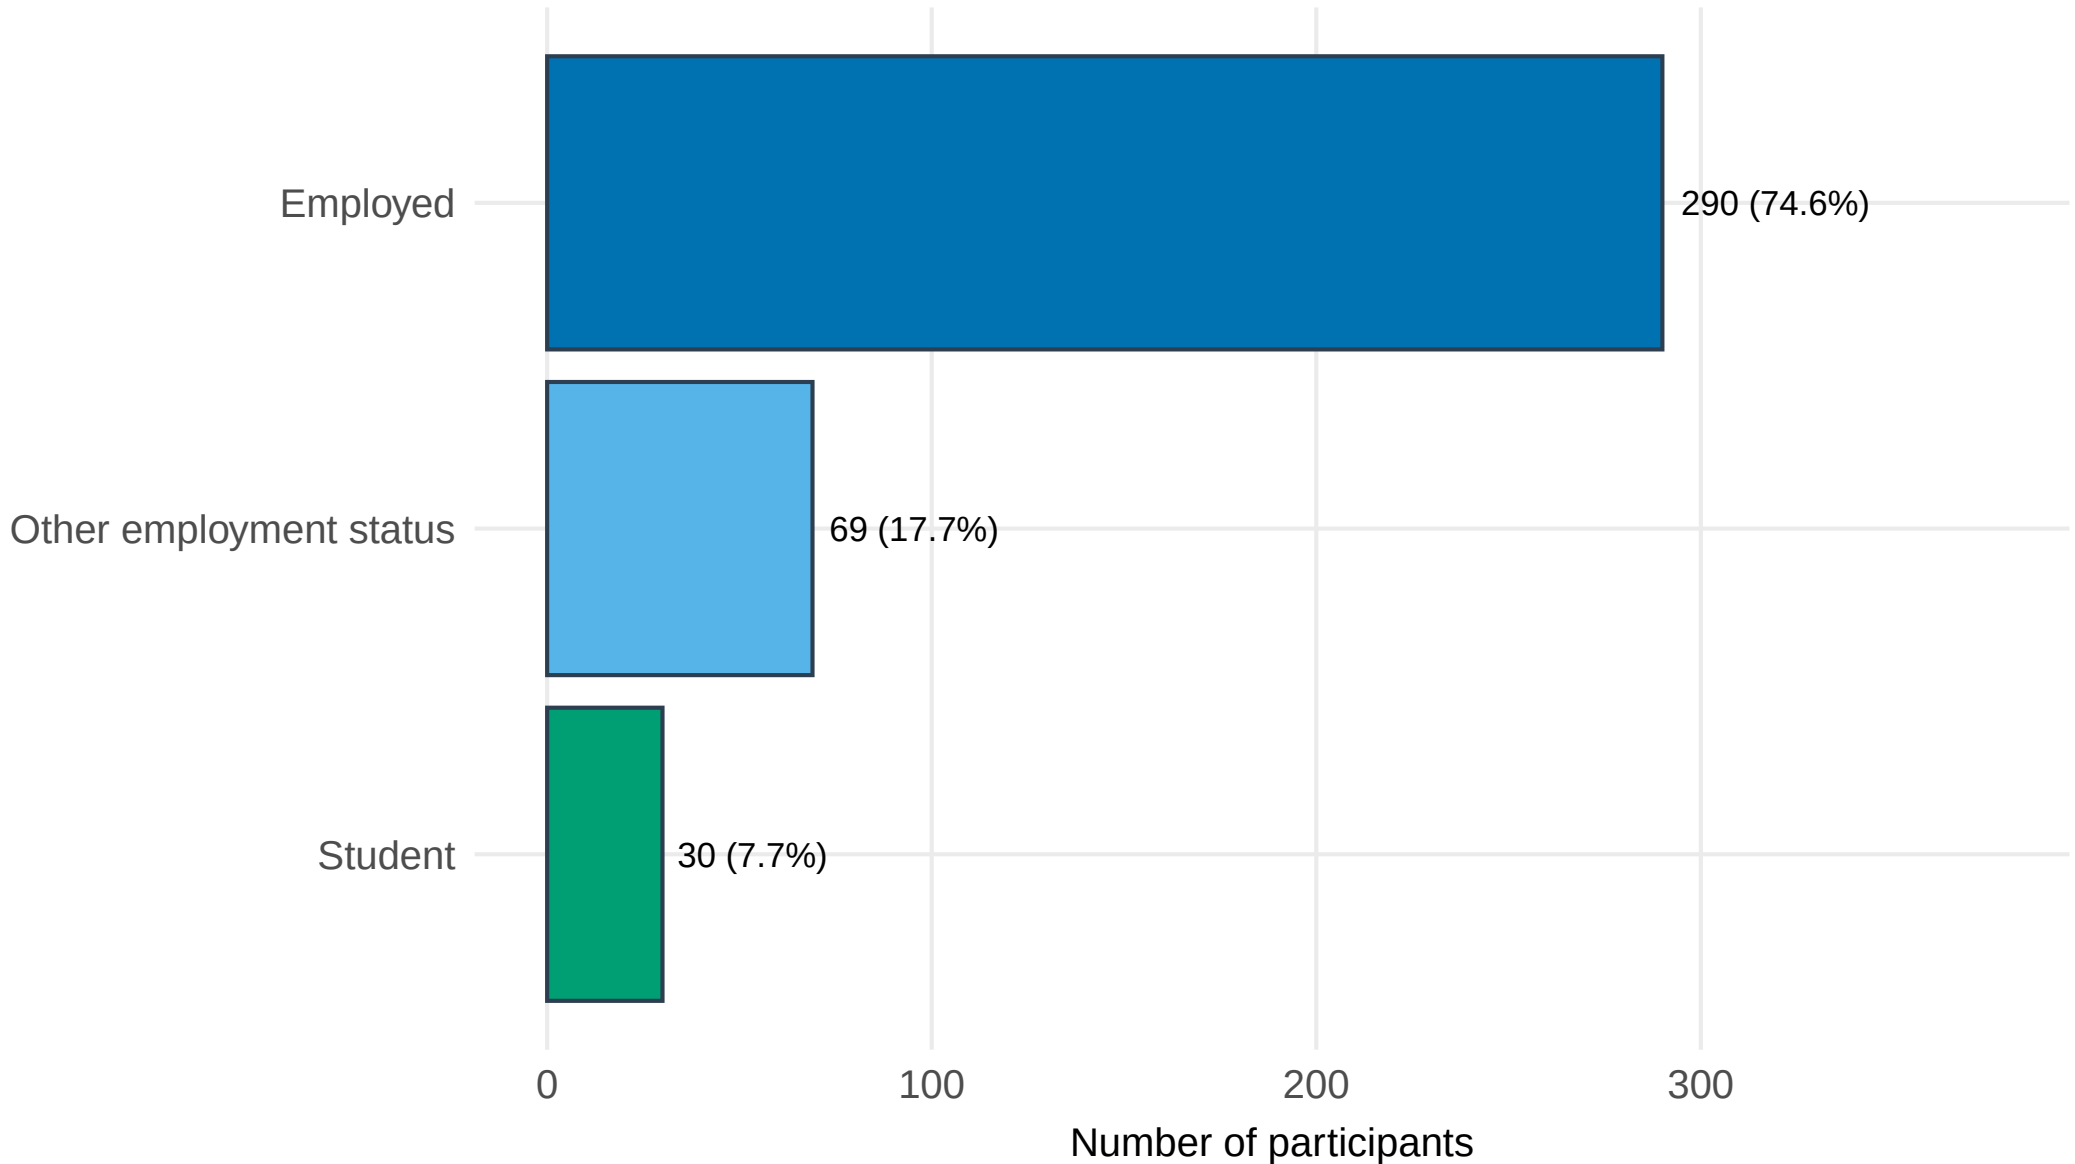

Percentage distribution of the sample by employment status

valid n = 389; missing n = 14; total n = 403

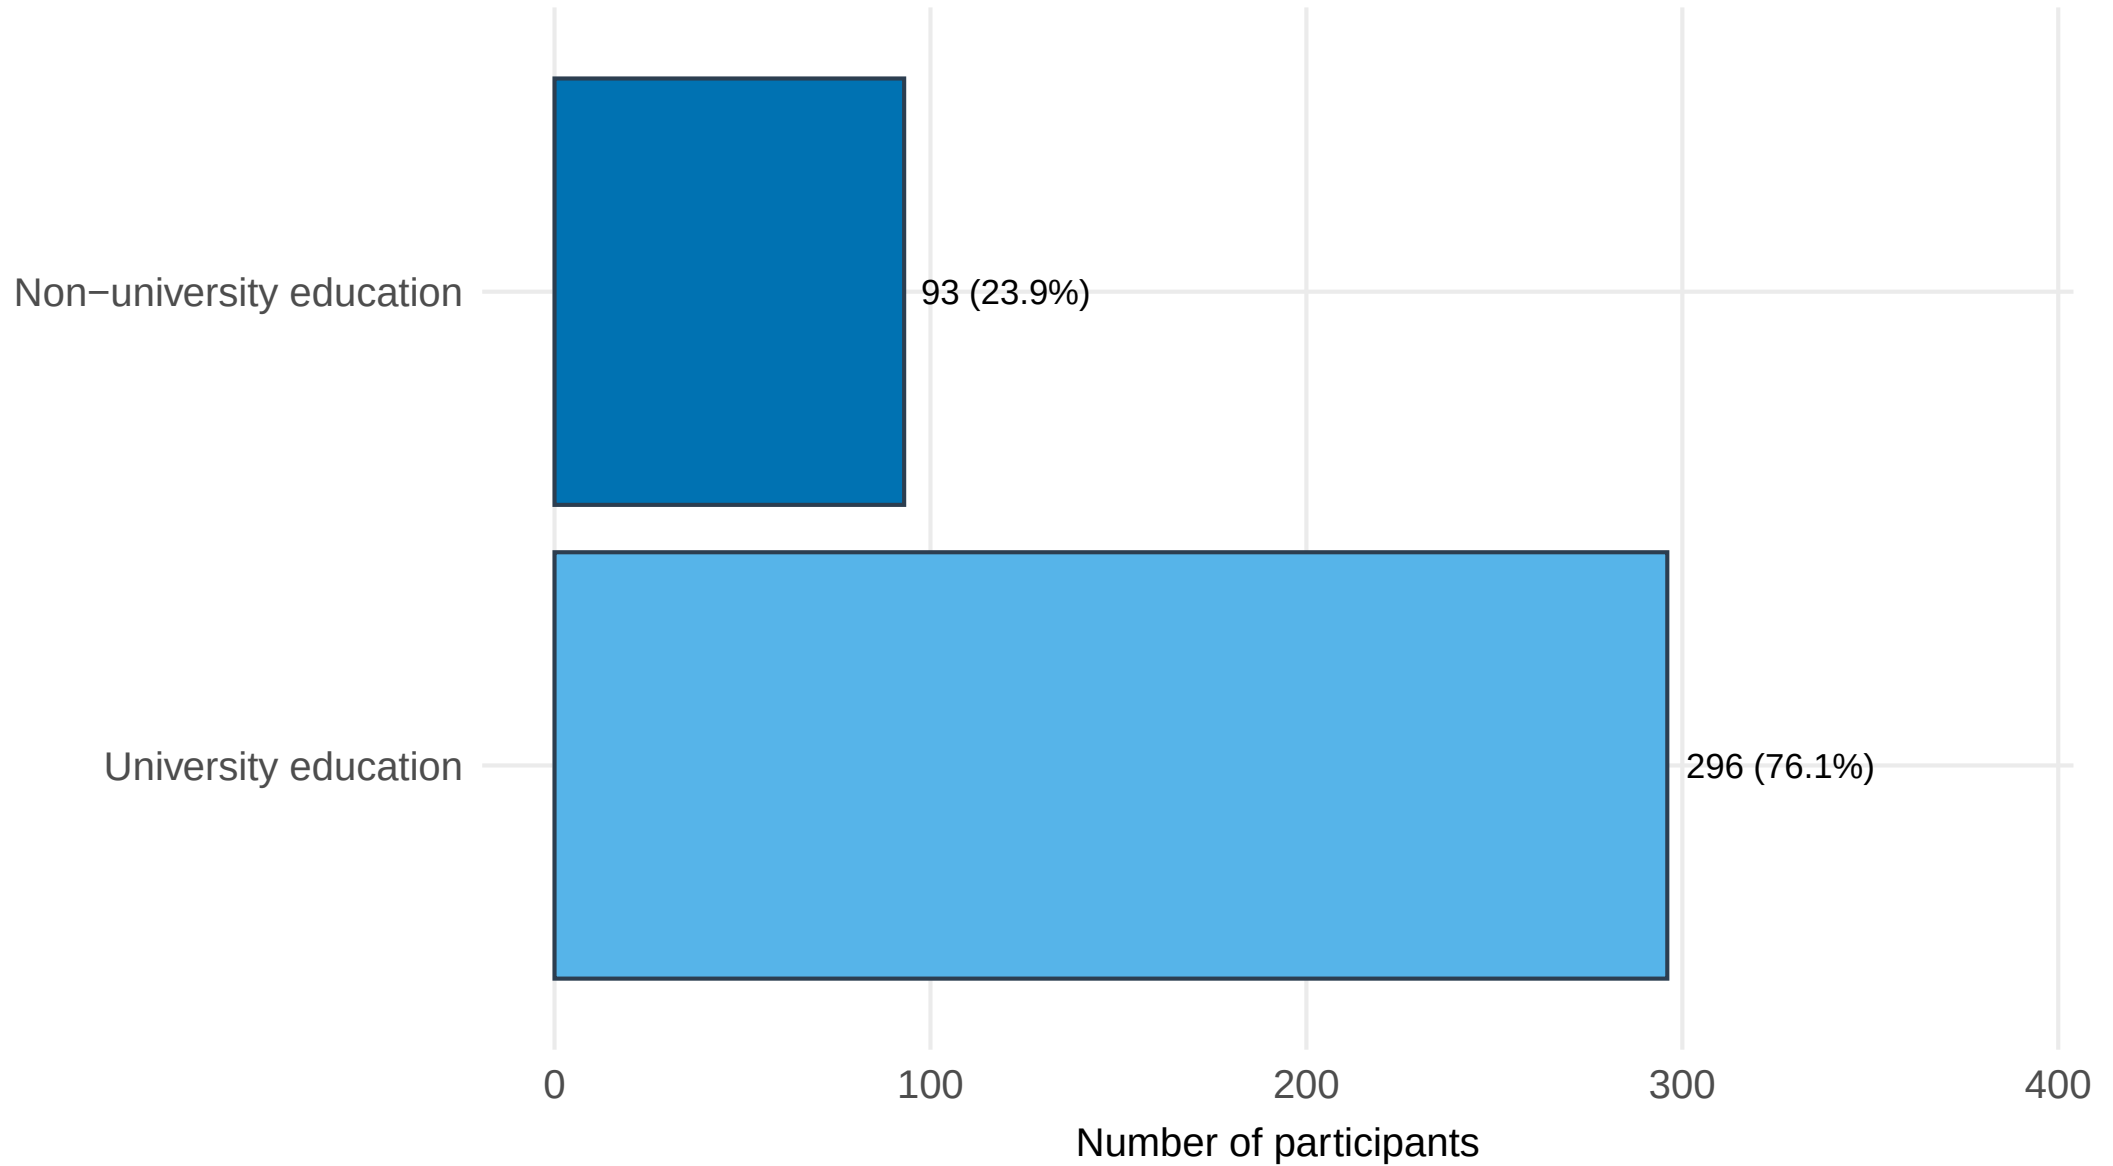

Sample distribution by employment status – ordered

valid n = 389; missing n = 14; total n = 403

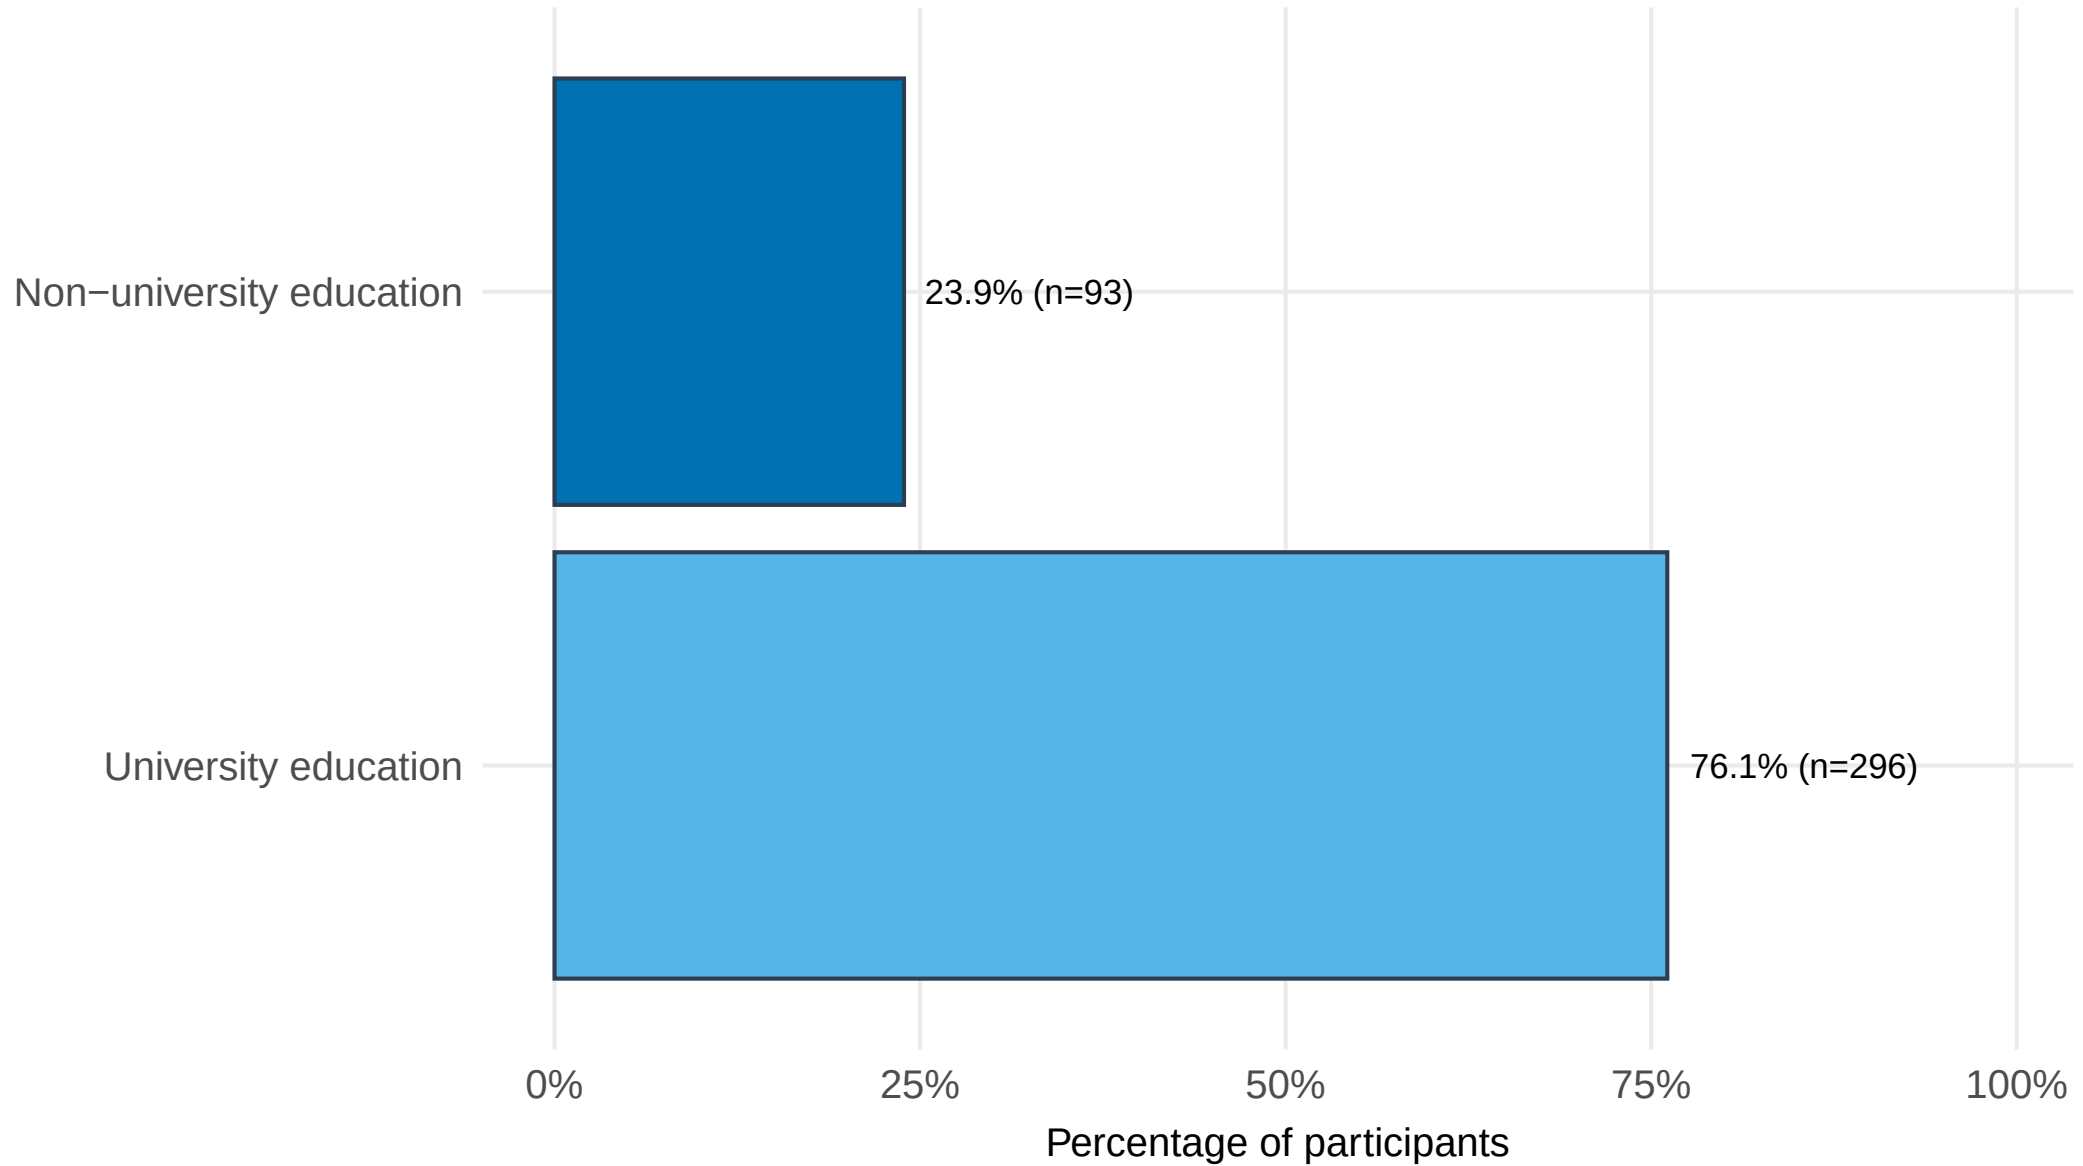

Sample distribution by education level

valid n = 389; missing n = 14; total n = 403

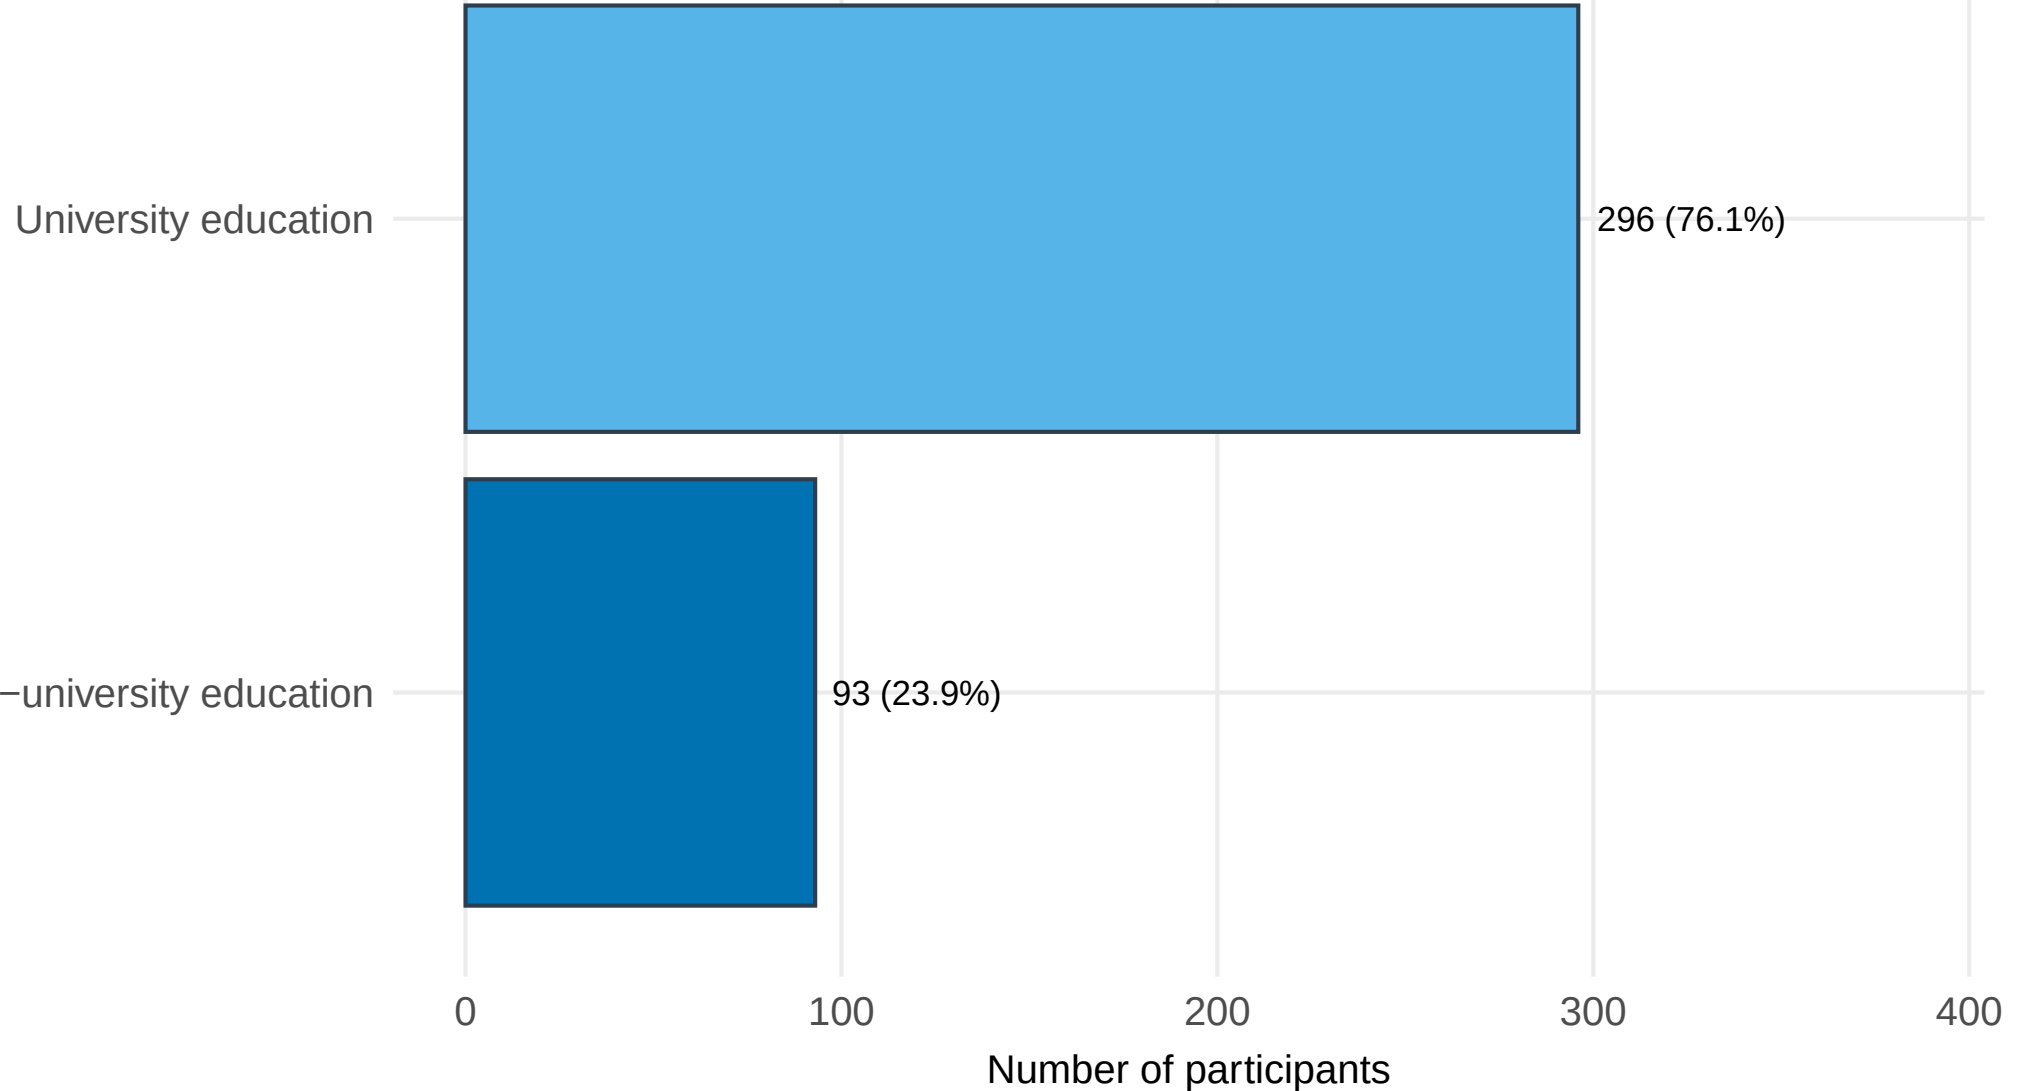

Percentage distribution of the sample by education level

valid n = 389; missing n = 14; total n = 403

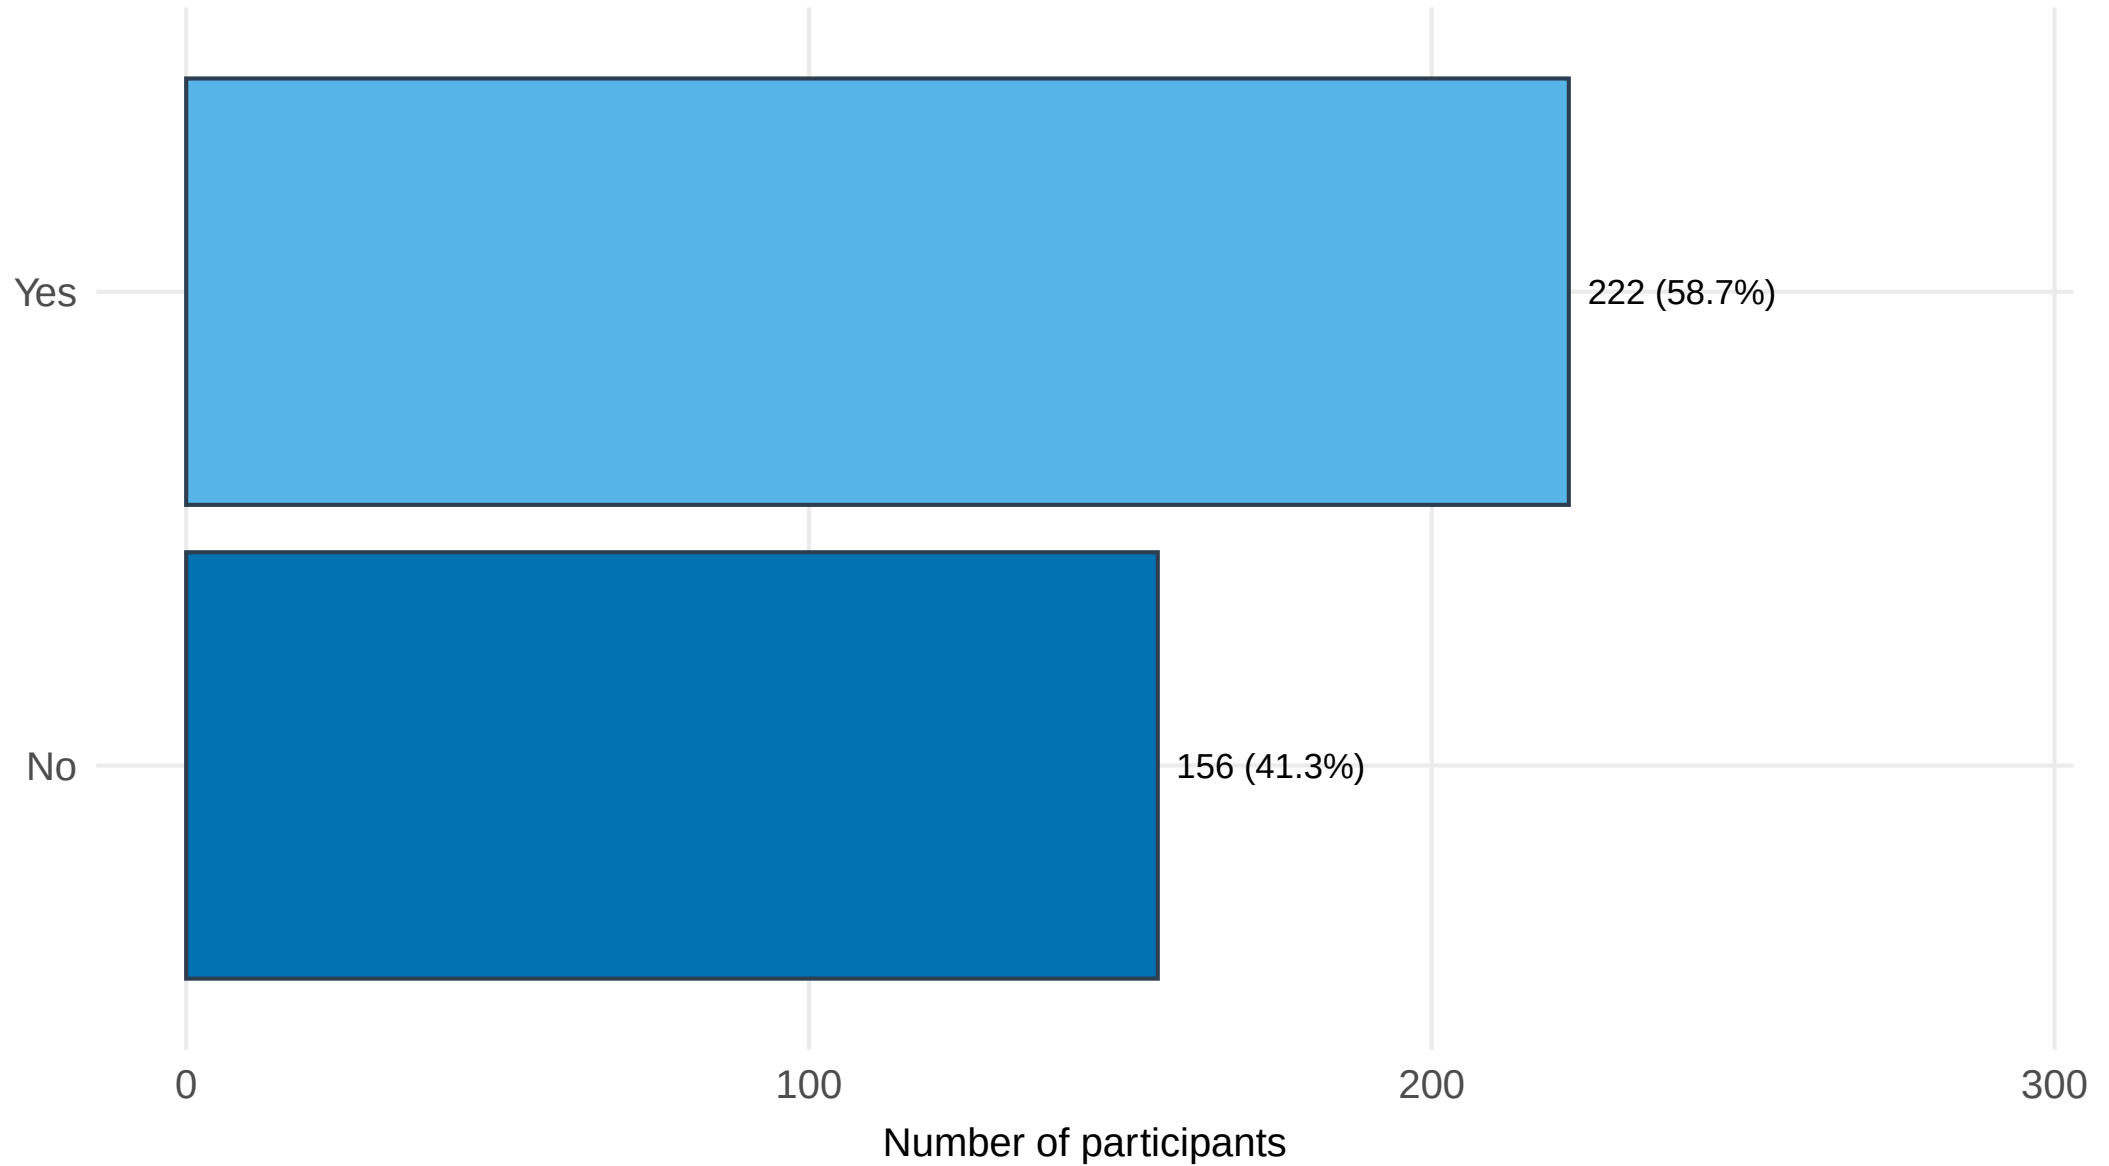

Sample distribution by education level – ordered

valid n = 389; missing n = 14; total n = 403

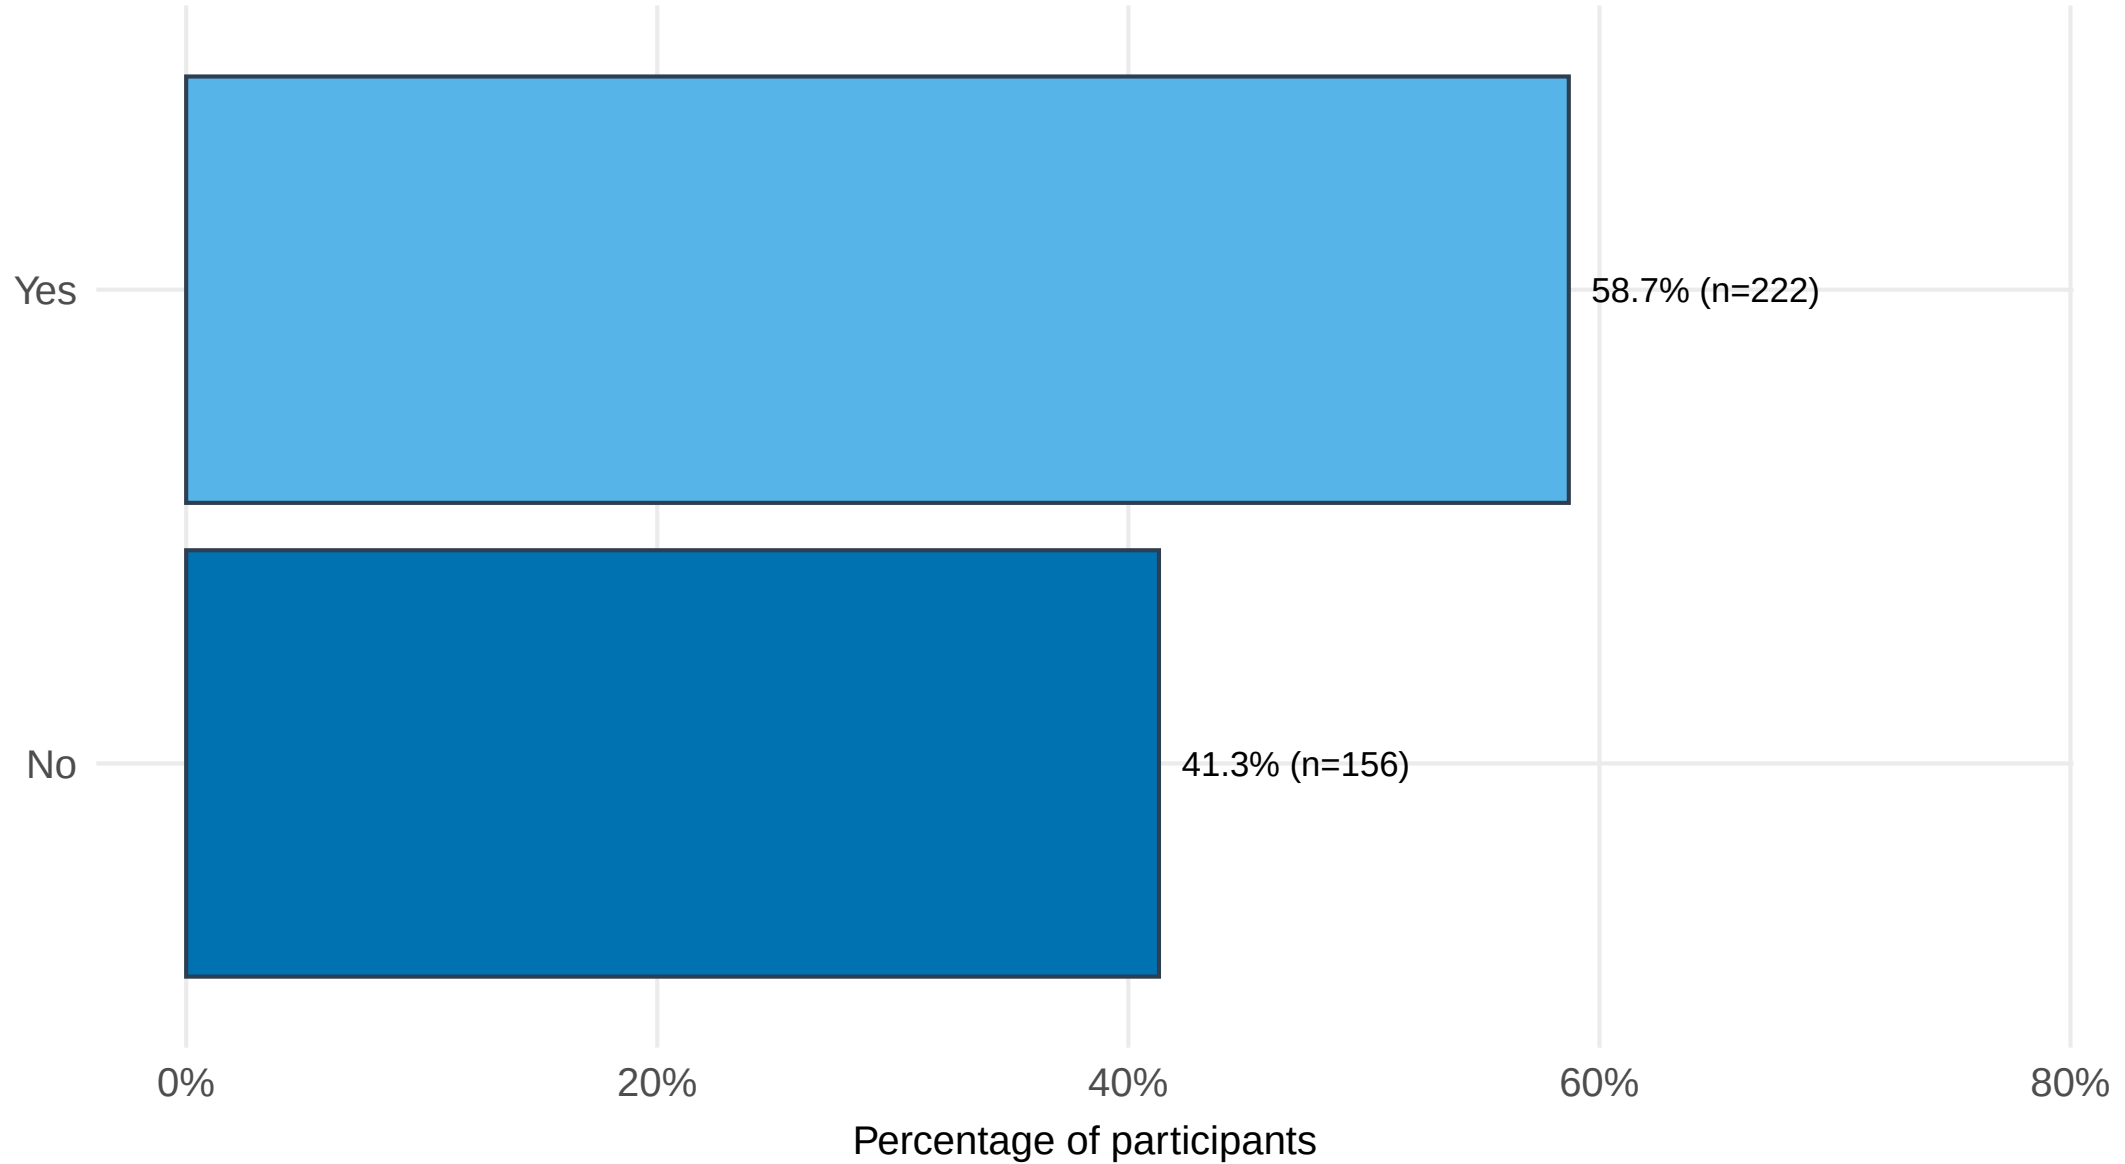

Sample distribution by work/study from home

valid n = 378; missing n = 25; total n = 403

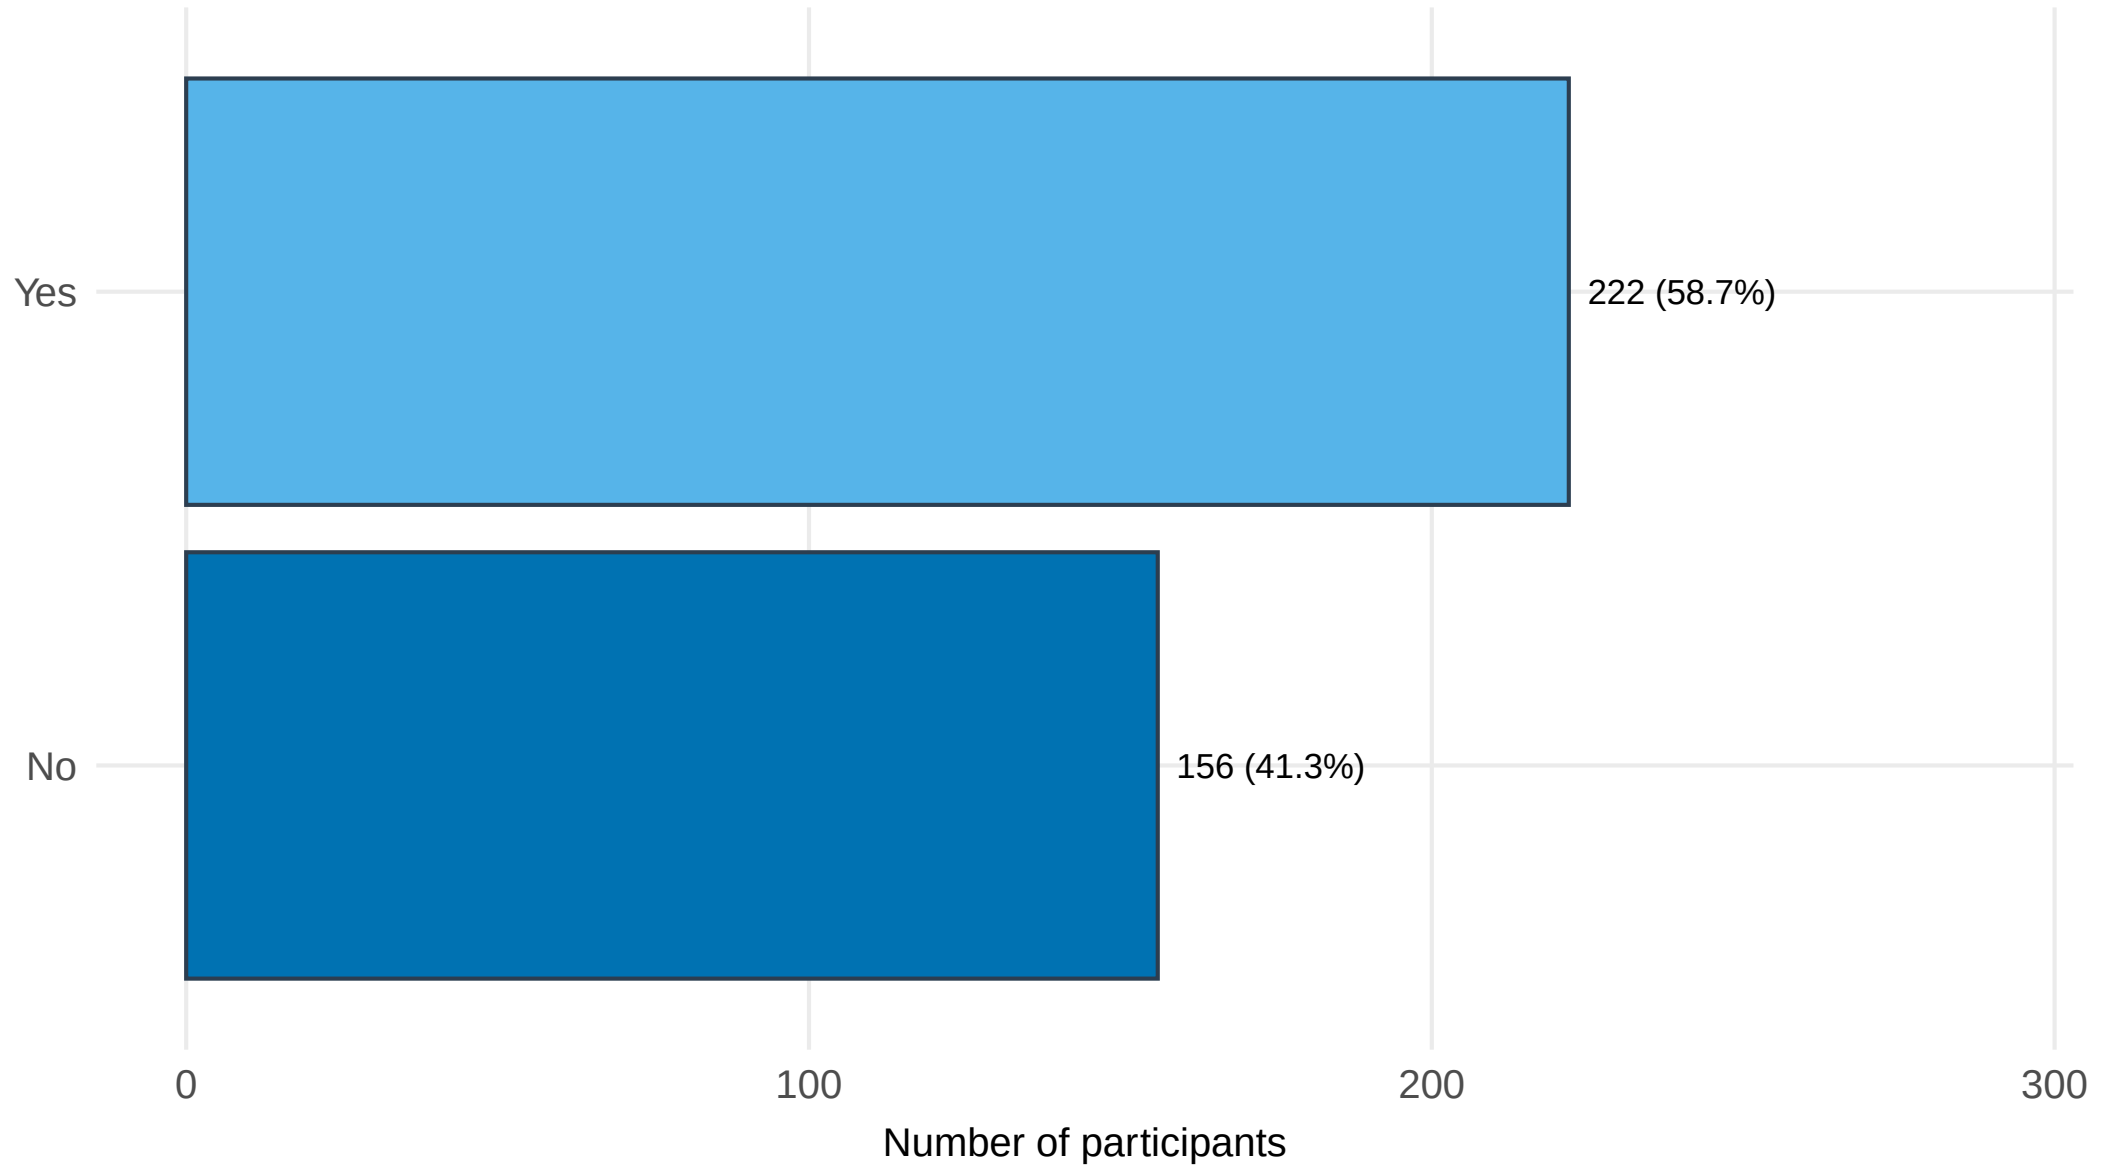

Percentage distribution of the sample by work/study from home

valid n = 378; missing n = 25; total n = 403

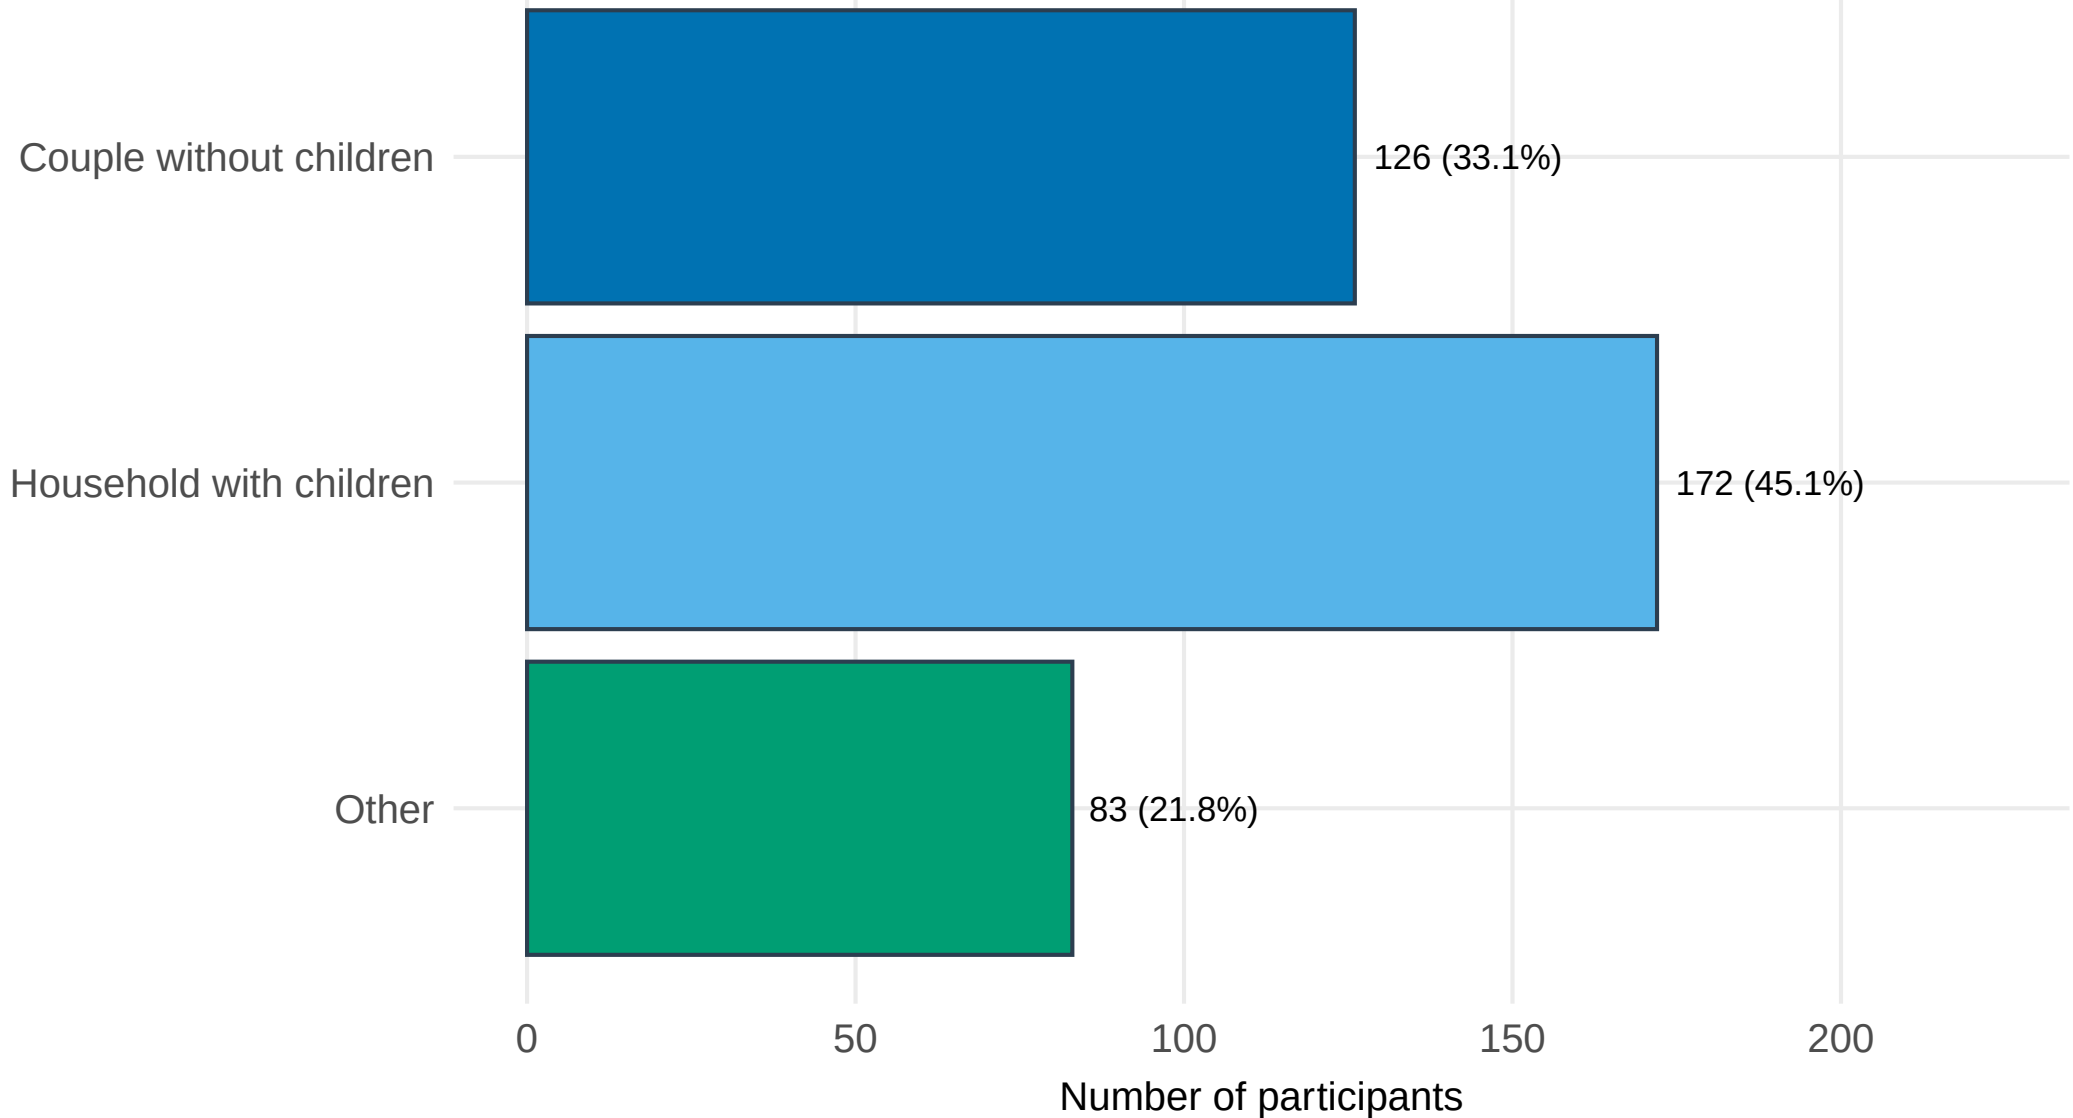

Sample distribution by work/study from home – ordered

valid n = 378; missing n = 25; total n = 403

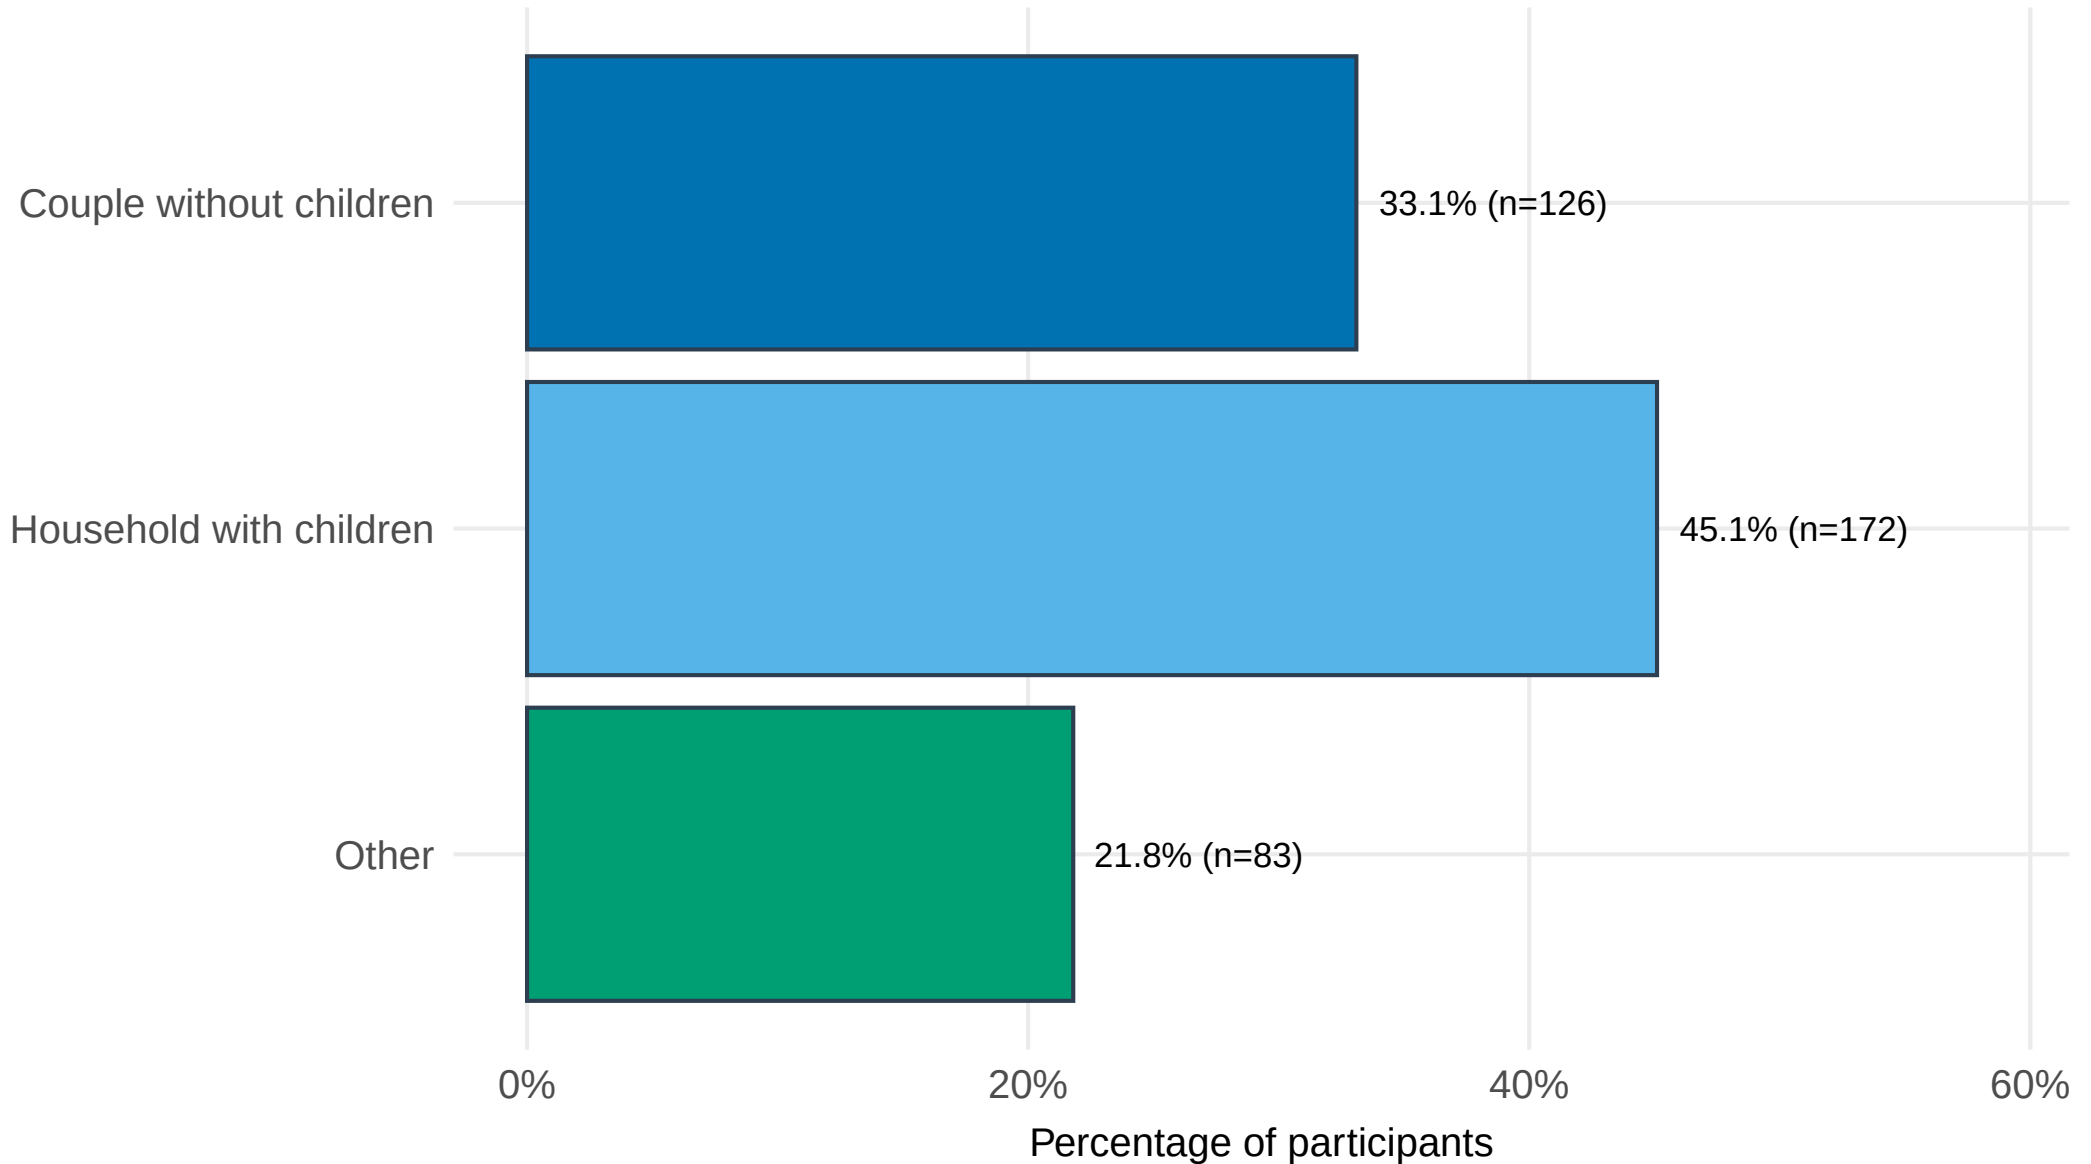

Sample distribution by household type

valid n = 381; missing n = 22; total n = 403

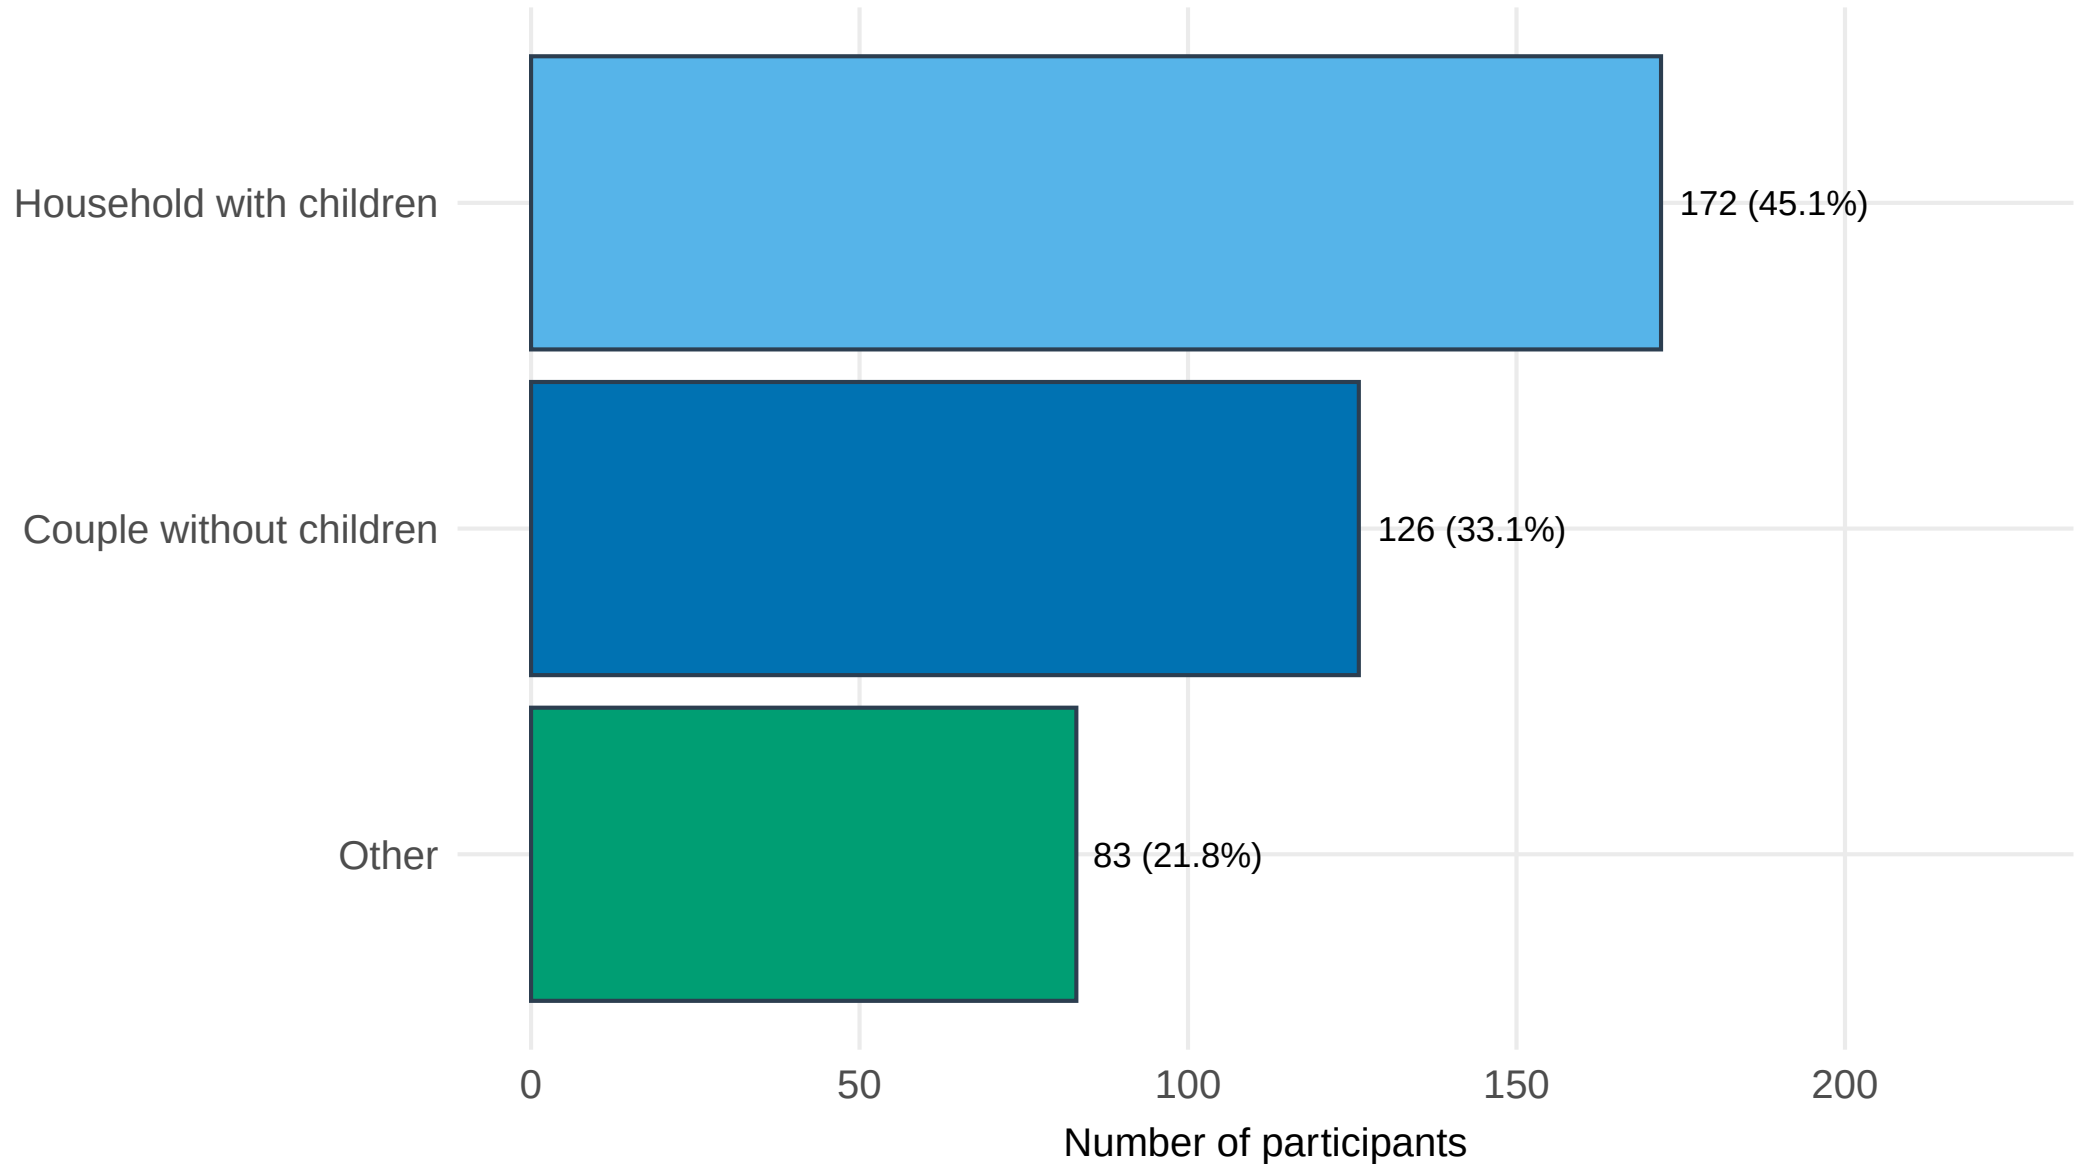

Percentage distribution of the sample by household type

valid n = 381; missing n = 22; total n = 403

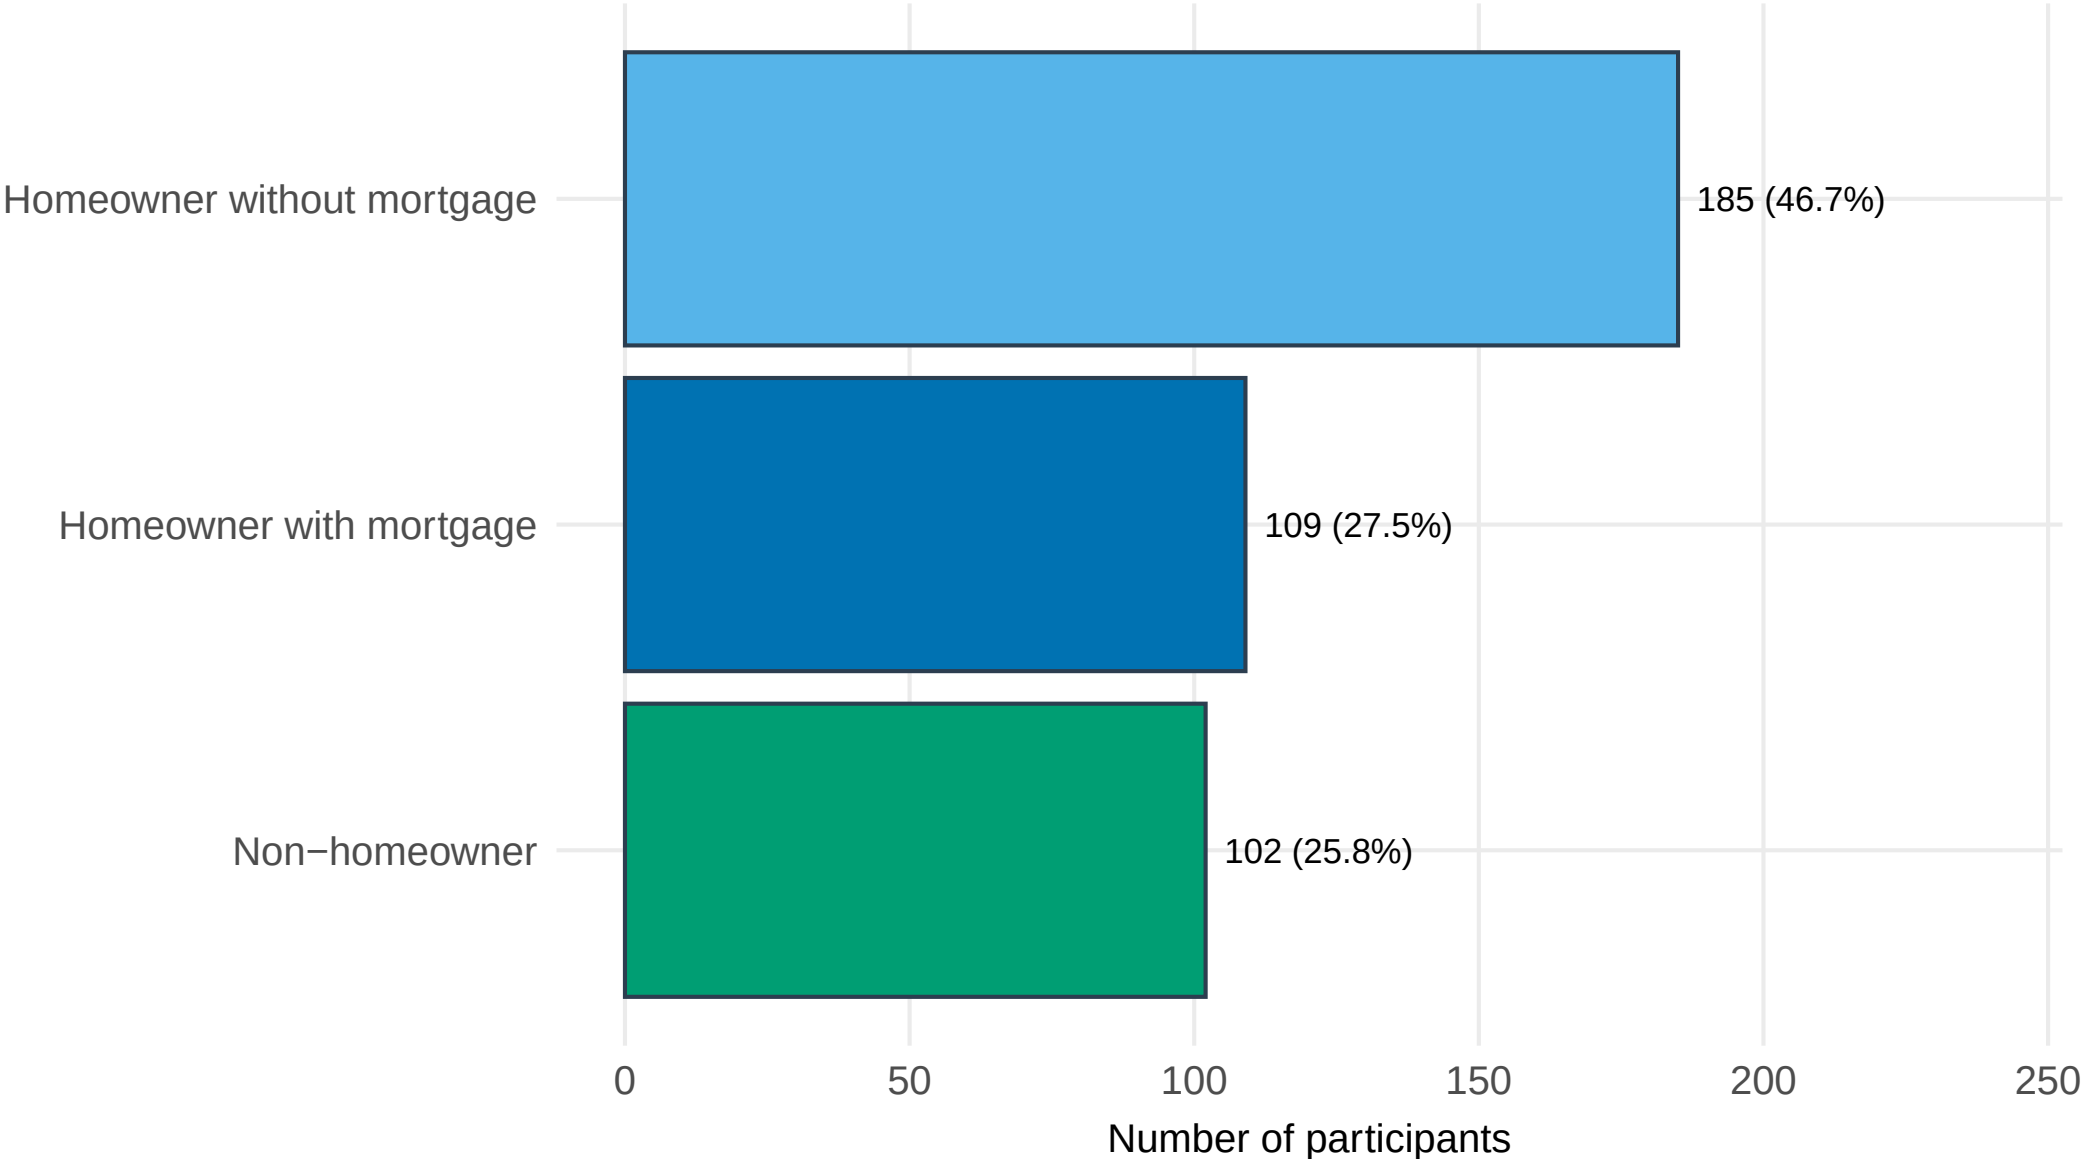

Sample distribution by household type – ordered

valid n = 381; missing n = 22; total n = 403

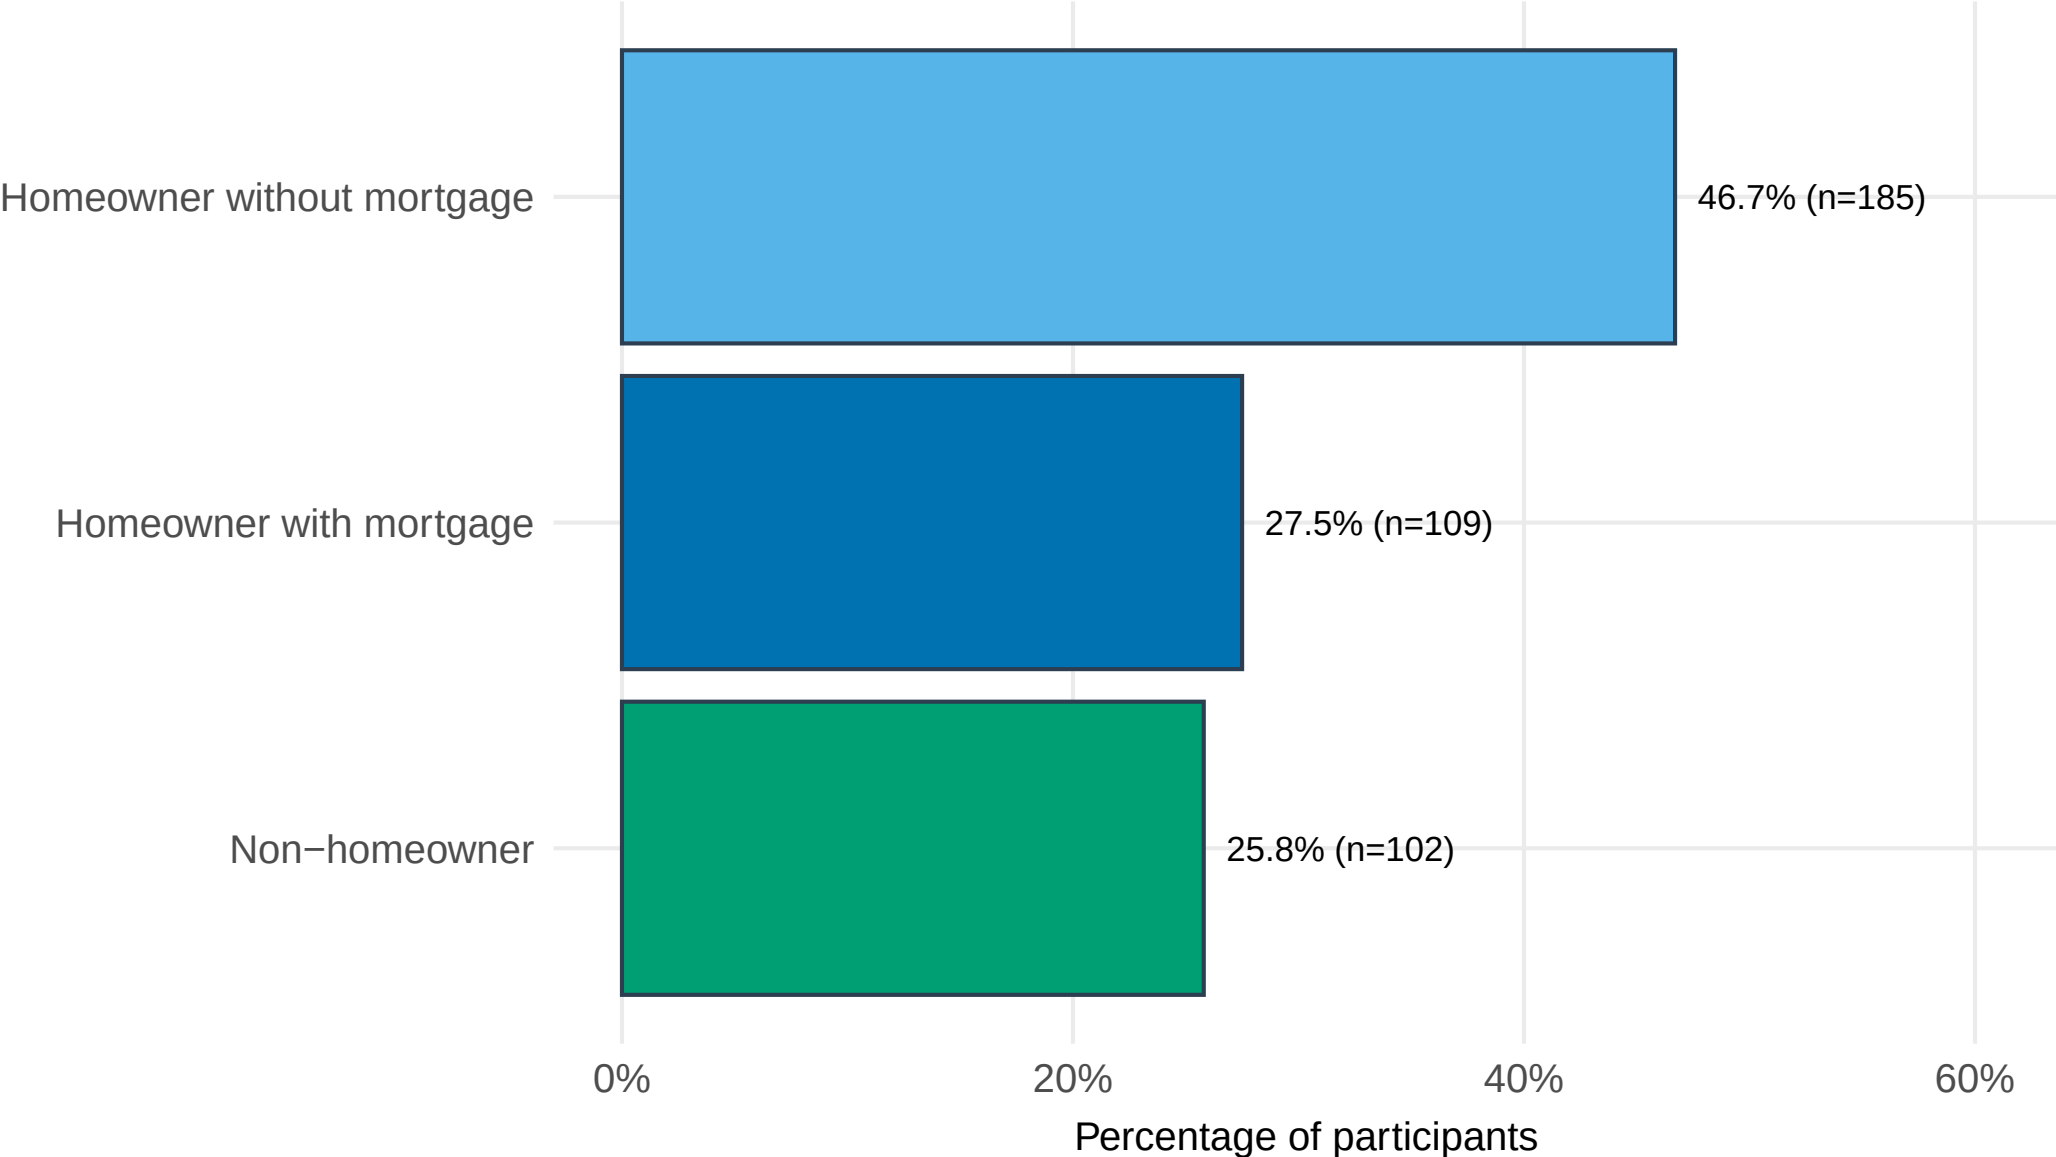

Sample distribution by tenure status

valid n = 396; missing n = 7; total n = 403

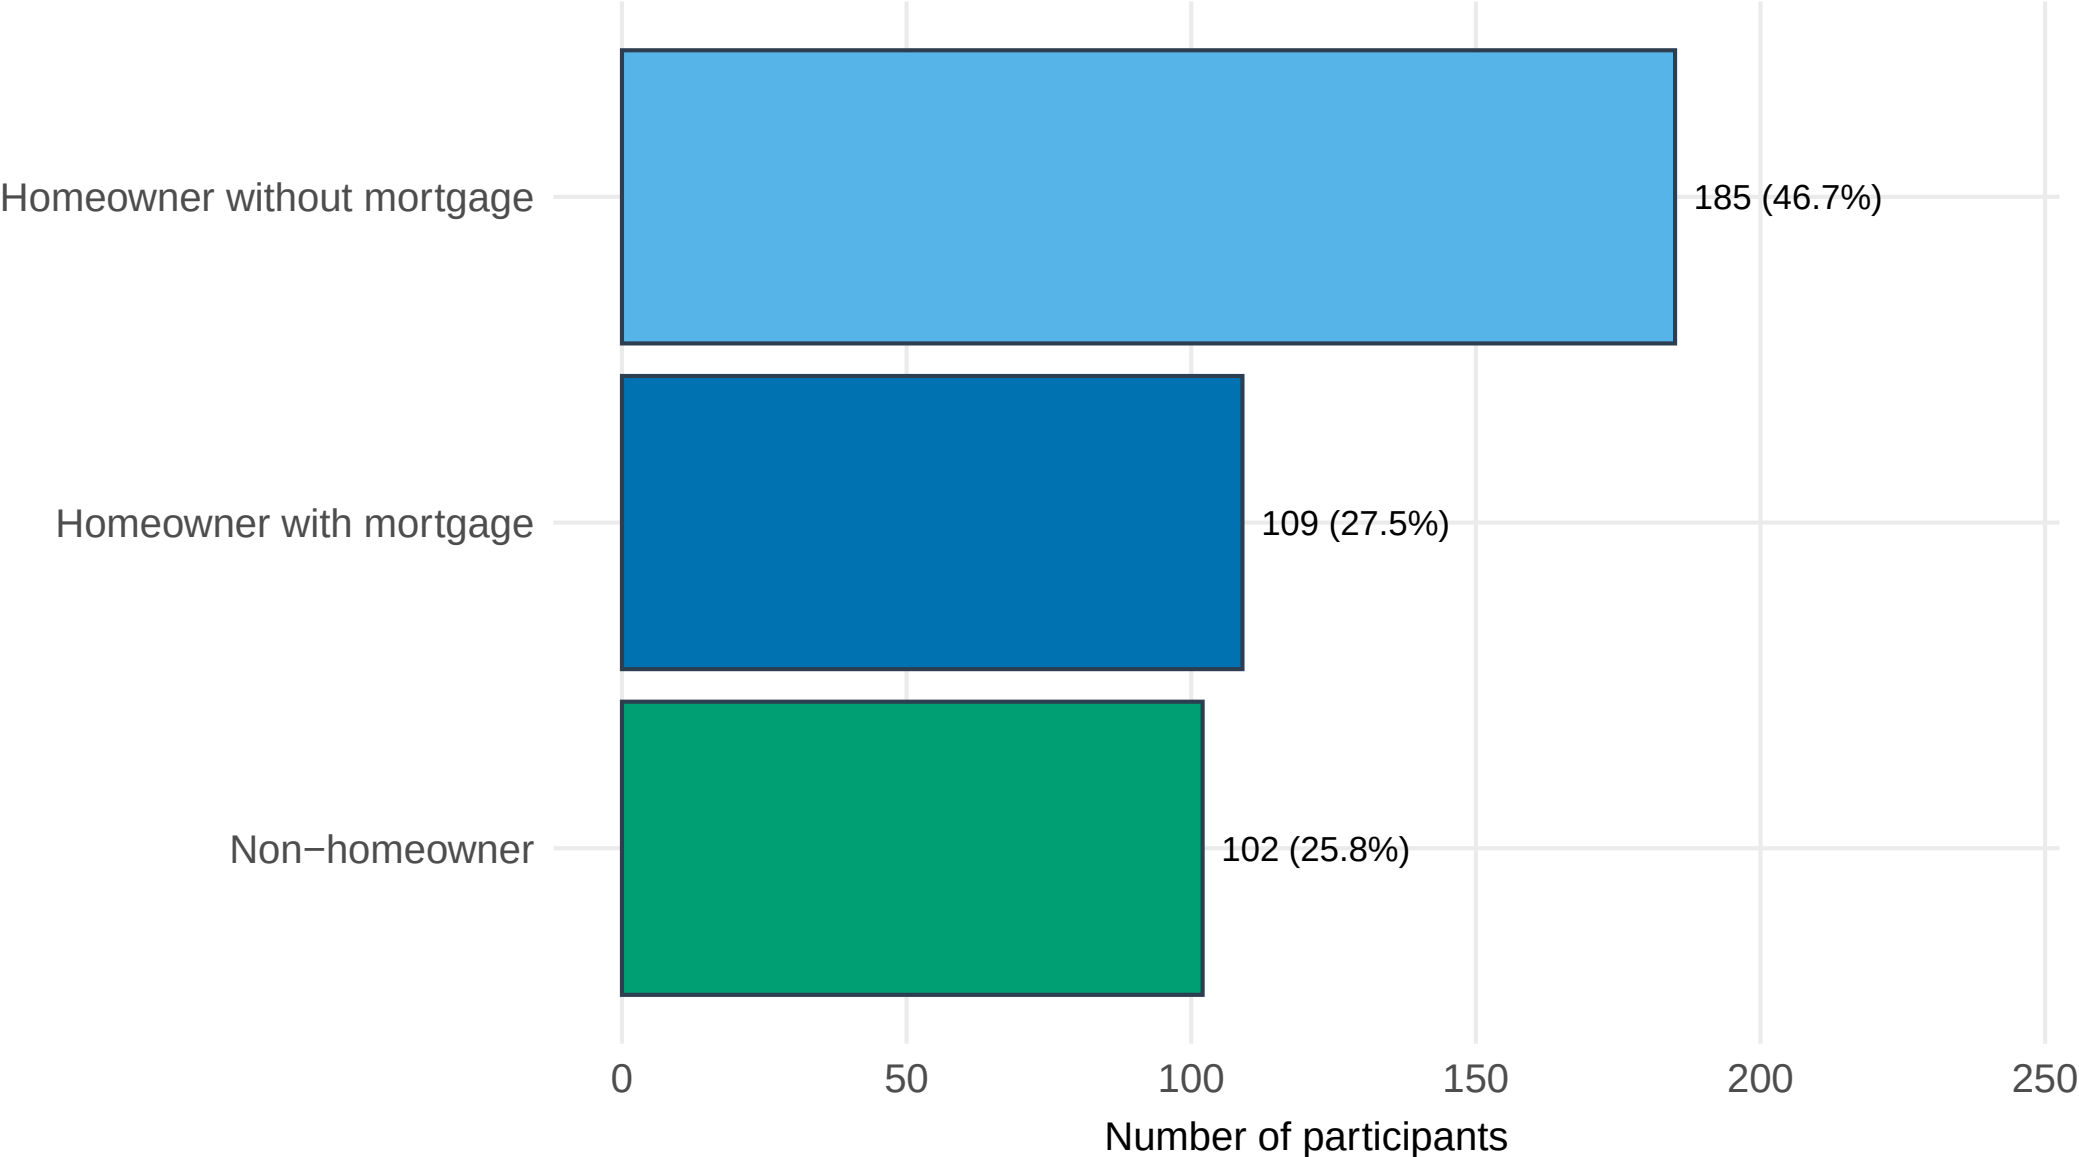

Percentage distribution of the sample by tenure status

valid n = 396; missing n = 7; total n = 403

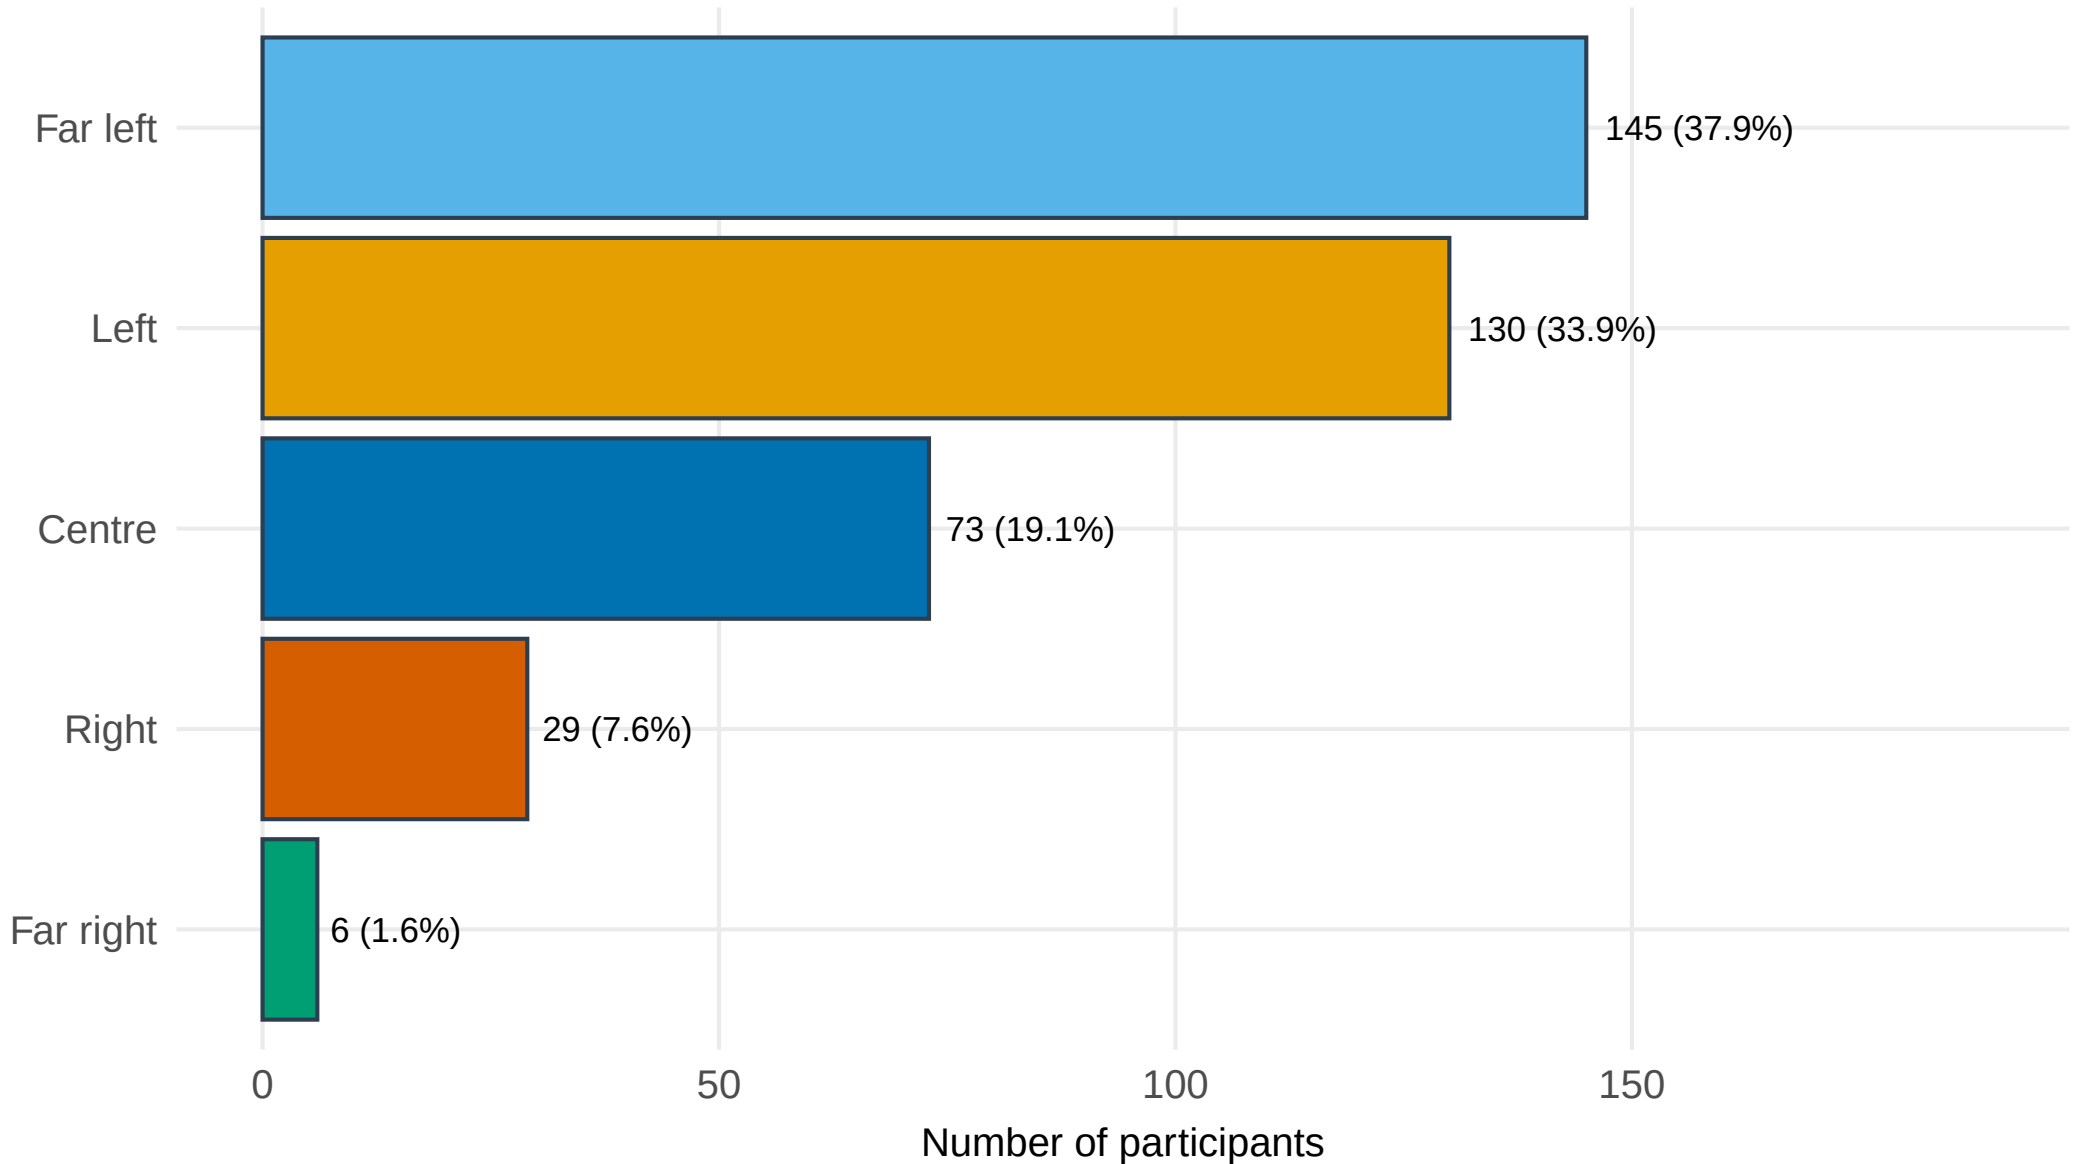

Sample distribution by tenure status – ordered

valid n = 396; missing n = 7; total n = 403

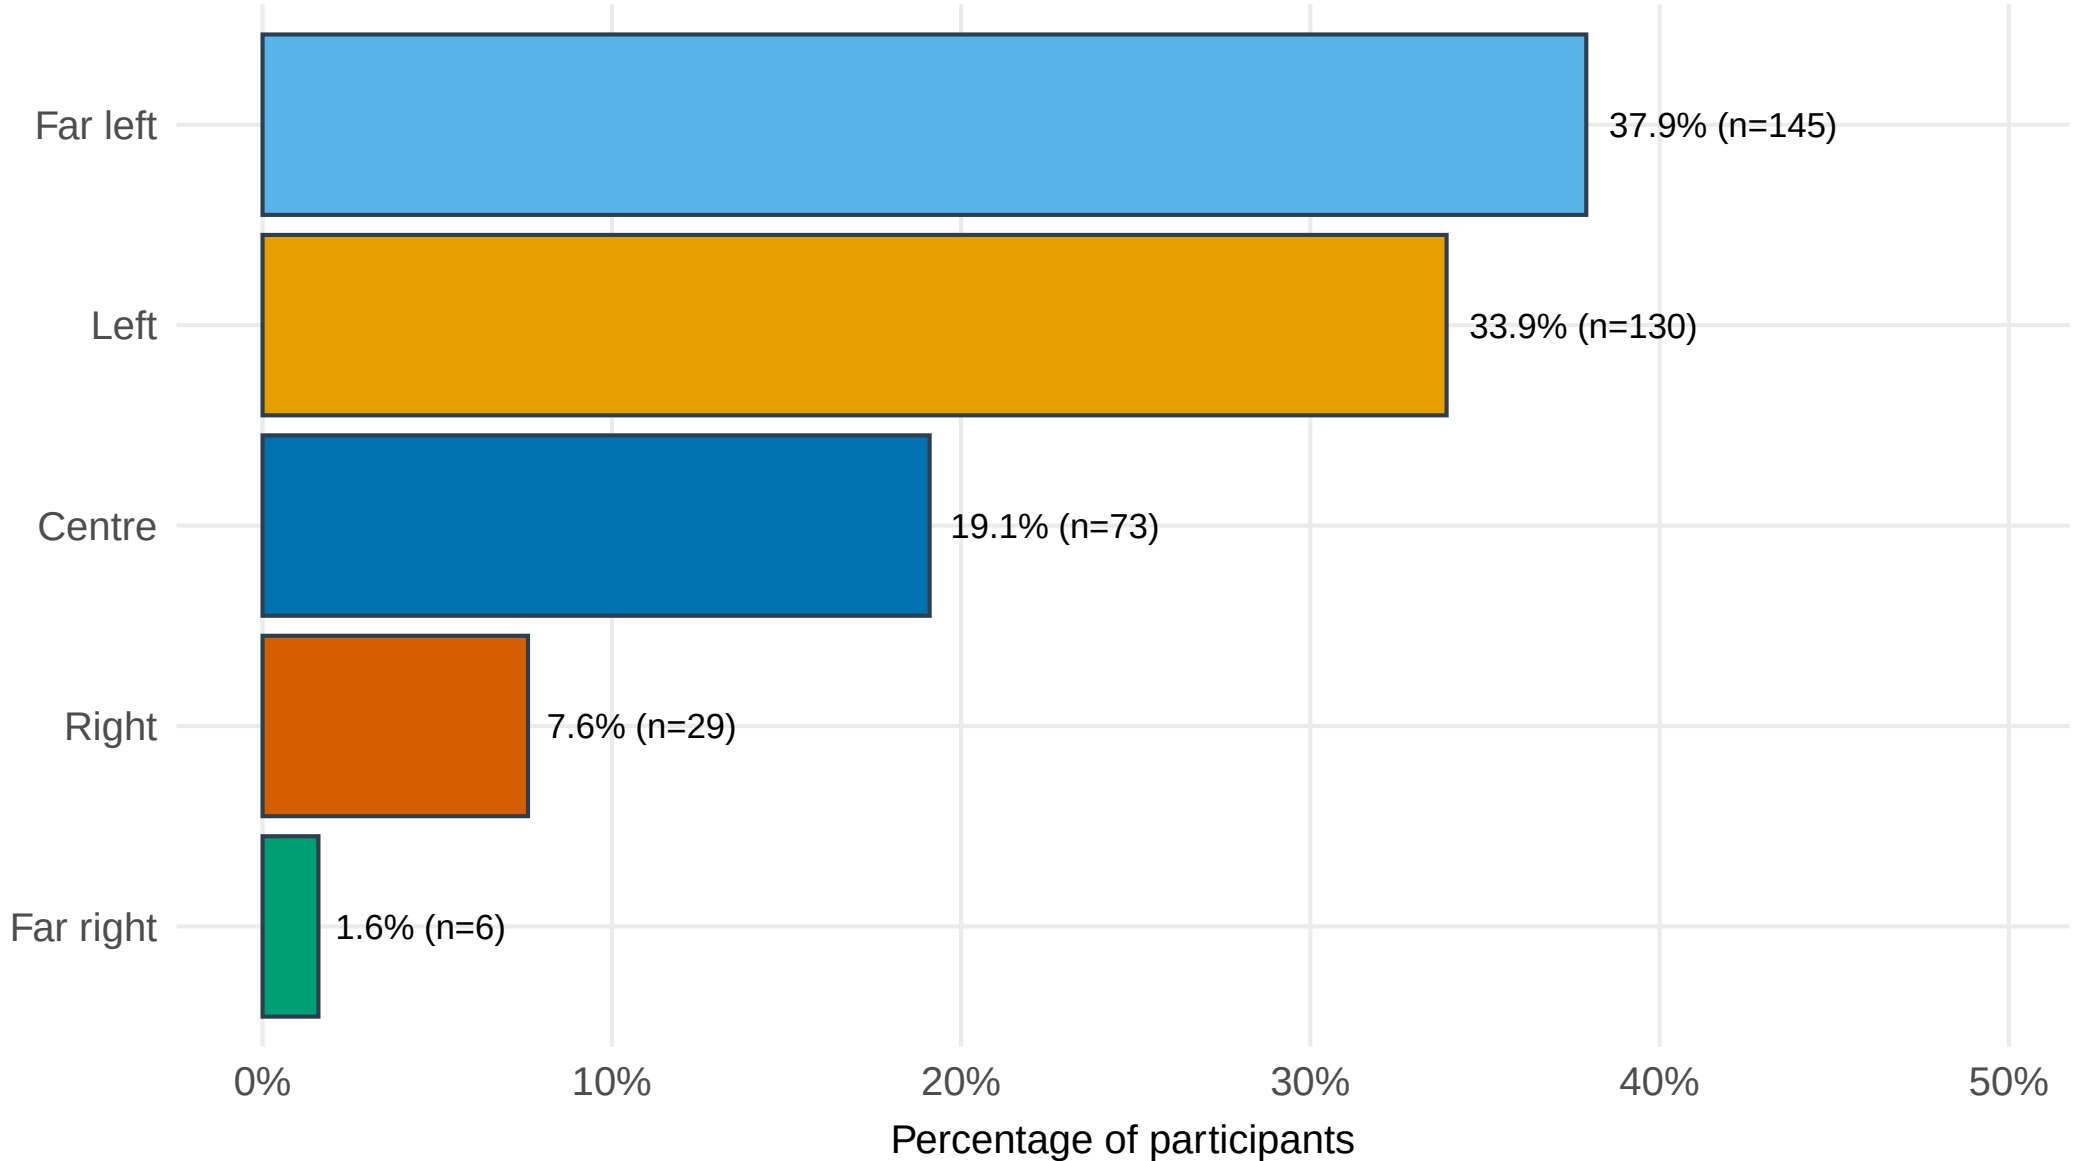

Sample distribution by political orientation

valid n = 383; missing n = 20; total n = 403

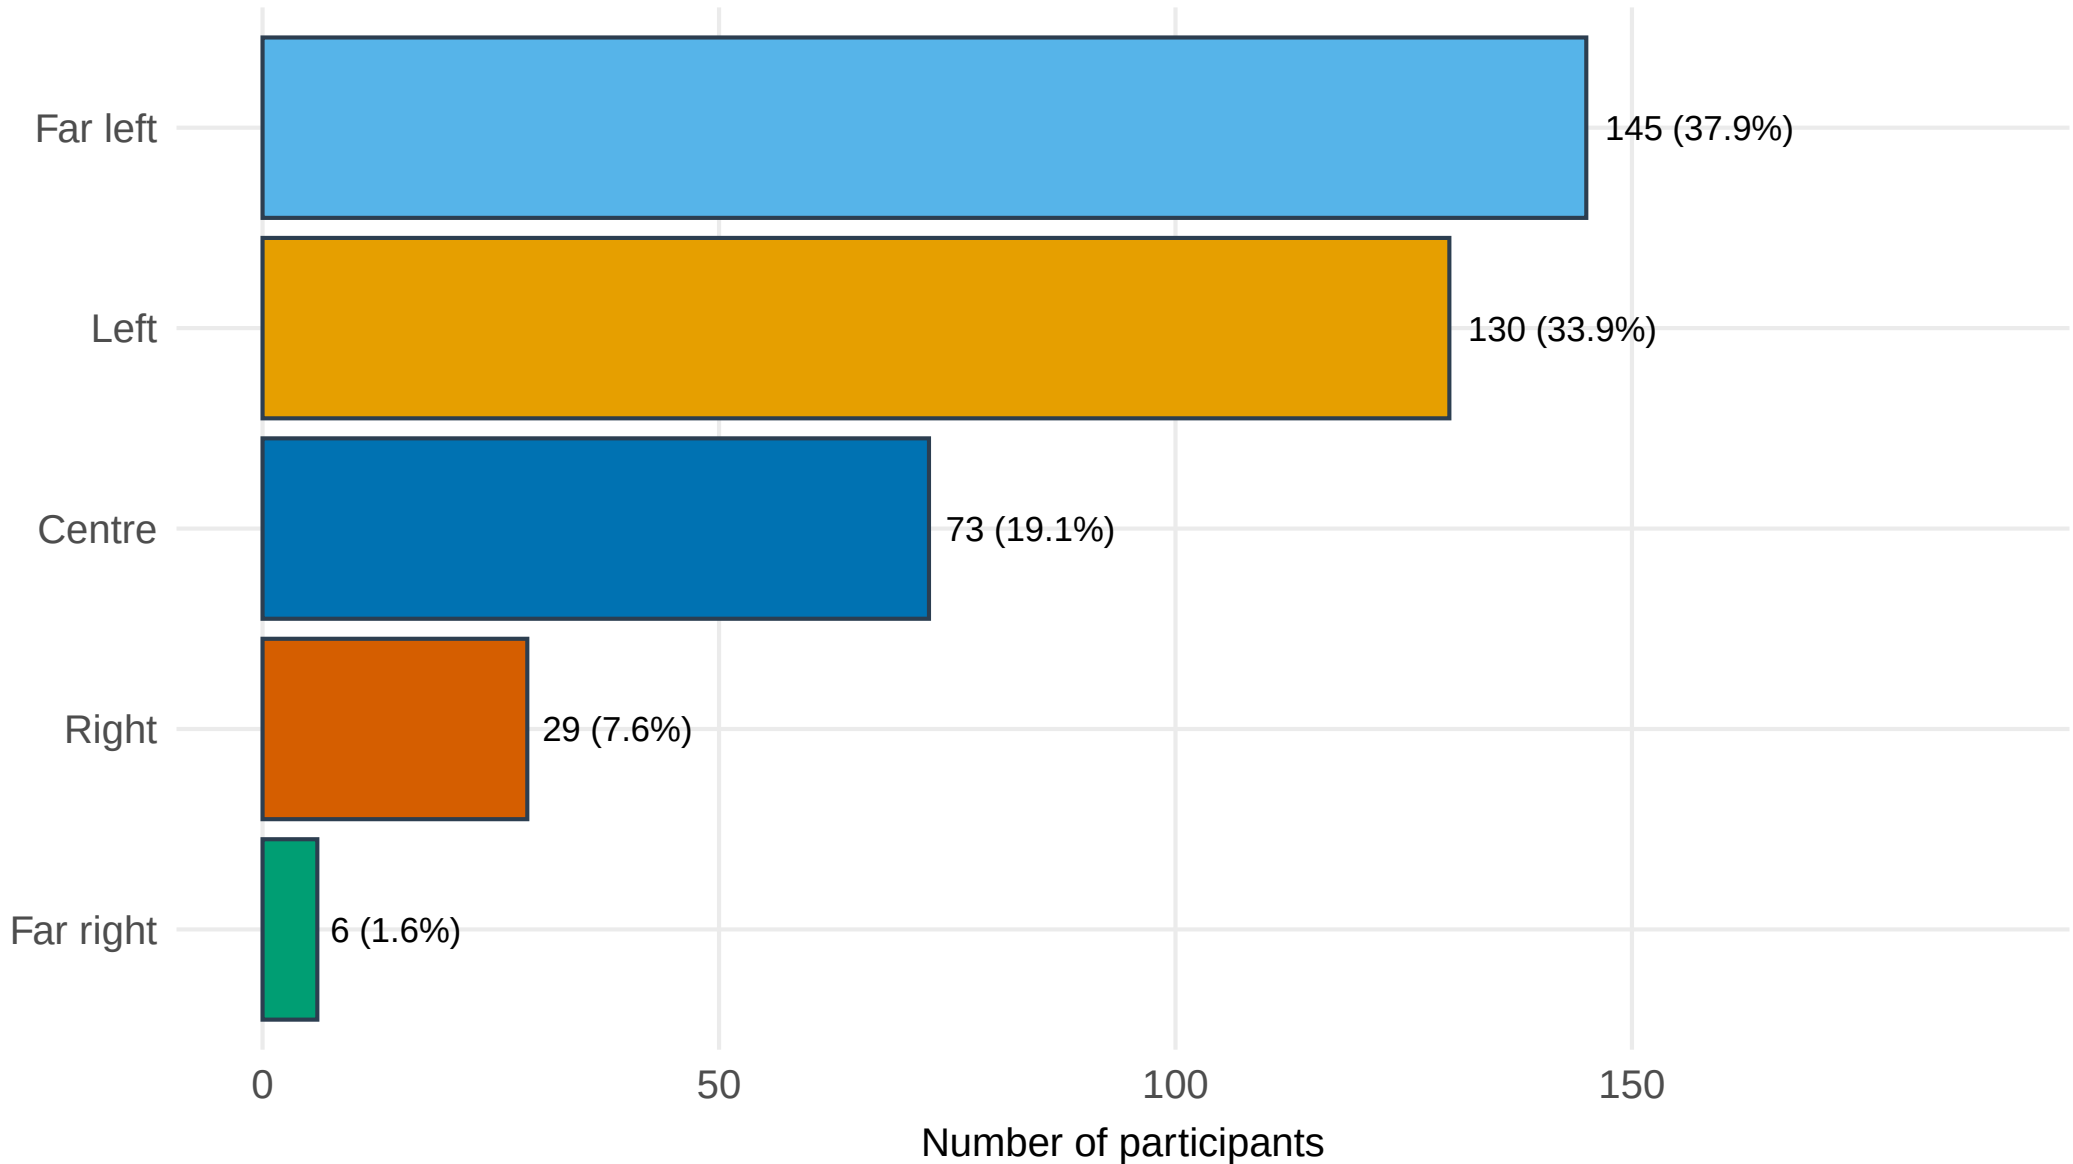

Percentage distribution of the sample by political orientation

valid n = 383; missing n = 20; total n = 403

Sample distribution by political orientation – ordered

valid n = 383; missing n = 20; total n = 403

Sample distribution by voting type

valid n = 393; missing n = 10; total n = 403

Regionalist/independence parties

108 (27.5%)

Variable vote depending on
candidate/programme

145 (36.9%)

National parties

70 (17.8%)

Other options

Sample distribution by voting type – ordered

valid n = 393; missing n = 10; total n = 403

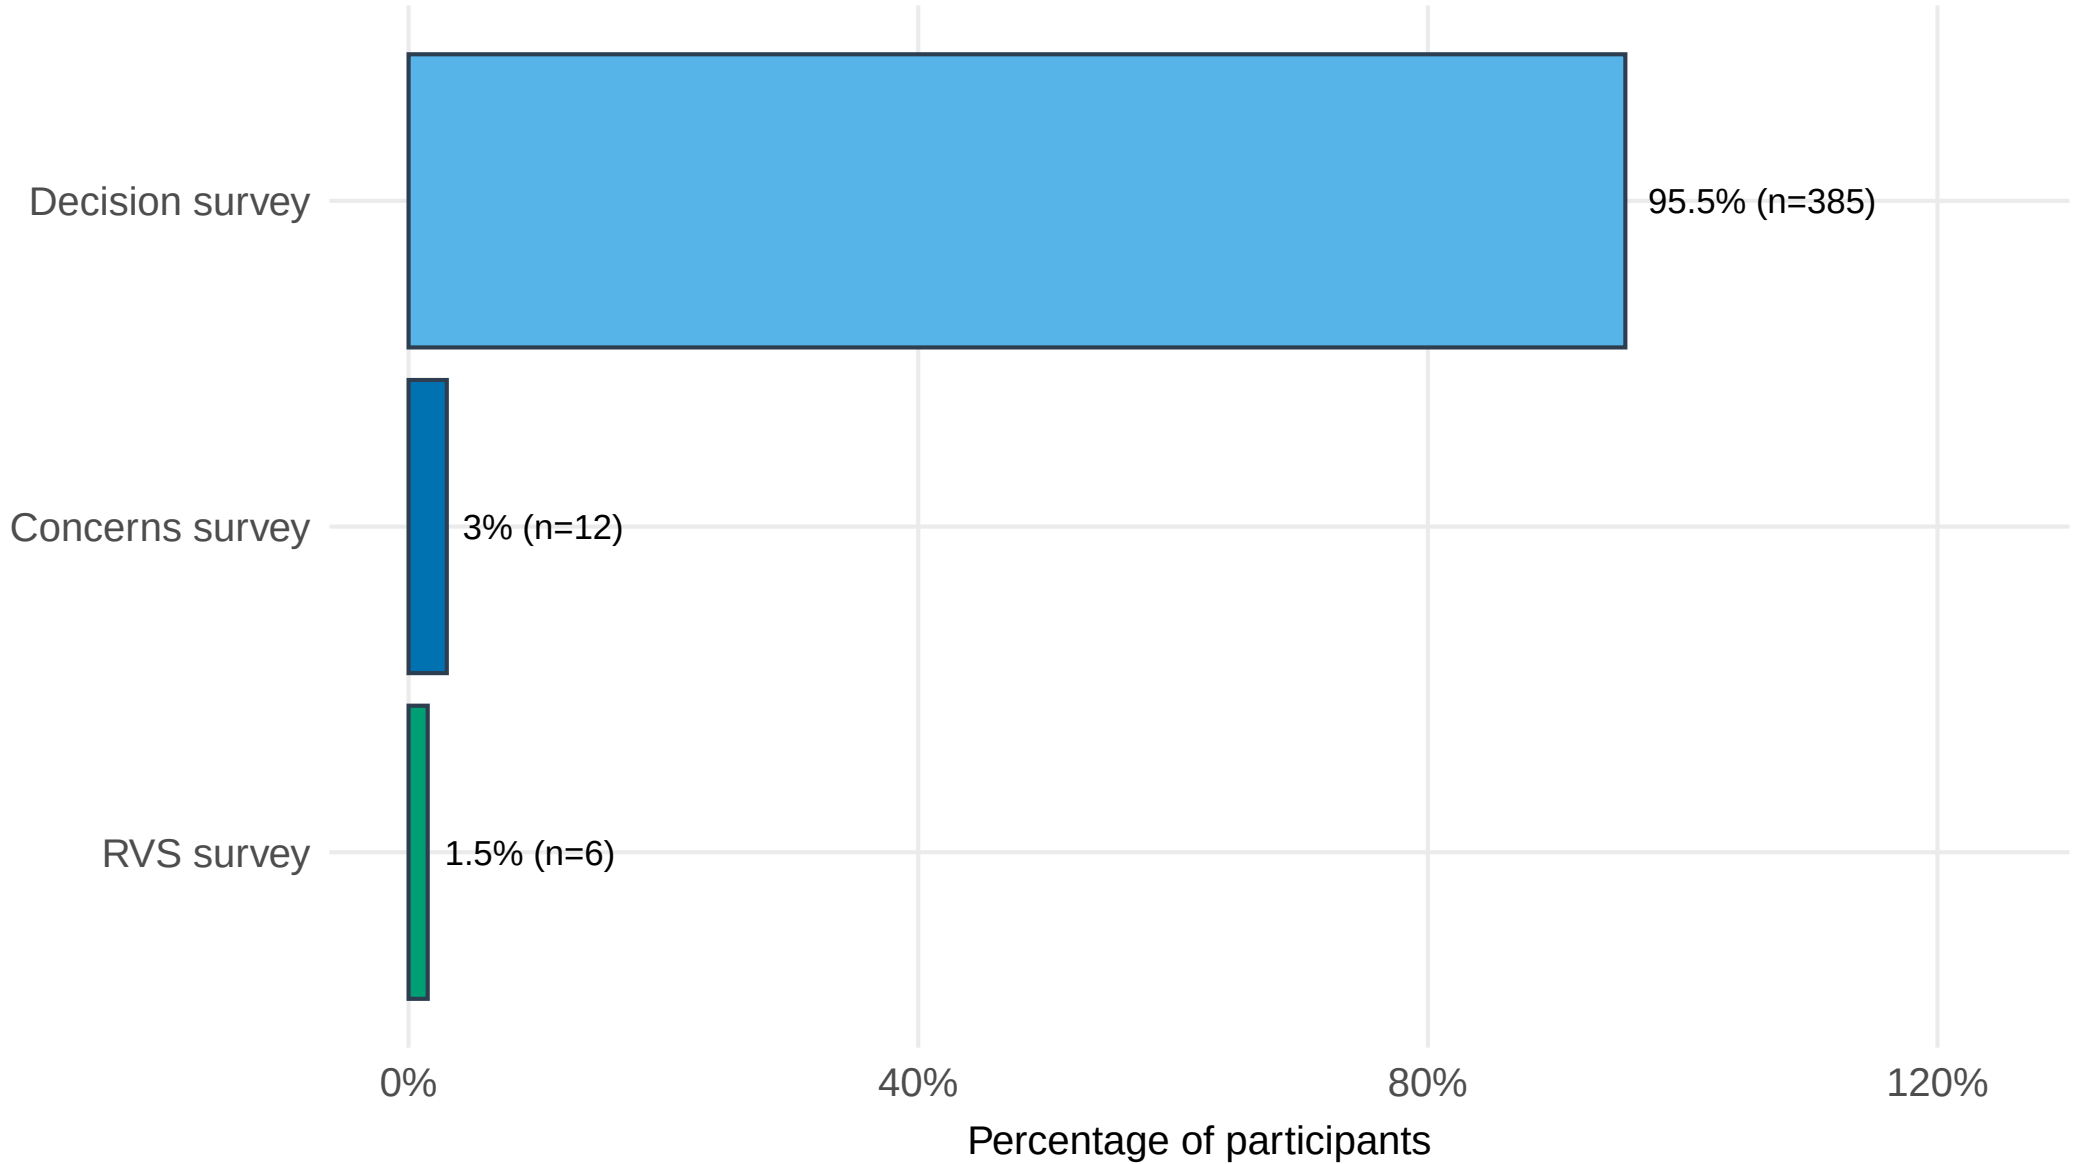

Sample distribution by source survey

valid n = 403; missing n = 0; total n = 403

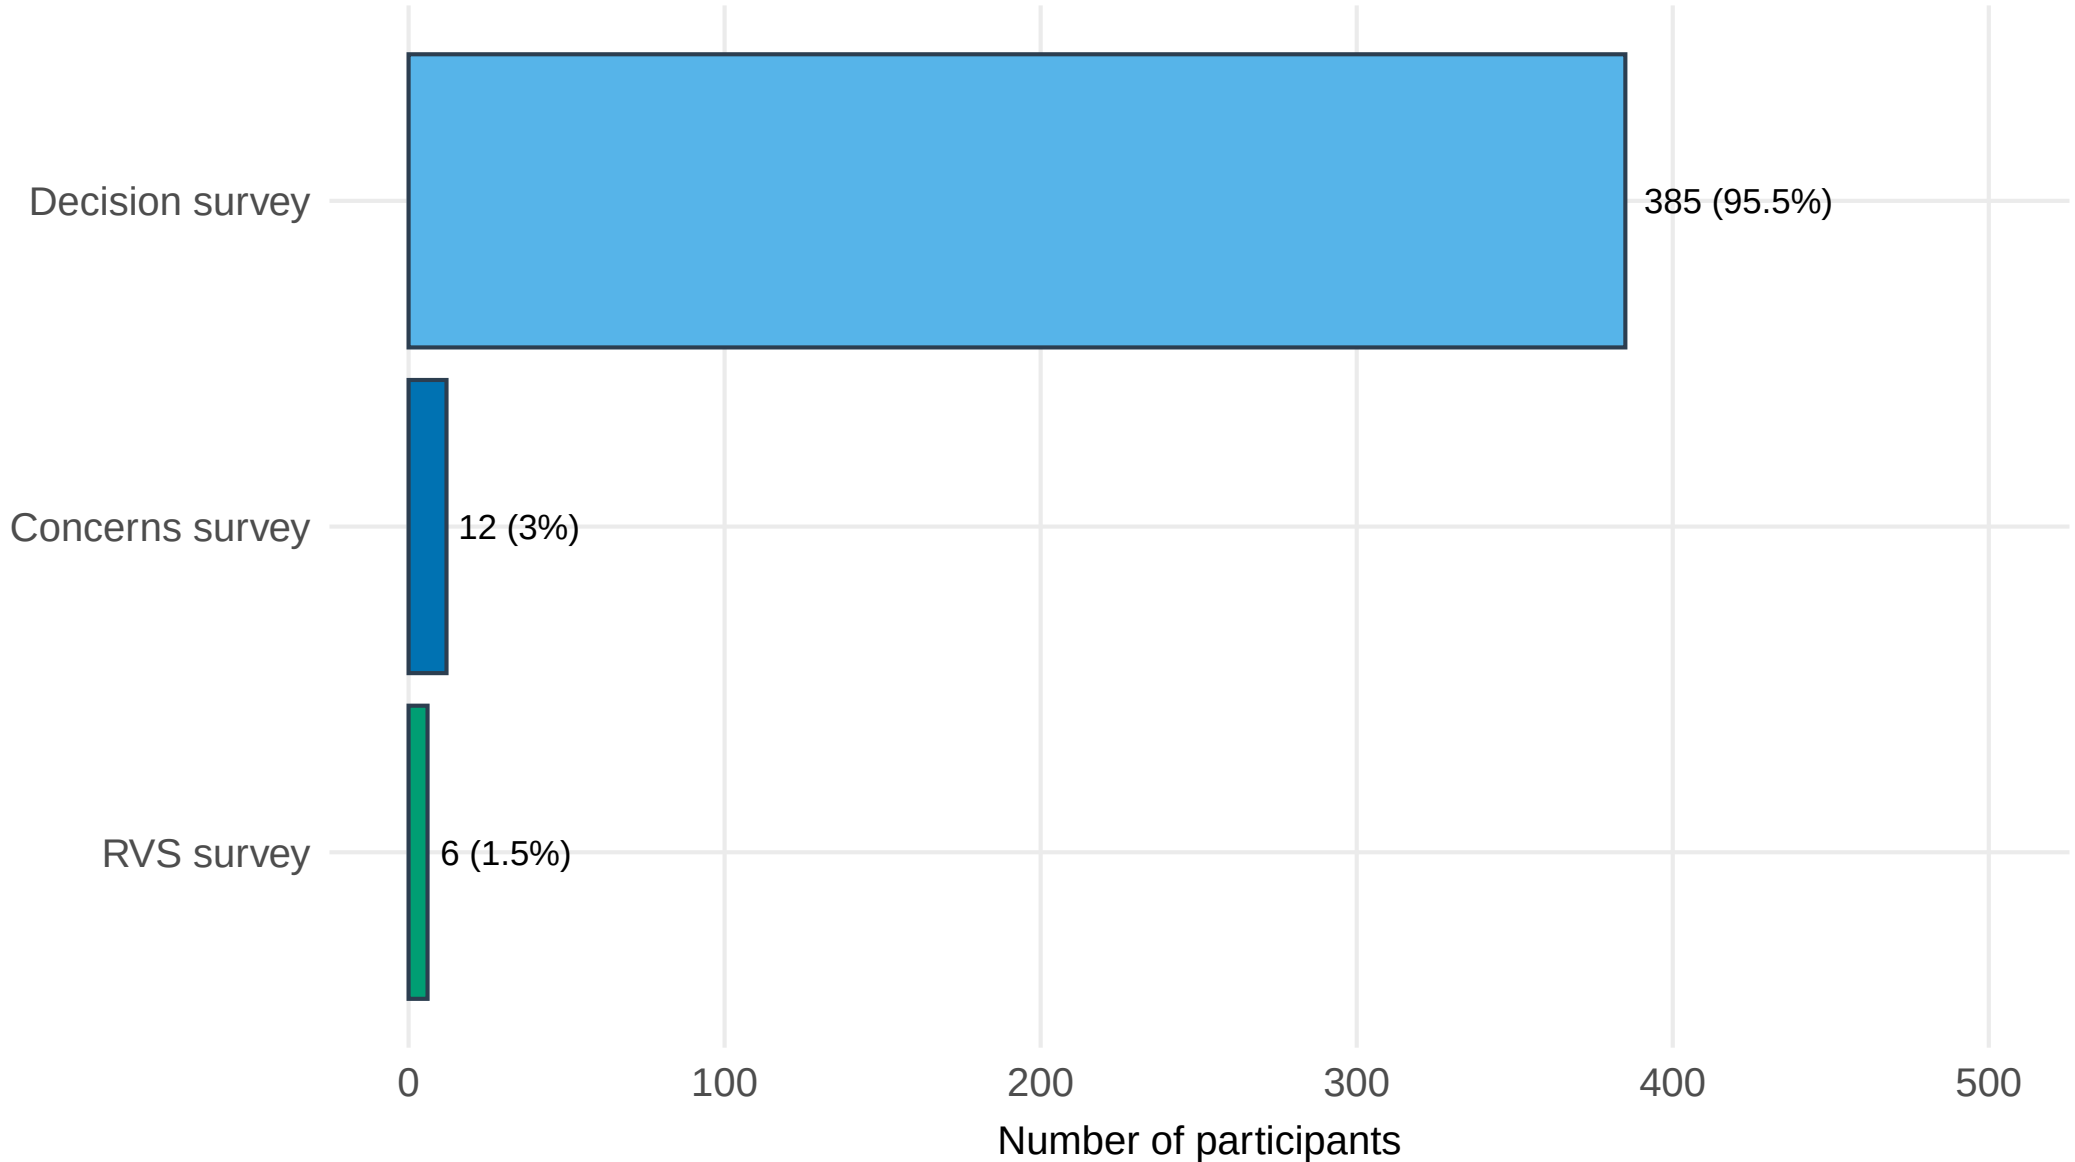

Percentage distribution of the sample by source survey

valid n = 403; missing n = 0; total n = 403

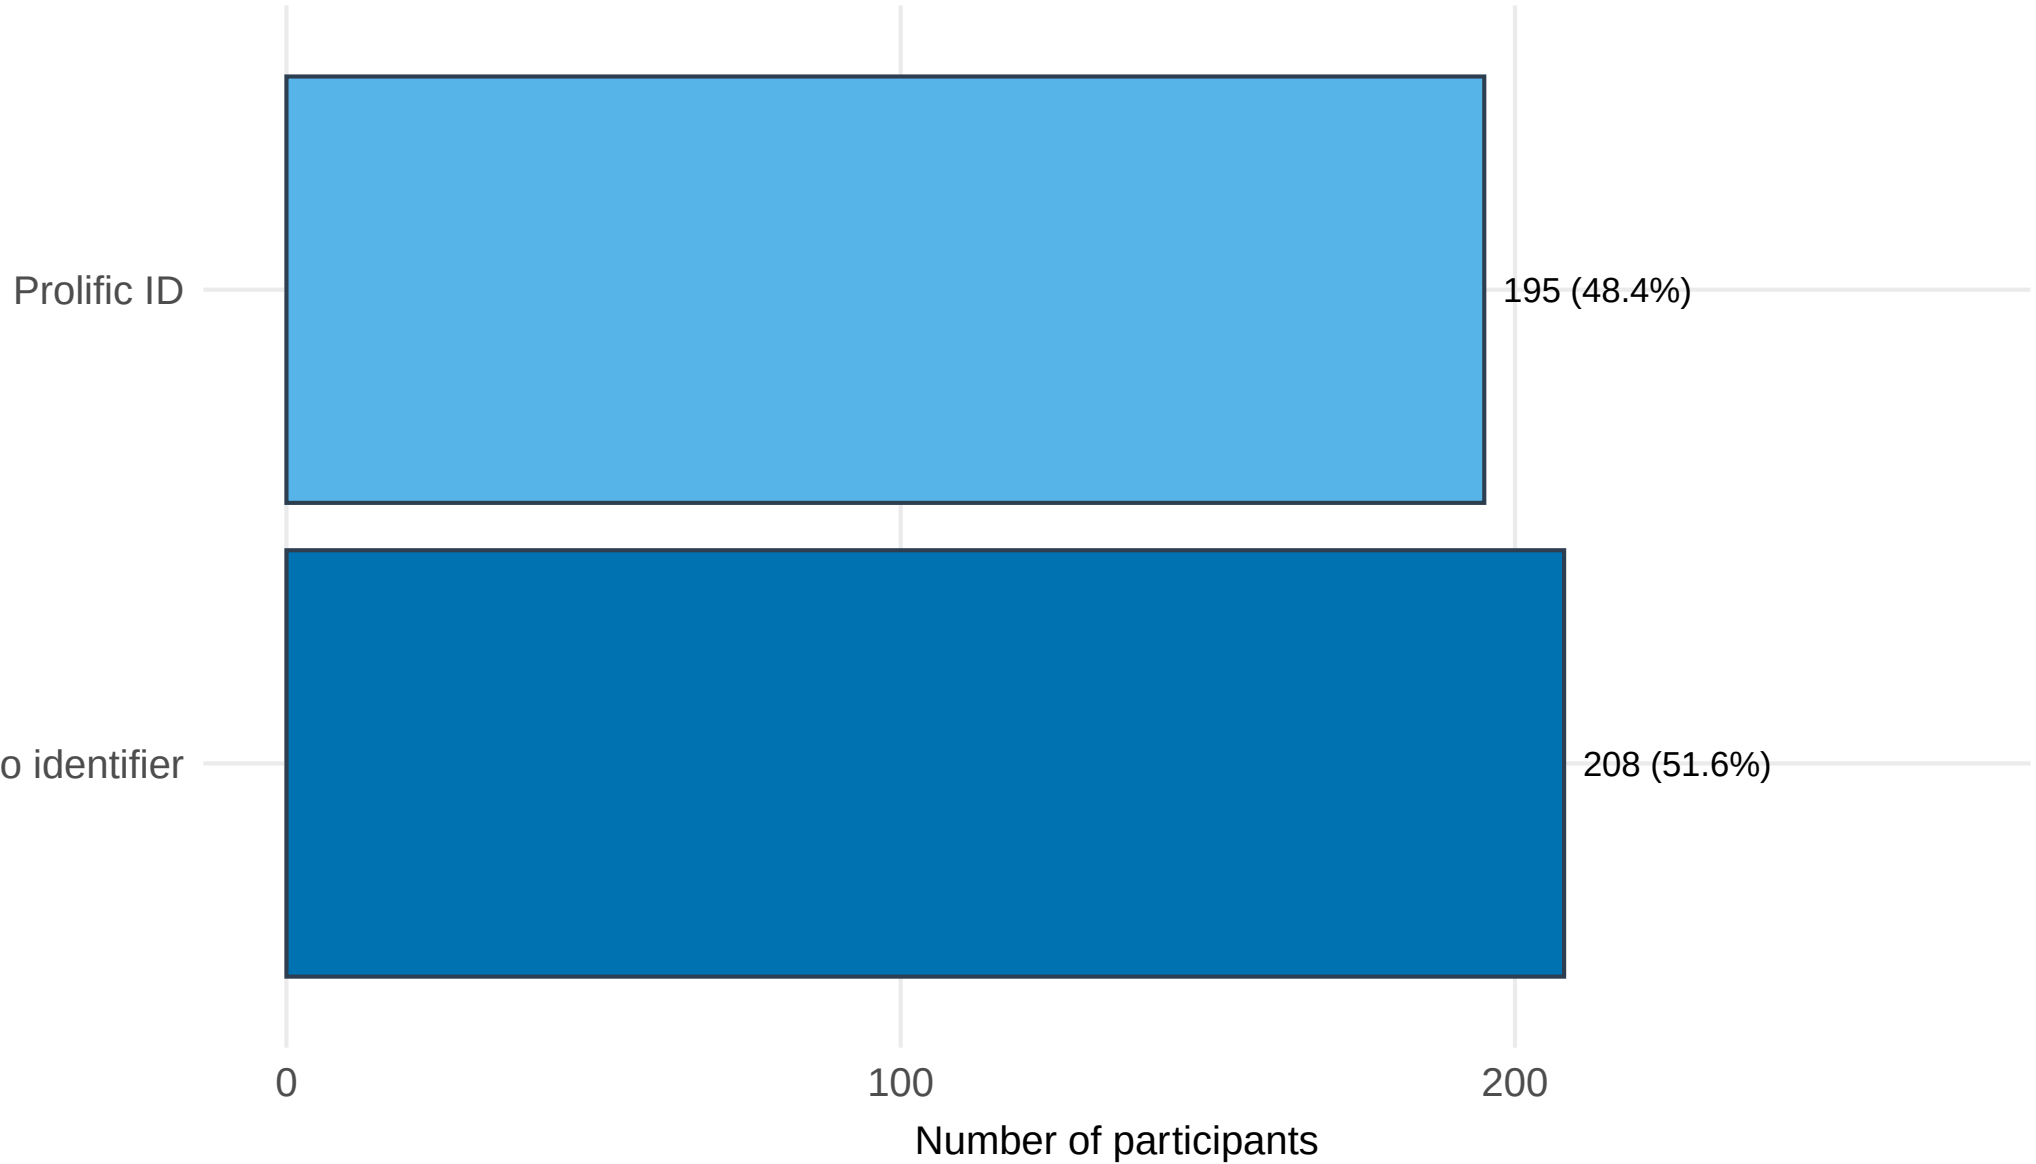

Sample distribution by source survey – ordered

valid n = 403; missing n = 0; total n = 403

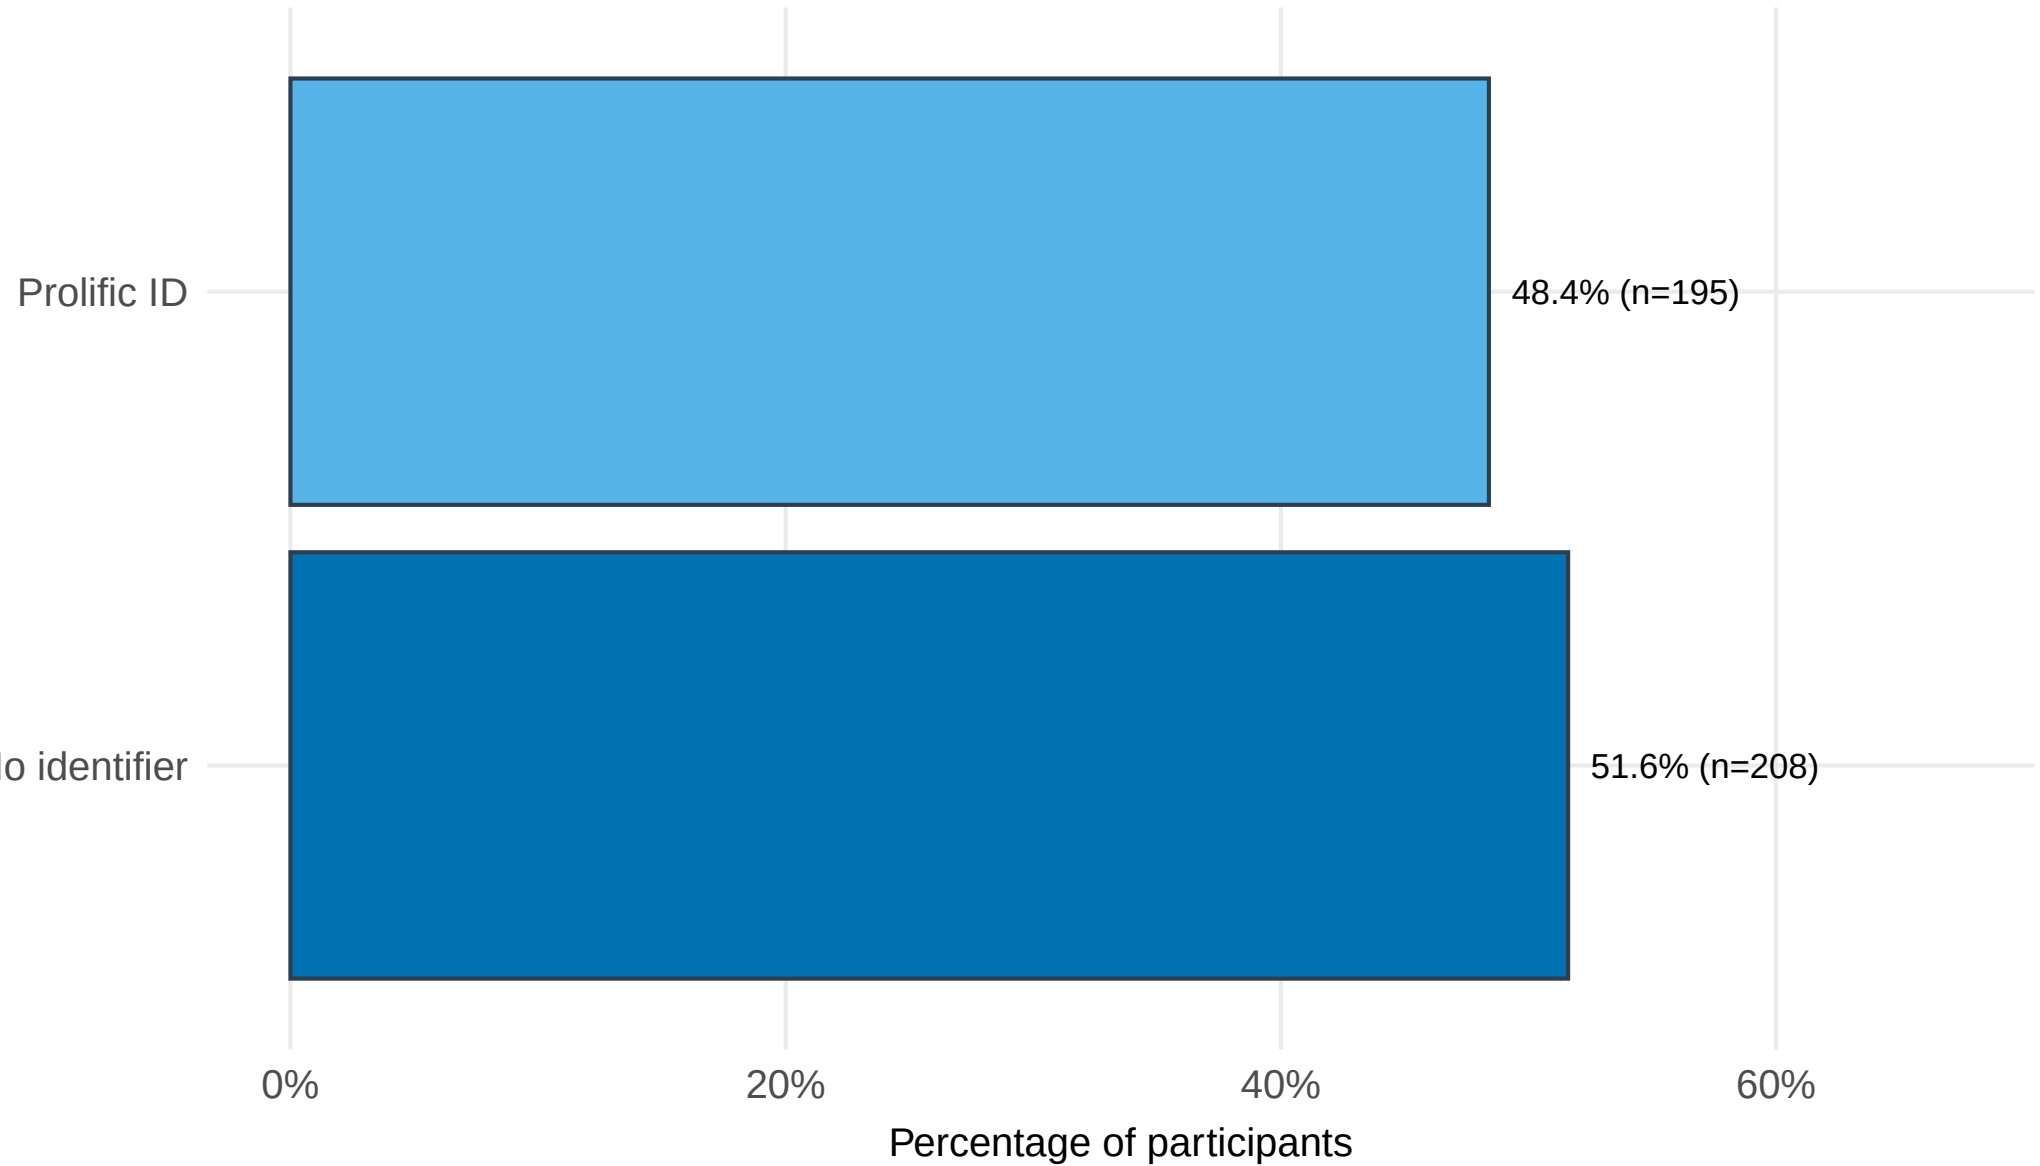

Sample distribution by identifier type

valid n = 403; missing n = 0; total n = 403

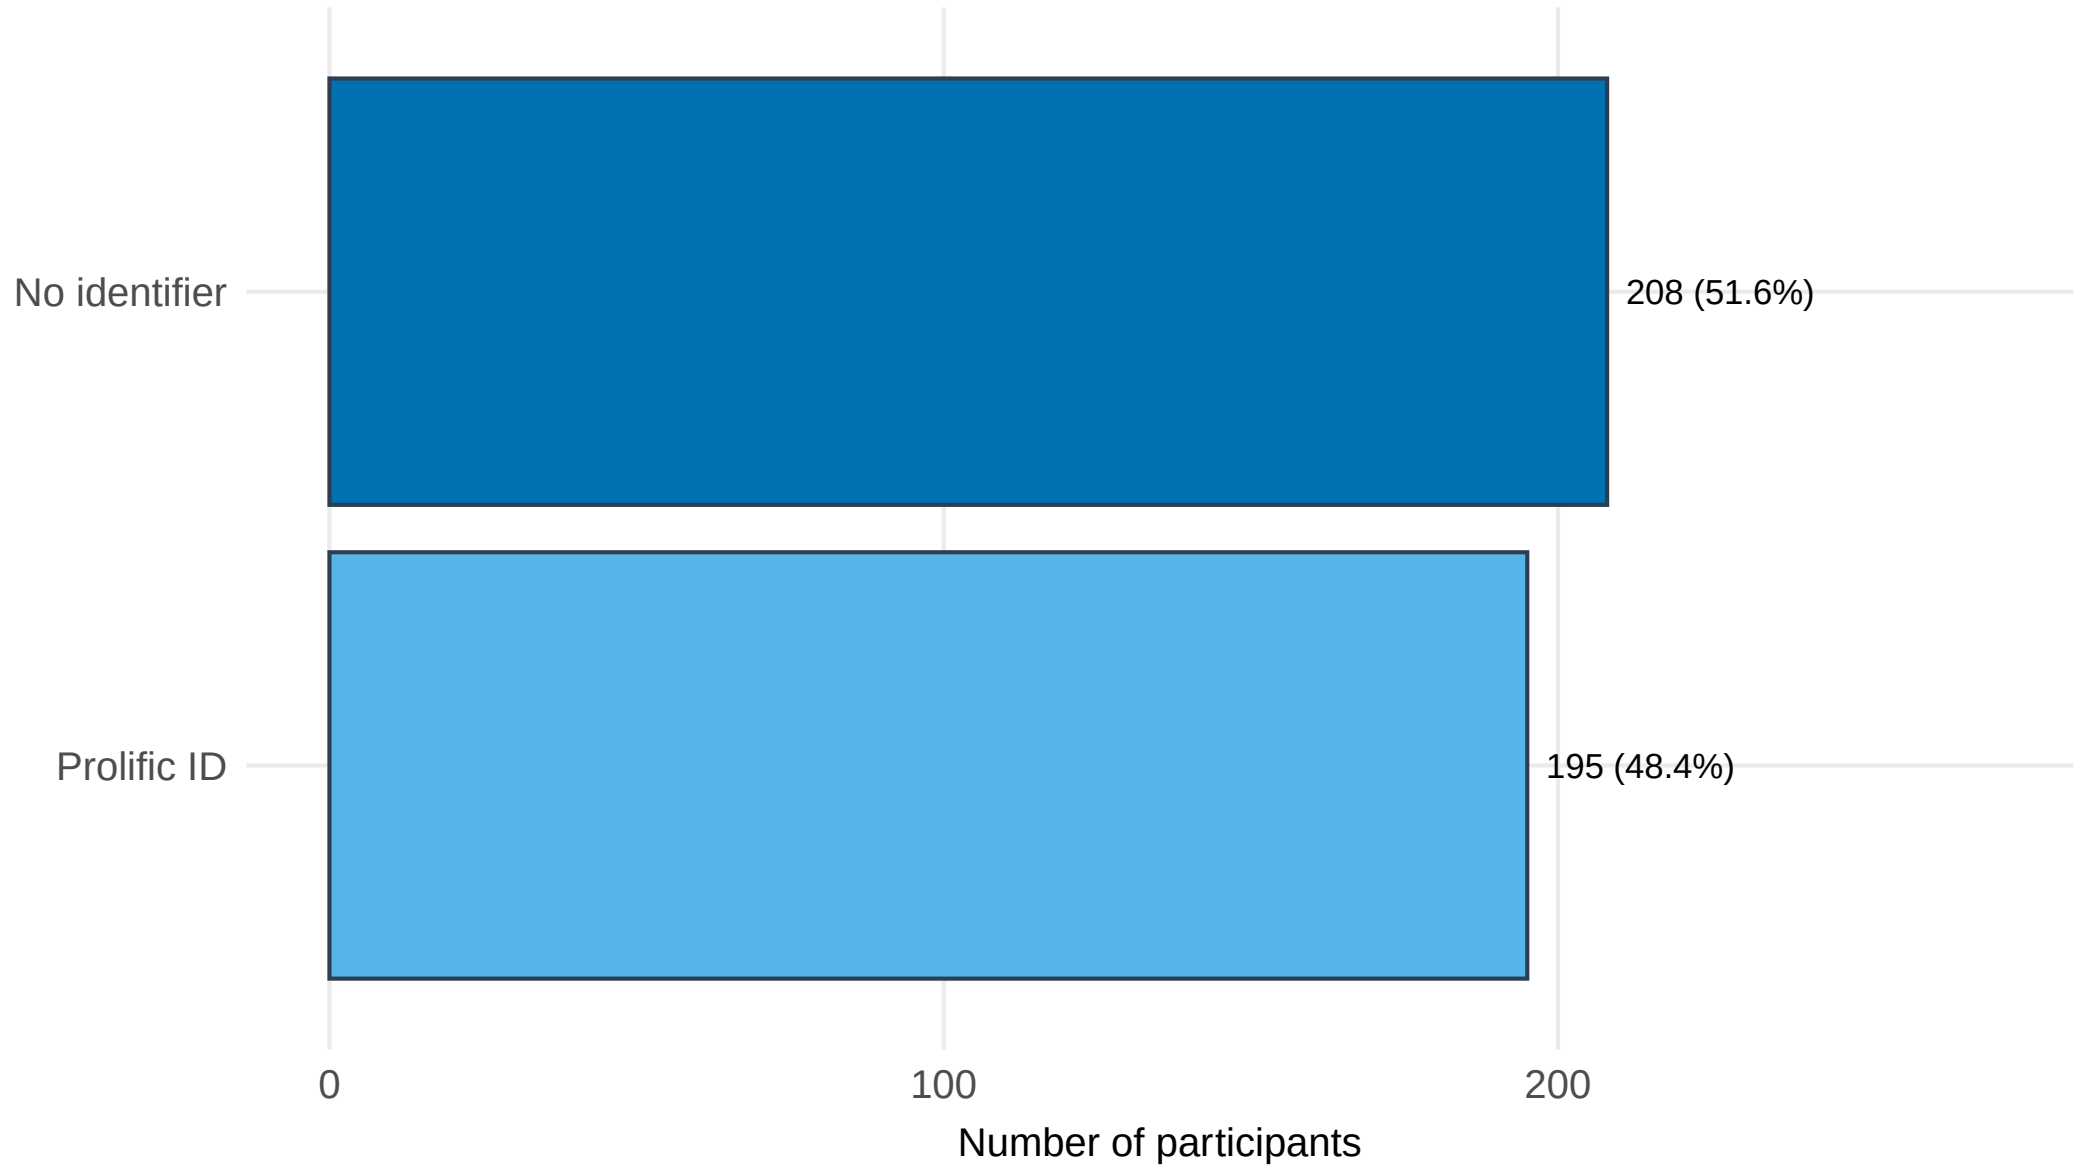

Percentage distribution of the sample by identifier type

valid n = 403; missing n = 0; total n = 403

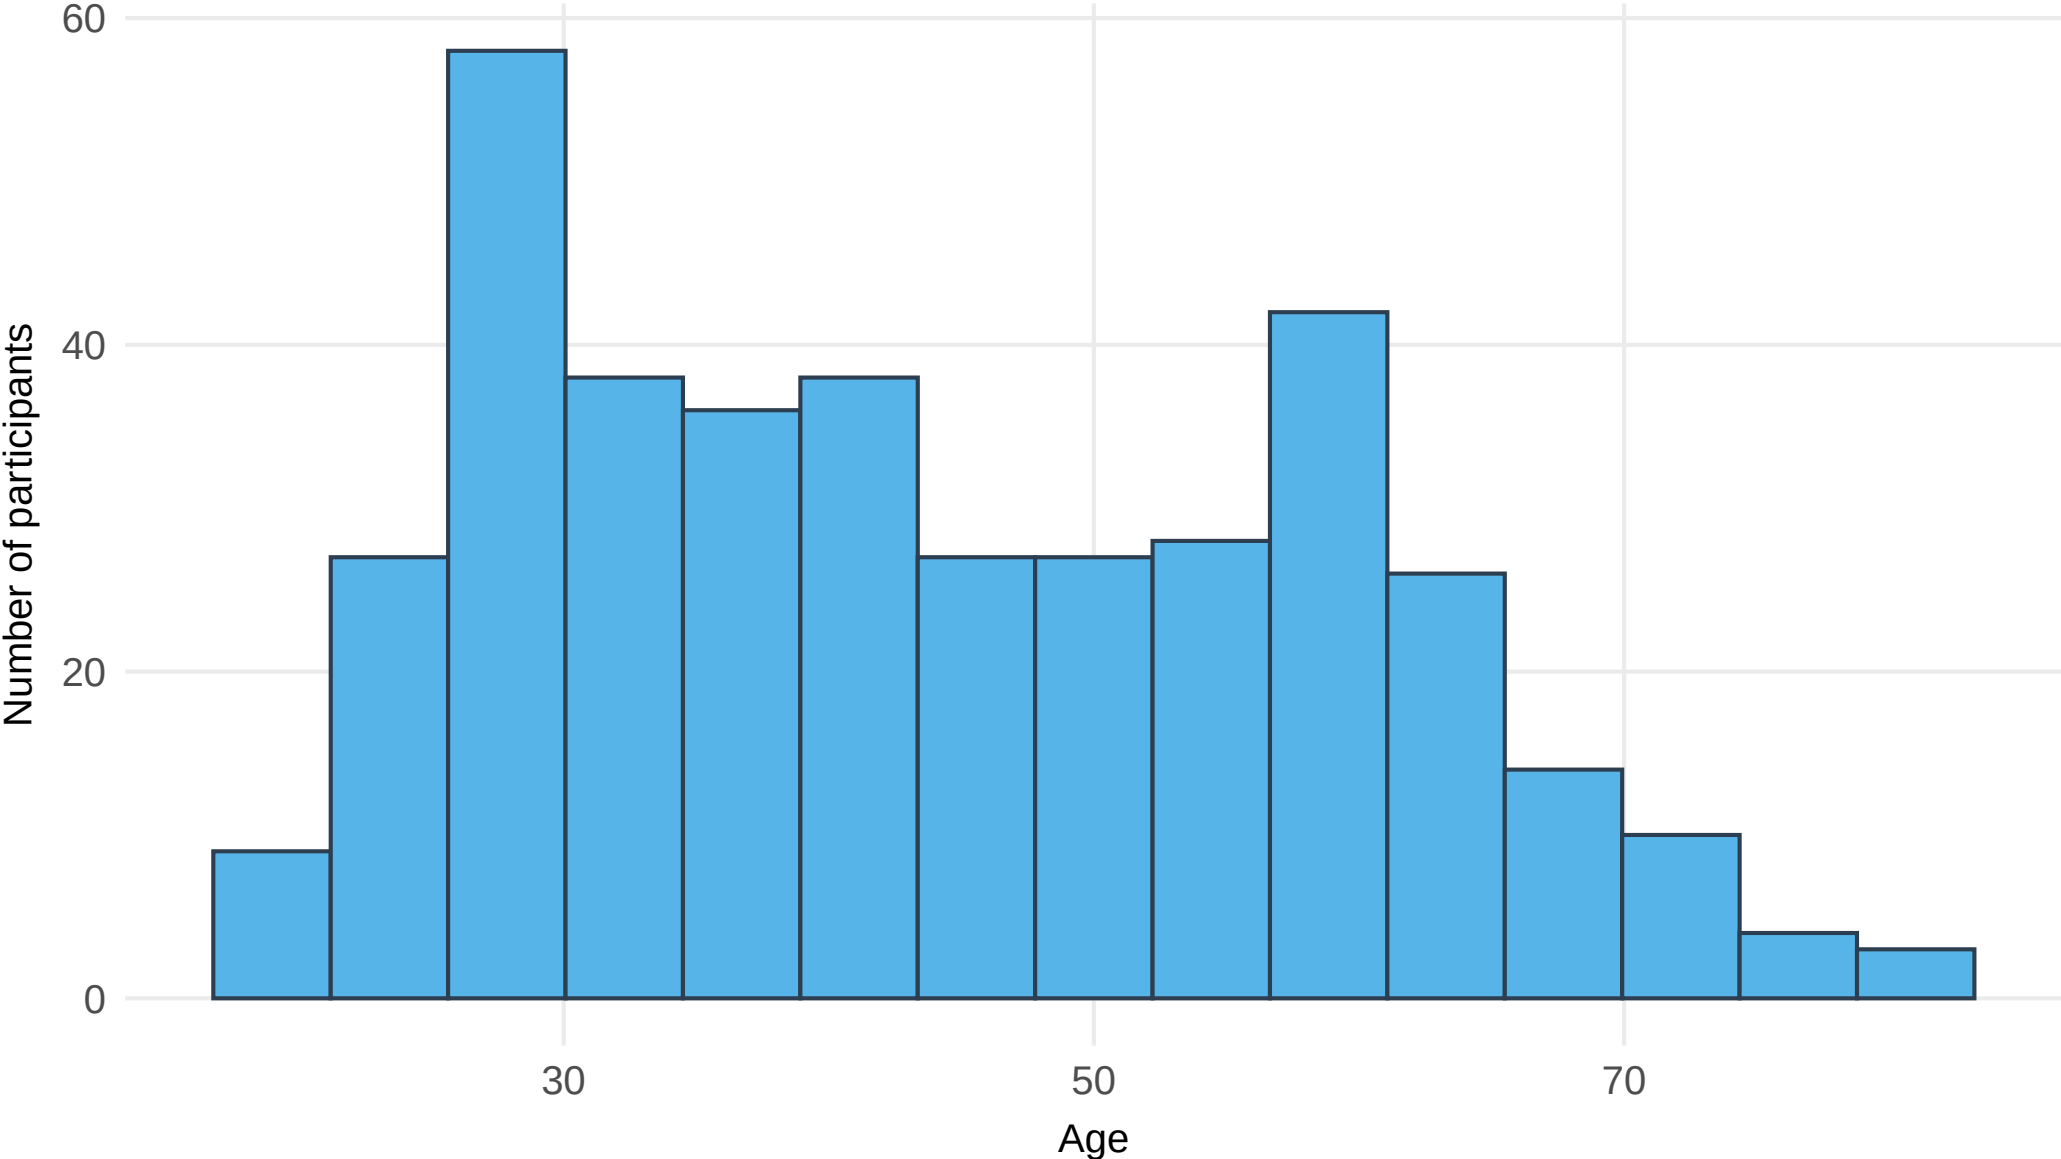

Sample distribution by identifier type – ordered

valid n = 403; missing n = 0; total n = 403

Age distribution of the sample

valid n = 387; total n = 403

Age and gender pyramid of the sample

Percentage of participants with valid age and gender
valid n = 381; missing n = 22; total n = 403
